

CAMBRIDGE

PORTABLE CO₂ INDICATOR FOR ALVEOLAR AIR

After breathing out in the ordinary way the patient expels through a Katharometer the residue of the gas in the lungs which has been in actual contact with the blood system. The percentage of carbon dioxide is then read on the indicator. This percentage is a valuable guide to prognosis and treatment.

**ELECTRICAL IN OPERATION.
REQUIRES NO ABSORBENTS.
QUICK READING.
SIMPLE TO OPERATE.**

Further particulars sent on request.

DeDionBouton

The All-Enclosed Coupé is entirely new and is a worthy companion of the Doctor's Coupé illustrated. It has two adjustable sliding collapsible front seats, which can be so manœuvred to accommodate a stretcher case lying down, in case of grave emergency! This design is as practical as it is revolutionary. Two occasional seats disappear in recessed squabs, and the continuous boot is five feet long and can accommodate equipment for a travelling surgical theatre.

**Complete Cars from
£475.**

AFTER THE SHOW!

DID you see the new All-Enclosed De Dion Coupé at the Motor Show? Many Doctors did: They came to criticise and stayed to admire. If you have seen the Show Cars and not yet made your decision let your new Car be a De Dion. We know how important it is to you to have dependable service. We appreciate that Comfort must be on the highest plane to yield its measure at the end of the long and tiring day. And we build accordingly. For forty years we have built the ideal Doctor's Car.

De Dion Bouton, Ltd., 10, Gt. Marlborough St., London, W.1

Service: Woodside Works, North Finchley, N.12.
