

WRIGHT'S

Liquor Carbonis Detergens Mark

*A standard antiseptic supported
for 80 years by leading authorities
and skin specialists*

The production in 1862 of Liquor Carbonis Detergens marked the achievement of a determined effort to isolate the antiseptic virtues of Coal Tar from the inert residuum of substances having no therapeutic value. Since that time Wrights has remained firmly established in the confidence of the medical profession everywhere, and standard works [★] include many indications for its use in persistent diseases of the skin. A highly specialized process of extraction, strictly controlled at every stage, assures an effective and constant action. Prescription notes covering many common requirements will be supplied gladly on request.

[★] *Authorities who urge the use of Wright's Liquor Carbonis Detergens in their respective works include: M^cCall Anderson, Norman Walker, Radcliffe-Croker, K. Herzheimer, Malcolm Morris, Allan Jamison, Osler (in most modern editions), and Taylor.*

Sole Manufacturers and Proprietors:

THE THERAPY OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the underlying cause is not discoverable or changes from time to

time—now irritant dusts, now bacterial infection etc. The underlying factor is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.

NO MORPHIA :: :: NO NARCOTICS
