

SAFE and INSTANT RELIEF in ASTHMA

SAFETY AND IMMEDIACY OF
RELIEF IN ASTHMA ARE EN-
SURED BY FELSOL POWDERS

FELSOL is compounded in powder form to obviate any crushing of tablets before use. The dictum of Hale-White (*Materia Medica*, 18th edition) that "Tablets... are very popular, but are sometimes useless, for they may be so hard and insoluble that they are found in faeces quite unaltered" is too frequently overlooked.

The powder form and special method of manufacture are the essentials of immediacy of relief with FELSOL in ASTHMA.

FELSOL contains no narcotic and no morphia. It is safe for use in cardiac cases. FELSOL is absolutely non-cumulative in action.

Convalescents must have sleep...

..Bourn-vita
will help
them to-day

The nerve-soothing qualities of Bourn-vita help wartime convalescents to get the most out of the sleep they need so much. The Vitamin B, phosphorus and calcium in Bourn-

vita are all valuable nerve foods, and help to induce a restful, *natural* sleep. This nourishing food-drink, prepared by Cadburys, is especially light and digestible.

Why ANDREWS is the Ideal Tonic Laxative

Andrews is a pleasant tasting, effervescent aperient with tonic properties, and is a valuable aid to Inner Cleanliness.

Andrews is beneficial in most digestive disorders, feverish conditions, the ailments of children, and in pregnancy and lactation. Its use may be discontinued without reaction when the need for it ceases.

Andrews justifies the description of "Ideal Tonic Laxative" because:—

FIRST... Patients like taking Andrews, because its brisk effervescence is immediately refreshing and stimulating, it sweetens the mouth and helps to clean the tongue.

NEXT... Andrews allays gastric discomfort, heart-burn and nausea by diminishing the stomach's acidity and relieving flatulence.

THEN... Andrews increases bile flow, relieves hepatic congestion, and improves digestion. It is partly absorbed from the intestine as alkali, and therefore helps to correct acidity in the blood and to stimulate kidney function.

FINALLY... Acting by osmosis, Andrews clears the bowels gently and entirely without irritation.

QUINOLOR[®] SQUIBB

brand Compound Ointment

An ointment of proved value in staphylococcal infection, particularly good results are to be obtained in sycosis barbae, sycosis vulgaris and tinea sycosis. "Quinolor" possesses noteworthy qualities for promoting tissue repair and affords an excellent dressing for cutaneous affections and superficial lesions. The antiseptic action continues over a considerable period of time, although the advantages associated with frequent dressings should not be overlooked. "Quinolor" Compound Ointment is applied to the affected area following a thorough cleansing of the wound. Impetigo contagiosa is among the other dermatological conditions which have frequently responded very favourably to "Quinolor" therapy.

Anti-typhoid-paratyphoid Vaccine (T.A.B.)

It is nowadays customary to combine in one vaccine the protective agents against typhoid and paratyphoid A and B fevers, which are all liable to occur in similar circumstances. T.A.B. vaccine contains 1,000 million *B. typhosus* and 500 million each of *B. paratyphosus* A and B per cubic centimetre. Inoculation with this vaccine is strongly recommended for nursing staffs in fever hospitals and persons proceeding to infected areas anywhere (e.g., on holidays in many Continental countries), or to the tropics. Double inoculation ($\frac{1}{2}$ c.c. followed by 1 c.c. 7 to 10 days later) produces an immunity regarded as lasting about 12 months, at the end of which a further dose of 1 c.c. is advisable to maintain the immunity.

PHOLETONE

CARDIOVASCULAR STIMULANT

Recent work has shown that Pholedrine is a most satisfactory drug for restoring and maintaining the blood pressure at major operations. Intramuscular injections of Pholedrine 0.75 c.c. to 1 c.c. act in three to five minutes, restoring the blood pressure to normal for twenty to forty minutes. When the blood pressure fall is extreme 0.25 c.c. intravenously plus 0.75 c.c. intramuscularly gives an instantaneous rise lasting from thirty to forty minutes.

MEDICAL DEPARTMENT

BOOTS PURE DRUG COMPANY LIMITED NOTTINGHAM

FOR MYCOTIC INFECTIONS OF THE SKIN

● Mycotic infections of the skin, ever prevalent, are now in season and 'Mersagel' fungicide cream therefore still more in demand.

Ringworm of the groin and axillae, athlete's foot—common infections of the skin—are spread more easily under conditions of communal living where contact between large numbers in camps, billets, reception areas is more likely to be close and cross infection therefore greater.

Moreover, the healthy indulgence in sports wherever possible these days unfortunately may, in bathing huts and dressing rooms, through infected mats and

towels, provide scope for contact and infection.

'Mersagel' contains phenyl mercuric acetate—an extremely powerful fungicide—incorporated in a cream, as glycerin is no longer available. The new base is clean and convenient. Lightly rubbed into the affected part, be it between the toes or in the creases of the groin, or between the folds of the axilla, and then covered with gauze or lint, 'Mersagel' rapidly clears up acute infections after a few applications.

'Mersagel' cream can also be used prophylactically among contacts.

A Valuable Contribution to

SULPHONAMIDE TREATMENT

The employment of the sulphonamide drugs rapidly advances in Hospital and General Practice.

Increasing experience has brought familiarity with those toxic sequelae which are by no means rare, and may be-

come so severe as to necessitate discontinuance of oral administration.

Nausea and vomiting may rapidly be overcome with the coincident administration of 'Milk of Magnesia.' Consisting of a stable suspension of magnesium hydroxide, it effectively allays gastric irritation,

discomfort, and sickness. Dosage can readily be adjusted for adult or child.

'Milk of Magnesia' also presents marked advantages as an aperient during sulphonamide treatment. Gently laxative it secures an easy, adequate and well-formed motion without griping or discomfort. Completely free from sulphur, it has no undesirable after-effects.

The routine administration of 'Milk of Magnesia' as an antacid sedative and laxative is entirely safe and offers a valuable contribution to sulphonamide treatment.

'MILK OF MAGNESIA'

'Milk of Magnesia' is the Registered Trade Mark of the Phillips' preparation of Magnesia.

VITAMIN THERAPY IN SUB-OPTIMAL NUTRITION

It is now a commonplace of modern dietetic knowledge that a diet liberal in quantity and apparently impeccable in quality is not necessarily a safeguard against many of the less dramatic manifestations of malnutrition.

Sub-optimal nutrition is known to be responsible for a variety of minor disorders which occur in the twilight zone of nutritive failure—for example, easy fatigability, both mental and physical, functional digestive disorders with anorexia and gastrointestinal atony, anæmia, emotional instability, neuritis, lowered metabolic rate, and many other manifestations which have often been grouped under the general term neurasthenia.

THE MOST ELUSIVE VITAMIN

It is now generally agreed that malnutrition is nearly always of a mixed pattern, and is seldom attributable to the lack of a single factor. Although under modern conditions in this country the end results of single gross vitamin deficiencies are seldom observed in medical practice, it should not be lightly assumed that no general vitamin deficiency may exist. It is more difficult, for example, to ensure an adequate intake of the vitamin B complex than of the other vitamins known to be important

in human nutrition. To maintain an optimal level of vitamin B₁, the normal adult requires a daily intake of about 600 i.u., and to supply this from the ordinary food-stuffs even to-day may be a matter of considerable difficulty.

A deficiency of the vitamin B complex in the diet of the population generally is therefore more probable than that of other food factors, and there is a strong case for suspecting such a deficiency when considering the probable ætiological factors of many of the less spectacular conditions of ill-health.

RICH NATURAL SOURCE OF VITAMIN B

Bemax has come to be regarded by many physicians as the standard means of counteracting hypovitaminosis B. Bemax is one of the richest available *natural* sources of the vitamin B complex, and contains in addition a valuable proportion of vitamin E, as well as available iron. Moreover, Bemax contains 34 per cent. of protein of *first-class* biological value. To maintain uniform potency, samples of the output of Bemax are submitted each day to laboratory tests.

BROMETHOL B.D.H.

(Injection of Tribromoethyl Alcohol B.P.)

Bromethol B.D.H. produces a smooth, tranquil anaesthesia lasting about two hours. Basal anaesthesia with Bromethol B.D.H. is particularly valuable for patients with pulmonary or cardiac complications, for operations on the mouth, nose and throat in which inhalation anaesthesia may be inconvenient, and for operations for goitre in which the patient may be unduly nervous or apprehensive.

Bromethol B.D.H. is especially suitable for induction anaesthesia in children or any nervous patient for whom the induction of anaesthesia by inhalation appears to be particularly alarming or repugnant.

Properly-prepared solutions of Bromethol B.D.H. are stable and do not irritate the normal bowel; its use is not recommended, however, in rectal disease, peritonitis or in cachectic conditions.

THE IDEAL LAXATIVE FOR PROLONGED USE

Certain characteristics have won for ENO'S "FRUIT SALT" a very high place in professional regard. Few simple medicines are presented in so attractive a form, and for patients obliged to maintain prolonged use of a laxative ENO'S "FRUIT SALT" provides a highly satisfactory answer.

By the natural process of osmotic diffusion ENO'S "FRUIT SALT" creates healthy intestinal conditions, from which follow gentle regular and complete bowel evacuations.

The morning dose of ENO'S "FRUIT SALT" is universally regarded in a singularly favourable light. It is refreshing, exceedingly pleasant to drink. It is non-irritating, non-toxic, non-habit forming, and free from sweetening agent. Diabetic patients may take it in perfect safety, and, owing to the absence of sulphates, ENO'S "FRUIT SALT" may be confidently prescribed for patients receiving sulphonamide treatment.

★ "Calcium is an essential constituent of the diet, and the need for it continues throughout life. This is most imperative in the period of growth and adolescence, in pregnancy and lactation, but is none the less imperative in adult life and old age. (Brit. Med. Jour. 1:281, 1941).

A great amount of ill-health and poor physique is due to insufficient intake of calcium and phosphorus; much of this could be prevented by the administration of 'Calfos.' 'Calfos' is derived from the natural mineral constituents of bone, and presents calcium and phosphorus in the most assimilable form and in the correct physiological ratio. Its use ensures the retention of these two essential minerals in the body in adequate amounts to replace natural losses. It marks an advance in nutritional therapy of outstanding importance to all who suffer from calcium and phosphorus deficiency.

BRIEF BUT POWERFUL ACTION

Pentothal Sodium (Abbott) is a powerful hypnotic of the thio-barbiturate group. Injected intravenously, it produces prompt sleep with rapid recovery. It is so rapidly destroyed in the body that, when properly administered in dilute solution by the intermittent method, it approaches the minute-to-minute controllability of inhalation anaesthetics.

● Pentothal Sodium has been extensively used for short operative procedures in which intravenous anaesthesia was more convenient than block or inhalation anaesthesia, or where the latter were contraindicated. It has been reported to be more powerful and rapid in action than other barbiturates; to give a smooth and pleasant induction to anaesthesia with better relaxation and rapid recovery; and to produce jactitation but rarely. ● Pentothal Sodium may be used in major operative procedures requiring prolonged anaesthesia either alone or in conjunction with gas-oxygen, but this should be undertaken only by experienced anaesthetists or surgeons who have at hand facilities to combat problems involving respiratory depression as well as carbon dioxide and oxygen imbalance.

● Pentothal Sodium is issued in ampoules containing 0.5 gm. and 1.0 gm. of the drug.

NOTICE—Applications for vacancies advertised should, except where otherwise specified, state name, address, age, nationality, qualifications with dates, and be accompanied by copies of three recent testimonials with short statement of experience and appointments held. Unless closing date is stated applications should be sent at once.

INDIAN MEDICAL SERVICE. Recruitment of Women Medical Officers.—The Government of India are prepared to recruit a limited number of women medical officers for service with the Indian Medical Service for the duration of the war. Applicants must be British subjects, of not more than 45 years of age, and those selected will be appointed in the rank of Lieutenants. Antedate of seniority may be granted up to a maximum period of 6½ years in respect of resident hospital appointments, higher qualifications, and/or professional experience. The antedate will count for pay and promotion, but, in the case of candidates recruited in this country, higher rank will not be assumed until the date of disembarkation in India. On termination of service, a minimum gratuity is guaranteed to those officers who complete one year of service, viz., Rs. 2,000 to officers whose registrable medical qualification is dated before January 1, 1940, and Rs. 1,000 to those who qualified after that date, plus one month's pay for each further completed year of Army service. Further particulars regarding rates of pay, etc., may be obtained from the Medical Adviser, India Office, London, S.W.1, or from the Secretary, Military Department, India Office, to whom all inquiries should be addressed.

BOROUGH OF EPSOM AND EWELL. Temporary Medical Officer of Health.—Applications are invited for the appointment of whole-time Temporary Medical Officer of Health for the combined district comprising the Borough of Epsom and Ewell, the Urban Districts of Dorking and Leatherhead, and the Rural District of Dorking and Horley. The salary will be at the rate of £1,200 per annum, plus a car allowance at the rate of £150 per annum. Further particulars can be obtained from the Town Clerk, Epsom and Ewell, Town Hall, Epsom, to whom applications are to be sent not later than July 31, 1943.

COUNTY BOROUGH OF BARNSELY. Assistant Medical Officer of Health and Assistant School Medical Officer (Clinical Duties).—Consent having been given by the Ministry of Health to the filling of a vacancy in the medical staff of the Council by a temporary whole-time appointment in the above-mentioned capacity of a person not liable for military service, applications for the appointment are invited from fully qualified registered medical practitioners of either sex. Salary £500 per annum, rising by annual increments of £25 to £700 per annum, plus cost-of-living bonus, the commencing salary to be in accordance with qualifications and experience. The duties include attendance at the Infectious Diseases Hospital, the Venereal Diseases Clinics, and at the Public Health Laboratory, together with some work in connexion with Maternity and Child Welfare and School Medical Service, and such other duties as may from time to time be directed by the Medical Officer of Health. Preference will be given to candidates having a knowledge of infectious diseases and possession of the D.P.H. will be an advantage. The person appointed will be required to devote his or her whole time to the work of the office and will not be permitted to engage in private practice. The appointment will be subject to the Local Government Superannuation Act, 1937, and to the successful candidate passing a medical examination. The appointment will be determinable by three months' notice on either side. Applications, accompanied by full information regarding the liability for military service, should be sent to the Medical Officer of Health, Town Hall, Barnsley, on forms to be obtained from him, and returned as soon as possible.—A. E. Gillfillan, Town Clerk, Town Hall, Barnsley.

COUNTY BOROUGH OF WALSALL. Manor Hospital.—Applications are invited from registered medical practitioners for the appointment of Junior Assistant Medical Officer (A). Salary is at the rate of £150 per annum (plus war bonus at present of £16 18s. per annum), with full residential emoluments. Practitioners within three months of qualification and liable under the National Service Acts may apply, when appointment will be for a period of six months, otherwise it will be for a period of twelve months. Applications should be sent as soon as possible to James A. M. Clark, Medical Officer of Health, Council House, Walsall.

MEDICAL PRACTITIONERS REQUIRED for the positions of Temporary Assistant Medical Officer (Class 1) (B1) at the undermentioned hospitals. Salary £350 by £25 to £425 a year, with board, lodging, and washing. Married quarters are not available: Lewisham Hospital, Lewisham, S.E.13.—Surgical duties. Hackney Hospital, High Street, Homerton, E.9.—Casualty Officer. St. James' Hospital, Ouseley Road, Balham, S.W.12.—Anaesthetics. St. Charles' Hospital, St. Charles' Square, Ladbroke Grove, W.10.—Medical duties with children. Queen Mary Hospital for Children, Carshalton.—Children's diseases. Suitably qualified R and W practitioners holding B2 appointments, and also R practitioners holding B1 appointments and rejected by the R.A.M.C., may apply. Application form obtainable from the Medical Officer of Health (S.D.2), the County Hall, S.E.1 (stamped addressed foolscap envelope necessary), returnable by July 26, 1943. Canvassing disqualifieds.

Scientific Glassware
means
increased safety!

The experimental and dispensing work carried out by scientists and practitioners throughout the country calls for the most dependable glassware that the craftsman of the present day can produce.

PYREX brand Scientific Glassware has irrefutable claims that place it in the front rank of all such glassware . . . resistance to thermal shock, resistance to attacks from acids and alkalis, strength to resist the shocks of everyday usage, and adaptability to the many intricate experiments performed in the course of modern chemical research. Much of the heavy cost of Glassware replacements is thereby saved.

PYREX Brand Scientific Glassware is supplied only through Laboratory Firms, but illustrated catalogue and two free copies of our Chemist's Notebook will be sent direct on application to us.

The Trappings of Constipation...

TO our grandparents the Victorian mansion was a "desirable" residence, with its many bedrooms, its toilsome stairs, its basements; and, often, but one ill-ventilated water-closet, surreptitiously referred to, but never mentioned. It held many a martyr to constipation, which was relieved by such drastic purgatives as castor oil and calomel.

By prescribing Agarol and a suitable régime of exercise and diet, the modern doctor not only relieves but cures constipation.

Agarol Compound is an emulsion of mineral oil with an experimentally determined dose of phenolphthalein which softens the intestinal contents and assures adequate peristaltic stimulation and thorough evacuation.

Agarol is a mildly acting evacuant free from any such sequelae as griping pains, urgency, or anal leakage.
