

DAILY DEFENCE AGAINST DIRT AND DISEASE

★ For the layman in normal health, protection against infection through the skin is adequately safeguarded by the daily use of Wright's Coal Tar Soap. For over 70 years this well-known toilet soap with its antiseptic and antipruritic properties has been widely used by Doctors, Nurses and in hospitals and nursing homes. As a result largely of medical recommendation it becomes more widely used by the general public every year. The only soap containing 'liquor carbonis detergens' (Wright's) it is also highly soothing to delicate skins and can be safely used for infants as well as adults

**WRIGHT'S** COAL TAR SOAP PROTECTS WHILE IT CLEANSES

## DRESSINGS YOU CAN RELY ON —

EVERY process of manufacture, from the raw cotton to the finished product, is controlled in our own mills under rigid laboratory inspection—truly 'white' and genuinely 'absorbent' cotton wool: soft but strong absorbent white gauze: bandages specially cut and processed so that they do not ravel. These, like the whole of our range of dressings, are the best of their respective kinds.
