**71/75, NEW CAVENDISH STREET,
LONDON, W. 1.**

The following letters dated the 19th and 20th September supplement previous clinical reports on **SEPTICÆMIA** and on **MALIGNANT DISEASE** treated by:—

COLLOSOL MANGANESE

CROOKES'

COLLOSOL CUPRUM

"I have had very gratifying result with the Manganese. A patient came to me having knocked the skin off his elbow while handling septic sacks. The whole arm was swollen, brawny, purple-oedema of hand, and inflammation extending over breast—sanguineous discharge from wound, intense pain and constitutional disturbance. I injected 1 c.c. on the 13th, 15th, and 17th—to-day, after 7 days treatment, the arm, with the exception of a healthy looking discharge from the wound, is practically well."

—, M.D.

"We have been using injections of Collosol Cuprum for about six months in a case of growth in the Breast, with recurrence in Glands. There is no further sign of mischief after using four boxes at the rate of one injection per week and lately every ten days."

—, M.R.C.S., L.S.A.

—, M.B., B.S.
