

STATRILIZED* DRUGS

Morphine
Morphine cum Atropine
M.S.A.

- ▼ SELF STERILISING
- ▼ LESS TOXIC
- ▼ STABLE
- ▼ READY FOR INSTANT USE

The special Novutox Cold Sterilising Process by which statrilized (i.e., stable and self-sterilising) solutions are prepared offers for Morphine Therapy an advance which is outstanding compared with any other system.

Inconvenient tablet forms of morphine and other important narcotics, often of necessity prepared for injection with *water of doubtful character*, have been grudgingly tolerated by the Medical Profession for half a century.

The growing volume of emergency work associated with modern life and especially with A.R.P. arrangements, demanded some improvement, and solutions of morphine in bottles and ampoules, ready for immediate use without further process of sterilisation, have at long last made their appearance.

*Registered Trade Mark.

May be used in same dosages as ordinary solutions of the same drugs.

Why **ANDREWS** is the Ideal Tonic Laxative

Andrews is a pleasant tasting, effervescent aperient with tonic properties, and is a valuable aid to Inner Cleanliness.

Andrews is beneficial in most digestive disorders, feverish conditions, the ailments of children, and in pregnancy and lactation. Its use may be discontinued without reaction when the need for it ceases.

Andrews justifies the description of "Ideal Tonic Laxative" because:—

FIRST... Patients like taking Andrews, because its brisk effervescence is immediately refreshing and stimulating, it sweetens the mouth and helps to clean the tongue.

NEXT... Andrews allays gastric discomfort, heart-burn and nausea by diminishing the stomach's acidity and relieving flatulence.

THEN... Andrews increases bile flow, relieves hepatic congestion, and improves digestion. It is partly absorbed from the intestine as alkali, and therefore helps to correct acidity in the blood and to stimulate kidney function.

FINALLY... Acting by osmosis, Andrews clears the bowels gently and entirely without irritation.

METABOLIC RATE

Methods of Stimulating

PERHAPS one of the most common of all the conditions that a general practitioner is called upon to deal with is the condition of depressed metabolism.

Drastic methods of increasing the metabolic rate — by intravenous injection of thyroxin, or the administration by mouth of compounds of the nitro-phenol group — are, of course, possible. Such methods, however, are usually contra-indicated, and the practitioner relies on the

prescription of such foods as meat extracts, home-made broths, etc.

It is a matter of some importance, therefore, to know that one of the accepted meat preparations is outstandingly effective in raising the metabolic rate. It is Brand's Essence. The heat output increases sharply immediately Brand's Essence is taken. It reaches a peak after half an hour and is still appreciable six hours later.

Whenever there is a need to raise the metabolic rate, Brand's Essence may, therefore, be prescribed with confidence. It is of special convenience in cases where the patient cannot tolerate sufficient protein.

A further advantage of Brand's Essence is that patients find it palatable even when all other foods are distasteful. Brand's has the effect of instantly stimulating the appetite.

Brand's Essence is still sold at the pre-war price.
