Sold by Chemists in Tins, 1s., 2s., 5s., and 10s.

SILVER MEDAL, PARIS EXHIBITION, 1867.

PRIZE MEDAL, 1862.

PRIZE MEDAL, 1865.

JOSEPH F. PRATT,

SURGICAL INSTRUMENT MAKER, ARTIFICIAL LEG AND TRUSS MAKER,

PRATT'S IMPROVED SPINAL APPARATUS,

EXCEEDINGLY LIGHT AND COMFORTABLE TO THE WEARER.

420, OXFORD STREET, W.

NATURAL MINERAL WATERS OF VALS, VICHY, CARLSBAD,

SELTZER, KISSENGEN, HOMBURG, PULLNA, FRIEDRICHSHALL, etc., direct from the Springs; also the Artificial Mineral Waters prepared by Dr. Struve and Co., at the Royal German Spa, Brighton.

Agents—W. BEST and SONS, 22, Henrietta Street, Cavendish Square, London, W.

THE NATURAL MINERAL WATERS OF VALS

Are the most richly mineralised of all the French mineral waters, and are used with great success in cases of ACIDITY, GOUT, GRAVEL, DIABETES, FALLOR, OBSTRUCTION OF THE LIVER, etc. (See extract from the *Lancet* of the 14th April, 1866.) Analysis and Pamphlets free on application.

Price 36s. per case of Fifty Bottles, or 12s. per Dozen.

CHIEF DEPÔTS:—27, MARGARET STREET, REGENT STREET, W.; 22, HENRIETTA STREET, REGENT STREET, W.; 11, LONDON STREET, E.C.

SCHWALHEIM NATURAL TABLE WATER,

ELECTORAL HESSE, GERMANY.

Patronised by the French, German, and Continental Courts and Embassies.

Sole Importers into England, PINKERTON and CO., 80, BOTOLPH LANE, CITY. Ditto into Ireland, M. CONATY, 1, CROW STREET, DUBLIN. And sold by Chemists, Grocers, and Confectioners.

This Mineral Water, which contains double the quantity of Carbonic Acid Gas possessed by any other, is restorative, Digestive, Tonic, slightly Aperient, and Diuretic. In Gastric Affections, Debility, and Decay of the Blood the use of this marvellous Water has been attended by most successful results. It is the choicest of all dilutants in Wine, Brandy, Syrups, etc., and destroys neither colour, aroma, nor savour, and is the only Water known to effectually quench thirst. Medical men may have samples gratis by calling or by sending their card.

DR. BLY'S AMERICAN ARTIFICIAL LEG. (PATENTED.)

This beautiful invention has gained a great reputation in America, where, during the recent war, constant opportunities occurred for testing its efficiency.

Unlike the Anglesey Leg used in England, it possesses rotative and lateral action at the ankle-joint, thus permitting the body of the wearer to be sustained in easy equilibrium during walking or standing—a point hitherto entirely overlooked in the construction of Artificial Limbs.

Instead of an ugly wooden structure, it presents a form resembling in colour and action the human limb, and can be readily washed when needed.

Dr. BLY has placed his invention in the hands of **Mr. HEATHER BIGG, 56, Wimpole Street**, from whom alone it can be obtained. —

*** A descriptive Pamphlet sent post free on application.

Pulvermacher's Improved Patent Imperishable Chain Batteries, Chain-Bands, Belts, &c.

In a Report to the Academy of Medicine of Paris on the merits of Pulvermacher's former Volta-Electric Chain Batteries, the official reporter, while eulogising the important progress attained by this invention, alluded with satisfaction to the endeavours of Mr. Pulvermacher to improve his apparatus.

Constantly devoted to his task, Mr. Pulvermacher has now finally succeeded in producing an Imperishable Chain Battery, in which the consumed zinc can be easily restored at a very small expense, and by which many other important advantages are obtained. This, together with improvements in his Volta-Electric Flexible Bands for portable use, constitutes a progress which has met with a flattering recognition from the most eminent men of the Medical Profession, expressed in a testimonial signed by

Sir Charles Locock, Bart., M.D.; Sir H. Holland, Bart., M.D.; Sir Wm. Fergusson, Bart., F.R.S.; Sir J. R. Martin, C.B., M.D.; Dr. E. Sieveking; Dr. R. Quain; and H. Lobb, Esq., M.R.C.S. Mr. Pulvermacher now invites rigorous investigation by the Medical Profession generally in verification, and will be happy to furnish them with every facility for experimenting, and offering them the most liberal advantages.

Ample details will be found in Pulvermacher's Pamphlet, in which the *modus operandi* of continuous and intermittent volta-electric currents, in momentary or enduring application, is scientifically treated by the Inventor and Patentee, for which and for Prospectuses and Price Lists, apply to

J. L. PULVERMACHER'S GALVANIC ESTABLISHMENT, 200, REGENT STREET, W.

(Removed from 73, Oxford Street.)
