Anaemia

Haemoglobin estimations have revealed a disturbing increase in the incidence of anaemia in women and children. It is considered that an initially low iron intake is aggravated by dietary deficiencies to produce widespread nutritional anaemia.

Although Marmite does not compensate for iron deficiency, it does provide a particularly useful addition to the war-time diet. It supplies the Vitamin B complex and haemopoietic factors of specific value in certain macrocytic anaemias.

MARMITE

4211/a

Elasticity, uniform thickness and toughness are other standard properties of **NYLON** synthetic sutures.

NYLON is water resistant, does not become soggy in water or steam, and is unharmed by any of the usual sterilising agents or the commonly used antiseptic solutions, excepting the phenols and strong mineral acids. Available in 14-inch lengths from the usual medical supply houses.
