

# PETROLEUM

in the treatment of

## INTESTINAL DISORDERS.

Purified Petroleum in one form or another is becoming more and more widely employed in the treatment of intestinal disorders associated with toxæmia. To obtain the best results, the petroleum should be not only non-irritating and free from all impurities, but it should also be in the form of an emulsion. In this form, the minutely divided petroleum globules mingle freely with the intestinal contents, and are more widely and evenly distributed throughout the entire intestinal tract. Maximum lubrication is thus assured and the characteristic action of the oil obtained with greater uniformity.

# ANGIER'S EMULSION

### The Original & Standard Emulsion of Petroleum.

Angier's Emulsion is made with a specially purified petroleum of just the right degree of viscosity. It is a perfect Emulsion, of cream-like appearance and consistency, and mixes instantly with water and other liquids. Pleasant to the palate and remarkably well borne by sensitive stomachs, it can be administered either undiluted or in any suitable vehicle. It has been found that patients who cannot tolerate clear petroleum are able to take Angier's Emulsion without the slightest difficulty and continue indefinitely without ever developing an antipathy to it. Angier's Emulsion will also be found most useful as a vehicle for the administration of intestinal antiseptics or astringents, for which purpose it is eminently suitable.

*"After long experience of many forms of paraffin and petroleum, both in the character of emulsions and otherwise, I have found none so satisfactory to the patient as Angier's Petroleum Emulsion."*—M.D., D.Sc., M.A.
