

# SAFE and INSTANT RELIEF in ASTHMA

\* SAFETY & IMMEDIACY  
OF RELIEF IN ASTHMA  
ARE ENSURED BY  
FELSOL POWDERS

FELSOL is compounded in powder form to obviate any crushing of tablets before use. The dictum of Hale-White (Materia Medica. 18th edition) that "Tablets . . . are very popular, but are sometimes useless, for they may be so hard and insoluble that they are found in faeces quite unaltered" is too frequently overlooked.

FELSOL contains no narcotic and no morphia. It is safe for use in cardiac cases. FELSOL is absolutely non-cumulative in action.

\* The powder form and special method of manufacture are the essentials of immediacy of relief with FELSOL in ASTHMA.

## Synthetic Anti-Prothrombic Substance

# TEMPARIN

brand

3:3'-METHYLENE-BIS-(4-HYDROXYCOUMARIN)

(Synonyms: Dicoumarin, Dicumarol.)

TEMPARIN brand 3:3'-methylene-bis-(4-hydroxycoumarin) is a synthetic anti-coagulant which prolongs prothrombin and coagulation times of blood. It is a white, crystalline water-insoluble powder, and is active when given by mouth. Its anti-prothrombic properties suggest its use in the treatment of established thrombosis, in the prevention of post-operative thrombosis and embolism and in other blood circulatory and vascular disturbances.

## Chemotherapeutic Agent for Intestinal Infections

# COLISTATIN

brand

SUCCINYLSULPHATHIAZOLE

A chemotherapeutic agent with specific bacteriostatic action in the intestinal tract.

The drug is remarkably non-toxic on account of its low rate of absorption from the gastro-intestinal tract and consequent low concentration in the blood. This property is also responsible for the high local concentrations obtained in the intestine.

This new sulphonamide is very effective in the presence of ulcerative lesions which interfere with the activity of other chemotherapeutic agents.

COLISTATIN brand succinylsulphathiazole is indicated in the treatment of all types of colitis, except those of tuberculous origin; in the pre-operative as well as post-operative treatment of abdominal cases; in ulcerative lesions of the bowels; and in the treatment of bacillary dysentery.

After-treatment of Leg Ulcers, Varicose Veins, etc., necessitates adequate compression and support to prevent recurrence of the condition. The ‘Elastocrepe’ Bandage is the most economical means of providing support over a long period because the bandage may be washed repeatedly with-

out its elasticity being impaired. ‘Elastocrepe’ has the same unique Stretch and Regain qualities as ‘Elastoplast,’ but is non-adhesive. It allows free circulation and ventilation.

Available in 2 in., 2½ in., 3 in. and 4 in. widths, 5/6 yds. when stretched.

## WIDENED SCOPE FOR STILBOESTROL

● That stilboestrol will benefit a large number of menopausal patients has proved a boon to doctors treating women during the trying change of life. Stilboestrol, though chemically unrelated to the natural oestrogens reproduces their full effects. The convenience of oral administration and the economy of 'Clinestrol' brand of stilboestrol are advantages which widen the scope of this therapy.

Inhibition of lactation is another important practical use of 'Clinestrol'; one short

course of treatment lasting a few days is usually successful. Other measures, such as binding the breasts, restricting the fluid intake, and the use of purgatives, are rendered unnecessary.

More recently, numerous papers have appeared on the use of stilboestrol in the treatment of prostatic cancer. This form of alleviative therapy though still in its trial stage has given promising results. It seems certain that a degree of symptomatic relief is possible.

## Is your call really necessary?

A quickening of interest in health is bringing the public into consultation with the General Practitioner with increasing frequency. And there's the rub! His hours are long and arduous.

But in using his judgment between the advanced gastro-intestinal case and one where the patient can forestall serious trouble by dietetic self-treatment under periodical guidance, the Doctor can and does ease the increasing weight of his responsibilities.

That is an aspect of the assistance Benger's Food affords at all stages of gastric disorders which the war is emphasising. Alone among "foods" Benger's, by virtue of its enzymic action, sustains the patient without digestive strain, and at the same time allows the Doctor to vary the degree of pre-digestion in accordance with the power of assimilation, and the need for regulated digestive exercise.

## SULPHANILAMIDE TULLE

OPTREX BRAND

*The ideal dressing for burns*

The most modern and satisfactory methods of treatment of burns include the introduction of Sulphanilamide or one of its variants, into the damaged area. But a burn on its first occurrence is always an acute emergency and an application is required that is immediately ready, is a complete primary dressing, will promote healing, and prevent infection.

**SULPHANILAMIDE TULLE** is such an application. Contained in a small compact box, it is easily carried by the Doctor in his Emergency Case, or may advisedly form part of a First Aid Emergency Outfit.

**SULPHANILAMIDE TULLE OPTREX BRAND** is applied direct to the wound. The sulphanilamide is exhibited in a soothing emulsion which eases pain, and allows a change of dressing without destroying fragile healing tissues.

## The Need for Calcium

A great amount of ill-health and poor physique is due to insufficient intake of calcium and phosphorus; much of this could be prevented by the administration of 'Calfos.' ## 'SULPHA' DRUGS

One of the most outstanding recent additions to the group of sulphonamides is SULPHANILYL MANDELATE. This new compound has recently been introduced for the treatment of genito-urinary infections, and it offers a convenient method of obtaining the dual therapeutic effect of sulphanilamide and mandelic acid. Early clinical reports indicate that SULPHANILYL MANDELATE produces a rapid response and that the toxic side effects are comparatively mild.

**NOTICE—Applications for vacancies advertised should, except where otherwise specified, state name, address, age, nationality, qualifications with dates, and be accompanied by copies of three recent testimonials with short statement of experience and appointments held. Unless closing date is stated applications should be sent at once.**

**HIS MAJESTY'S COLONIAL SERVICE.** The Colonial Medical Service. Vacancies for Medical Officers.—The maintenance of an efficient Colonial Medical Service constitutes a vital part of the national war effort, and it is most important that the Service should be assured of an adequate supply of doctors. The Secretary of State for the Colonies therefore invites applications from doctors possessing a medical qualification registrable in the United Kingdom who are British subjects and who are under 35 years of age. Medical Officers are appointed in the first instance for general service. But there are ample opportunities for work in special branches of medicine and surgery, in public health, and in medical research. The normal salary scale is from £600 to between £1,000 to £1,120. There are large numbers of super-scale posts, to which promotion is made on merit and which carry higher salaries. Government quarters, in many cases free of rent, and first-class passages to and from the Colonies, are provided, and an adequate pension scheme is in force. Selected candidates are normally required to attend a course of instruction in Tropical Medicine and Hygiene either before proceeding overseas or during their first period of leave. Further particulars, including the regulations governing admission to the Colonial Medical Service, may be obtained from the *Director of Recruitment (Colonial Service)*, 2, Park Street, London, W.1.

**INDIAN MEDICAL SERVICE.** Recruitment of Women Medical Officers.—The Government of India are prepared to recruit a limited number of women medical officers for service with the Indian Medical Service for the duration of the war. Applicants must be British subjects, of not more than 45 years of age, and those selected will be appointed in the rank of Lieutenants. Antedate of seniority may be granted up to a maximum period of 64 years in respect of resident hospital appointments, higher qualifications, and/or professional experience. The antedate will count for pay and promotion, but, in the case of candidates recruited in this country, higher rank will not be assumed until the date of disembarkation in India. On termination of service, a minimum gratuity is guaranteed to those officers who complete one year of service, viz., Rs. 2,000 to officers whose registrable medical qualification is dated before January 1, 1940, and Rs. 1,000 to those who qualified after that date, plus one month's pay for each further completed year of Army service. Further particulars regarding rates of pay, etc., may be obtained from the Medical Adviser, India Office, London, S.W.1, or from the Secretary, Military Department, India Office, to whom all inquiries should be addressed.

**COUNTY BOROUGH OF NEWPORT.** Social Welfare Committee, Junior Resident Medical Officers (A posts). Temporary Appointments.—Applications are invited from registered medical practitioners, male and female, for the above appointments at Woolston House Emergency Hospital, Newport, Monmouthshire. Reg. Tel. Address: Bethlem, Beckenham. Station: Eden Park (Southern Railway). Telephone: Springpark 1180-1181.

President: HER MAJESTY QUEEN MARY. Vice-President: SIR GEORGE WILKINSON, Bart., Alderman. Joint Treasurers: Edmund Stone, Esq., John L. Worsfold, Esq., O.B.E. Physician-Superintendent: J. G. Porter Phillips, Esq., M.D., F.R.C.P.

This REGISTERED Hospital is situated at Monks Orchard in some 250 acres of park, pleasure and farm grounds. Applications can be considered on behalf of patients of the educated classes in a presumably curable condition.

With a view to early treatment voluntary or uncertified patients are admitted. Patients who can contribute 5 guineas weekly towards the cost of treatment and maintenance may be received as vacancies arise. The Committee will also consider applications for admission at lower rates and in certain cases will be prepared to admit patients free of charge. The comfort of sensitive patients is greatly enhanced by the fact that the majority are given single bedrooms. **TREATMENT ON MODERN PRINCIPLES.** Every facility for specialized investigation and treatment is provided in the Lord Wakefield of Hythe Science and Treatment Unit, including RADIOLOGICAL and DENTAL DEPARTMENTS, BIOCHEMICAL, PATHOLOGICAL, and PSYCHOLOGICAL LABORATORIES. The Medical Staff have access to a panel of Consultants in cases which present unusual symptoms requiring specialized investigation and treatment. Under the direction of qualified officers HELIOTHERAPY, HYDROTHERAPY, and ELECTROTHERAPY are administered in the Physiotherapy Department. **SPECIALIZED TREATMENT** of various forms is given to suitable cases.

**OCCUPATIONAL THERAPY** in the form of various Arts and Crafts is actively encouraged from the medical aspect, and under the guidance of a competent instructress this department has proved most effective as a therapeutic factor in all stages of mental illness. The promotion of physical fitness is a prominent item of treatment and this is enhanced by arrangements for patients to take part in Outdoor and Indoor Sports and Entertainments. Application should be made to the Physician-Superintendent.

## Reliable Pituitary Products

### 'PITUITRIN'

'Pituitrin,' the first posterior pituitary extract to be placed at the disposal of the medical profession, was introduced in 1908 and is still a premier product of its class. Parke, Davis & Co.'s research workers showed in 1927 that there are at least two active principles in 'Pituitrin.' These are now available in 'Pitocin' (the oxytocic principle) and 'Pitressin' (the pressor and antidiuretic principle).

In boxes of 6 and 12 ampoules of  
0.5 c.c. and 1 c.c.

### 'PITOCIN'

Fourteen years ago 'Pitocin' was introduced to the medical profession. The development of 'Pitocin' made it possible for the first time to administer the posterior pituitary oxytocic hormone without any significant amount of pressor hormone—and with only a minimum of extraneous proteins. The clinical advantages of this product in hypertensive patients and in post-partum haemorrhage were soon recognized. An increasing number of prominent obstetricians are now adopting 'Pitocin' for routine use. They prefer it not only for cases of nephritis, eclampsia and pre-eclampsia but for every obstetrical patient. Its exceptional purity, standardized potency, and general reliability make it an outstanding oxytocic preparation.

In boxes of 6 and 12 ampoules of  
0.5 c.c. and 1 c.c.

### 'PITRESSIN'

'Pitressin' is standardized to contain 20 pressor units per c.c. It is indicated for the relief of post-operative intestinal stasis and for the prevention of post-operative shock and collapse. It has also proved of great service in the elimination of gas-shadows in abdominal radiography.

In boxes of 6 and 12 ampoules of  
0.5 c.c. and 1 c.c. 'Pitressin' Tannate  
in Oil—especially indicated for  
controlling polyuria in diabetes  
insipidus—is available in boxes of  
6 ampoules of 1 c.c.
