

COLLINS' BOCKET LAMP

WITH

FIDDIAN'S METALLIC CHIMNEY

Is specially adapted for use with the Microscope, Ophthalmoscope, etc., or for reading, as by its use a pure and intense illumination is obtained, while all extraneous light is cut off, and the annoyance from broken glass chimneys obviated.

Price Complete, with 2½ Condenser and Polished Case, 35s.

CHARLES COLLINS, 77, Great Titchfield Street, London, W.

Catalogue of Microscopes and Specimens free by post on application. Post-orders to Great Portland Street Office.

PURE SWISS MILK (Preserved),

Prepared by the ANGLO-SWISS CONDENSED MILK COMPANY in Switzerland. Recommended by BARON VON LIEBIG and other eminent Chemists. See *British Medical Journal*, November 2nd, 1867, page 384. This Milk keeps sweet for months after being opened, and may therefore be used gradually from day to day. Its UNIFORMITY and PURITY render it specially adapted for INFANTS' FOOD and for HOSPITAL PURPOSES. All things considered, it will be found as CHEAP for FAMILY USE as ordinary Milk. It may be used as an equivalent to Cream. Sold Wholesale by Barclay and Sons, Crosse and Blackwell, Newbery and Sons, and at 95, Leadenhall Street; Retail by Chemists, Grocers, and Italian Warehousemen generally.

SOLUTION OF BIMECONATE OF MORPHIA,

Which has been employed by all branches of the Medical Profession

Dr. Roots thus writes of it:—"I have taken it myself daily now for very nearly four years, and during that period I have frequently prescribed it in my private practice. The result of my observations on its effects on myself and others amounts to this, namely, that it disturbs the head less, that it distresses the stomach less, and that it constipates the bowels less, than any other preparation of Opium. I have taken every other preparation of Opium, but from none of them have I obtained the same degree of quiet rest that I have enjoyed from this Bimeconate of Morphia."
