

# SPENCER SURGICAL SUPPORTS

## For Post-operative Conditions

Spencer Support shown open, revealing inner section.

Same Support closed. The concealed inner abdominal section is adjustable at several different points from the outside of the support.

B.M.J. 5/9.

The Spencer Post-operative Support is designed with a separate inner section.

The inner section is shaped to function as a substitute abdominal wall. It covers the abdomen, and curves inward at the lower abdomen in order to hold the viscera securely in the supported position desired by the Doctor.

Each and every Spencer Support is designed individually for the named patient for treatment of the condition(s) specified by the Doctor.

Light in weight, comfortable and simple to adjust, Spencer Supports are guaranteed to hold their shape as long as they are worn.

For Service at your Surgery, the Hospital, or the Patient's home, see local Telephone Directory or write direct to us.

### THE IMPORTANCE OF AN INFANT'S FIRST SOLID FOOD

A progressive step by an old-established firm

## READY-STRAINED VEGETABLES IN GLASS BOTTLES

VACUUM STEAM-COOKED

THESE ready-strained vegetables — prepared by the old-established firm of Brand & Co. Ltd., makers of Brand's Essence — will be welcomed by young mothers who have for some time realized that finely sieved vegetables are an ideal way of starting infants on more solid foodstuffs.

Specially grown vegetables are used for Brand's Baby Foods. These are picked at their prime and steam-cooked in vacuum.

The vegetables are then forced through a fine-mesh sieve which breaks up the solid particles completely and gives an absolutely smooth, even texture. They are then packed in vacuum to guard against deterioration. Modern scientific methods are thus able to ensure the preservation of the valuable mineral salts and vitamins, also the fresh natural colour and flavour of the vegetables, far better than home-cooking can.

Most doctors recommend starting the change-over to a more solid diet with Brand's

Bone and Vegetable Broth — it can be added to the milk feed. Strained Carrot can be given at four months. Strained Prunes and Strained Beetroot can be given after six months.
