

## The Original & Standard Emulsion of Petroleum.

# ANGIER'S EMULSION

Angier's Emulsion is made with a specially purified Petroleum of just the right degree of viscosity. It is the original petroleum emulsion—the result of many years of careful research and experiment.

### A Perfect Emulsion.

Placed under the microscope, physicians may see for themselves how minutely and evenly the oil globules are sub-divided. Angier's Emulsion actually duplicates cream in appearance and consistency, and like cream, mixes instantly and perfectly with water. Bland and pleasant, it has no suggestion of petroleum and is almost tasteless. It can be administered undiluted or in any desired beverage, and may be continued for a long period without exciting distaste. It is remarkably well borne by sensitive stomachs.

### Quality and Reliability.

Angier's Emulsion has won for itself an unique reputation for quality and reliability. It has from the first, set the standard of perfection in Emulsions; in pharmaceutical excellence and in therapeutic value, it is easily first. Medical men may prescribe Angier's Emulsion for their patients in the confident assurance that it is at all times, in hot weather as in cold, of uniform quality and excellence.

### In use over Thirty Years.

Angier's Emulsion has been before the Medical Profession for over thirty years, and is now extensively prescribed by Medical Men throughout the entire English speaking world. There is a vast amount of evidence to its efficacy in the treatment of pulmonary and bronchial affections, gastrointestinal disorders, and in wasting diseases due to faulty assimilation.
