PRINTING OF EVERY DESCRIPTION AT MODERATE PRICES.

Chlorodyne. — R. Freeman,

PHARMACEUTIST, KENNINGTON ROAD, LONDON, S., informs the Profession and Trade that he has FOR YEARS MADE, and extensively used in his business, Chlorodyne; and that he is supplying it in one-ounce stoppered bottles at 1s. 6d. each, and in four-ounce bottles 5s. each. He guarantees it to be uniformly and properly prepared, and superior to any other makers', though their charge be ever so exorbitant; and he trusts that the lowness of price at which he offers it will allow the Profession to use it in common practice and at public institutions, so that its extraordinary beneficial effects may be enjoyed by the poorest sufferer.

A CUP OF COFFEE IN ONE MINUTE.

Dunn's Essence of Coffee, War-

ranted to Keep Good in any Climate.

Extract from the Commercial Handbook of Chemical Analysis, by A. NORMANDY, M.D.:—"Coffee is met with in commerce as a manufactured article in the state of Essence, or rather Extract of Coffee. That preparation, providing it be genuine, is peculiarly adapted to the use of Travellers, who are thus enabled to procure a cup of good Coffee without trouble or apparatus. Of all the attempts which have been made to manufacture such an Extract, and of most of which I have had samples, I have found on examination that only one kind, that manufactured by DUNN, of Pentonville, would keep. I think I can confidently assert that DUNN'S ESSENCE of COFFEE is the only one which has stood ground; all other attempts, for some reason or other, have hitherto proved failures, and eventually have been abandoned."

Sold in bottles from 1s to 2s. each.

Manufactory, Pentonville, London; and may be had everywhere.

Lichen Islandicus; or, Iceland

MOSS COCOA; manufactured by DUNN and HEWETT, London.

Strongly recommended by the Faculty in all cases of Debility, Indigestion, Consumption, and all Pulmonary and Chest Diseases.

The two articles here combined are well known for their nutritive qualities. The Moss contains a large portion of nitrogen, or flesh-producing substance; and being prepared by a very careful and peculiar process, which frees it from all the grittiness and disagreeable flavour which are always so unpleasant, is rendered perfectly pure, with nothing but the beneficial parts left.

The Cocoa, containing more nutriment than most articles of food, being combined with the Moss, forms in this mixture an article of the greatest importance to the invalid, and at the same time beneficial to the healthy and robust, restoring health where it is declining, and retaining it where already enjoyed.

Testimonial from A. H. HASSALL, Esq., M.D.

"I have carefully examined, both microscopically and chemically, the preparation of Iceland Moss and Cocoa made by Messrs. Dunn and Hewett: I find it to be carefully manufactured with ingredients of the first quality.

"The combination of Iceland Moss and Cocoa forms a valuable article of diet, suited equally for the robust and for invalids, especially those whose digestion is impaired. It is very nutritious, of easy digestibility, and it possesses, moreover, tonic properties."

(Signed) A. H. HASSALL, M.D.

Jozeau's Copahine Mege.

Or SACCHARATED CAPSULES. — Copahine and Cnchets are doubtless the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous, by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris, and the different London Hospitals, viz., St. Thomas's, Guy's, and St. Bartholomew's, under the care of Messrs. Lloyd, Poland, and Le Gros Clark. "Lancet" Nov. 6, and Dec. 10, 1852. The Copahine which is in form of a pretty pink sugar-plum, effects a cure in about six days, either in recent or chronic diseases. 100 Capsules, 4s. 6d. at G. JOZEAU'S, French Chemist, 49, Haymarket, London; 22, Rue St. Quentin, Paris; and all the most important Chemists.
