

The shortest distance between

DOUBT and DIAGNOSIS

ELECTROCARDIOGRAPHY'S diagnostic value springs from several benefits that it alone offers—benefits of which you need not, now, deprive yourself. This method's known advantage in speedily delineating a wide variety of heart abnormalities is further enhanced by certain equipment design features as in the Victor Model "B" Electrocardiograph which make *this* instrument expensive to be without.

Consistent Accuracy

The Victor Unit's scientifically-correct design assures consistently accurate tracings. No single feature other than accuracy is more rigidly demanded of every component part which goes to make up the Model "B".

Ease of Operation

Smooth operation, the result of complete refinement in control, makes it possible to produce perfect tracings after but one hour's instruction and practice.

Dependability

Skilled electromedical instrument craftsmen produce each sturdy, all-metal Model "B" unit in conformity with literally hundreds of tests to guarantee reliability and, perforce, economy of operation.

Portability/Mobility

The compact unit, with self-contained power supply, may be used *anywhere*; the optional mobile stand makes this even easier for consulting room and hospital use.

Read the free booklet—learn why!

Learn more of electrocardiography's benefits with this better instrument by reading the free, 16-page booklet *A Full Solution of a Difficult Problem*. Address a note requesting your copy of Publication K/DR 27 and post it, to-day.

Why don't they find

something better?

They argue and ARGUE—blame this and that. Why don't they try ONAZOTE or RUBAZOTE? ONAZOTE Expanded Ebonite Compound and RUBAZOTE Resilient Expanded Rubber Compound are the lightest manufactured solids, have structural strength and the lowest thermal conductivity, are water and bacteria proof. They are superseding many materials for the manufacture of surgical apparatus, while RUBAZOTE is especially suitable for mattresses, cushions, and the like.

We are prepared to experiment free of charge to produce your articles in ONAZOTE or RUBAZOTE; to demonstrate that these materials are better from every point of view than those you now employ. Please write for fullest details of our offer.
