EMERGENCY SURGERY

By

HAMILTON BAILEY, F.R.C.S. (Eng.)

This work has been revised completely and a large number of new figures have been added. Several of the chapters have been re-written and all have been brought up to date. The work now contains methods of dealing with every type of surgical emergency, including those arising out of the present conflict. Some of the new chapters deal with war wounds and their treatment.

Gowlland
electric diagnostic instruments

This Popular **DIAGNOSTIC SET**

contains a May Ophthalmoscope, giving a brilliant and unobstructed view of the fundus even with undilated pupils. The prism is designed and adjusted so that corneal glare is reduced to a minimum. The instrument is well designed and made so as to be easy and convenient to handle.

The set contains a May Ophthalmoscope, Auriscope with three specula having different sized apertures, a Duplay Nasal Speculum, a Bent Arm Throat Lamp, Flat Metal Tongue Depressor, one each Laryngeal and Post Nasal Mirrors, a small Battery Handle taking Ever Ready No. 2015 Batteries, and a spare lamp complete in a strong and attractive case. All bright parts are chromium-plated and untarnishable.

The Battery Handle may be had chromium-plated finish, instead of the more usual black crackle finish, if desired.

Catalogue No. 3003.
