## THE IDEAL LAXATIVE FOR PROLONGED USE

Certain characteristics have won for ENO'S "FRUIT SALT" a very high place in professional regard. Few simple medicines are presented in so attractive a form, and for patients obliged to maintain prolonged use of a laxative ENO'S "FRUIT SALT" provides a highly satisfactory answer.

By the natural process of osmotic diffusion ENO'S "FRUIT SALT" creates healthy intestinal conditions, from which follow gentle regular and complete bowel evacuations.

The morning dose of ENO'S "FRUIT SALT" is universally regarded in a singularly favourable light. It is refreshing, exceedingly pleasant to drink. It is non-irritating, non-toxic, non-habit forming, and free from sweetening agent. Diabetic patients may take it in perfect safety, and, owing to the absence of sulphates, ENO'S "FRUIT SALT" may be confidently prescribed for patients receiving sulphonamide treatment.

# MAGTRIZ

ANTACID · ANTIPEPTIC · ANTITOXIC

A new and highly effective preparation for the treatment of Hyperchlorhydria, Peptic Ulcer, Intestinal Toxaemia and Minor Digestive Disturbances.

## FORMULA :

*Magnesium Trisilicate*  $2\text{MgO} \cdot 3\text{SiO}_2 \cdot n\text{H}_2\text{O}$  — 91%  
*Magnesium Hydroxide*  $\text{Mg}(\text{OH})_2$  — 9%

Magnesium Trisilicate is attracting widespread interest in the Medical Profession on both sides of the Atlantic. There are however two disadvantages. In the first place, commercial preparations do not all conform to the same basal specification and their properties differ widely. Secondly, due to the slow rate of reaction, no immediate relief is obtained and the patient thus loses faith in the treatment. MAGTRIZ remedies these defects.

The Mag. Trisil. and the Mag. Hydrox. used in MAGTRIZ are guaranteed to comply with the requirements of the British Pharmacopœia and of the British Pharmaceutical Codex respectively. The small quantity of Magnesium Hydroxide is just enough to give immediate relief from discomfort, without any ill effect, and its mild laxative properties are an additional help to sufferers from gastric disorders.

**MAGTRIZ not only gives prompt and effective relief, but also neutralises and adsorbs gastric acids for several hours.**

## THE WAR-WORKER

Environmental and occupational changes, in many cases, result in menstrual difficulty. The milder forms of primary dysmenorrhœa respond well to treatment with sedatives and analgesics of a salicylate nature.

Of these, 'Anadin,' a finely-balanced compound of aspirin, phenacetin and caffeine, is especially well suited to the alleviation of both uterine pain and cephalalgia.

The knowledge that this product is not habit-forming ensures absolute confidence during prolonged administration, should this be necessary.

# LIQUID CITRALKA

## *For Systemic Alkalization*

An effective alkalizing agent is presented in Liquid Citralka which contains 25 per cent. of di-sodium hydrogen citrate in a palatably flavoured vehicle.

Di-sodium hydrogen citrate ( $\text{Na}_2\text{HC}_6\text{H}_5\text{O}_7$ ) is slightly acid in reaction and does not neutralize gastric acidity nor interfere with gastric digestion. After absorption Liquid Citralka releases alkaline ions gradually, as the citrate radical is oxidized.

The administration of Liquid Citralka is suggested in order to render the reaction of the urine alkaline in pyelitis, cystitis, urethritis and during sulphanilamide therapy; or to overcome the tendency to acidosis in acute infections, dehydration and inanition fever of the new-born.

## Chemotherapeutic Agent for Intestinal Infections

**COLISTATIN**brand  
SUCCINYLSULPHATHIAZOLE

A chemotherapeutic agent with specific bacteriostatic action in the intestinal tract.

The drug is remarkably non-toxic on account of its low rate of absorption from the gastrointestinal tract and consequent low concentration in the blood. This property is also responsible for the high local concentrations obtained in the intestine.

This new sulphonamide is very effective in the presence of ulcerative lesions which interfere with the activity of other chemotherapeutic agents.

COLISTATIN brand succinylsulphathiazole is indicated in the treatment of all types of colitis, except those of tuberculous origin; in the pre-operative as well as post-operative treatment of abdominal cases; in ulcerative lesions of the bowels; and in the treatment of bacillary dysentery.

## INJECTION TREATMENT OF VARICOSE VEINS

● For its reliable sclerosing powers, 'Ethamolin' injection has become an established method of treating varicose veins.

'Ethamolin,' the Glaxo preparation of ethanolamine oleate, on injection into the varix causes endothelial reaction resulting in eventual sclerosis. Accidental perivenous extravasation of 'Ethamolin' does not lead to sloughing.

'Ethamolin' is therefore effective and safe. Its chemical composition is constant, it is not liable to deterioration, potency is unvaried and its sclerosing properties are retained in full indefinitely. 'Ethamolin' contains no impurity likely to cause allergic reactions. Varices once shrunk by 'Ethamolin' usually remain so permanently.

# ANAHÆMIN B.D.H.

## *Five Salient Points Concerning Its Use*

- 1 Anahæmin B.D.H. is the hæmopoietic principle of liver sometimes referred to in textbooks of medicine as the 'super-concentrate'.
- 2 Owing to the high degree of activity of Anahæmin its administration is the most economical method of producing blood regeneration in cases of pernicious anæmia.
- 3 In subacute combined degeneration Anahæmin is specially indicated; by its use the danger of permanent damage to the nervous system through inadequate treatment is avoided.
- 4 A minimum content of therapeutically inert reaction-producing protein substances is attained as a result of the special method of preparation of Anahæmin.
- 5 Anahæmin alone is sufficient to produce complete recovery in all cases of pernicious anæmia and to correct all the remediable neurological signs and symptoms of subacute combined degeneration. No additional treatment is required.

## Natural Vitamin C

### *The modern therapeutic medium*

To the physician confronted with the war-time problem of Vitamin C deficiency, the high C content of the homely and home-grown blackcurrant will be remembered long after the war is forgotten.

Fixson and Roscoe in their researches showed that blackcurrant juice contains from 136 mg. to 220 mg. per 100 gm., as compared with 22 to 89 for orange juice. Further, the blackcurrant provides other factors of the C complex, including Vitamin P.

Ribena is a bland, depectinised blackcurrant syrup in which the sugar content is largely inverted into fructose and glucose. Its acceptable flavour, no less than its attractive appearance, gives a happy combination of the physical and the psychological, so important when a Vitamin C supplement is

indicated for expectant and nursing mothers, growing children, etc. In many cases where the vitamin deficiency is accompanied by a condition of digestive impairment, Ribena Blackcurrant Syrup is generally found to be well tolerated.

Under a Government ruling Ribena Blackcurrant Syrup must be reserved for Invalids, Children, Expectant and Nursing Mothers, and for medical prescriptions.

# VIMALTOL

(VI-MALT-OL)

## A Delicious Concentrated Vitamin Food

**T**O the physician requiring a product which incorporates the important vitamins in a form entirely pleasant and acceptable to every patient, "Vimaltol" presents special advantages.

"Vimaltol" is a concentrated and economical vitamin food with a delicious orange flavour. The vitamins are supplied from specially prepared malt extract and yeast, which is one of the richest natural sources of vitamin B, together with Halibut Liver Oil fortified with additional vitamins.

"Vimaltol" is thus an important aid in preventing or remedying the many abnormal conditions resulting from the deficiency of one or more of the essential vitamins in the

average everyday dietary. The routine use of "Vimaltol" ensures normal development of the growing organism and the maintenance of correct metabolism, while raising the general resistance against infection.

It is of signal value at certain physiological periods, such as infancy, adolescence, and pregnancy, to prevent deficiency diseases and to restore normal metabolism in the many "border-line" cases arising from insufficient intake or defective assimilation of the essential food factors.

"Vimaltol" has thus a very wide application in general practice for patients of all ages. It can be prescribed with advantage at all seasons.

## Lowered Metabolism

★

THE problem of depressed metabolism is, of course, very frequently met with in general practice, particularly in the case of convalescence.

It is seldom, however, that a practitioner wishes to resort to such drastic methods of raising the metabolic rate as intravenous injection of thyroxin, or the oral administration of compounds of the nitro-phenol group. Indeed, both these measures are usually contra-indicated, owing to the fact that either is liable to involve interference with the normal mechanism of the body.

For this reason the practitioner generally prefers to prescribe certain stimulating foods such as meat extracts, soups, and home-made broths.

It is a matter of some importance, therefore, to know that one of the accepted meat preparations is outstandingly effective in raising the metabolic rate. It is Brand's Essence.

After the ingestion of Brand's Essence, there is a sharp increase of the heat output, reaching a peak at the end of half an hour, and still appreciable six hours later.

Accordingly, Brand's Essence may be prescribed with confidence for cases of lowered metabolism. It has a further advantage in that it stimulates the appetite and will be found palatable when other foods are distasteful.

## The Importance of total VITAMIN B ACTION

As a result of clinical observations of 227 cases of functional gastrointestinal malfunction it is stated (Am. J. Digest. It is further remarked that the B Complex in its natural proportions is preferred to any highly purified single component. **ALUZYME** is by far the richest natural source of the entire B Complex.

*Their medicine  
was unpleasant*

When we turn over the family photograph-album and see the heavy clothing, the sedate expressions and the immobile attitudes of our grandparents, we are not surprised that their doctors considered castor oil and calomel usual and, in fact, necessary, purgatives.

To-day, Agarol Compound, a pleasant, mildly-acting, mineral oil evacuant, has replaced the old, crude, nauseous purgatives, just as exercise and light clothing have replaced the pomp and trappings of Victorians.

# AGAROL

## for CONSTIPATION

Agarol is as useful for the relief of acute constipation as it is for the cure of chronic intestinal stasis. It contains a sufficient dose of phenolphthalein to encourage peristalsis and secure complete bowel evacuation.

(Temporary Wartime Address).

**NOTICE—Applications for vacancies advertised should, except where otherwise specified, state name, address, age, nationality, qualifications with dates, and be accompanied by copies of three recent testimonials with short statement of experience and appointments held. Unless closing date is stated applications should be sent at once.**

**HIS MAJESTY'S COLONIAL SERVICE.** The Colonial Medical Service. Vacancies for MEDICAL OFFICERS.—The maintenance of an efficient Colonial Medical Service constitutes a vital part of the national war effort, and it is most important that the Service should be assured of an adequate supply of doctors. The Secretary of State for the Colonies therefore invites applications from doctors possessing a medical qualification registrable in the United Kingdom who are British subjects and who are under 35 years of age. Medical Officers are appointed in the first instance for general service, but there are ample opportunities for work in special branches of medicine and surgery, in public health, and in medical research. The normal salary scale is from £600 to between £1,000 to £1,120. There are large numbers of super-scale posts, to which promotion is made on merit and which carry higher salaries. Government quarters, in many cases free of rent, and first-class passages to and from the Colonies, are provided, and an adequate pension scheme is in force. Selected candidates are normally required to attend a course of instruction in Tropical Medicine and Hygiene either before proceeding overseas or during their first period of leave. Further particulars, including the regulations governing admission to the Colonial Medical Service, may be obtained from the *Director of Recruitment (Colonial Service)*, 2, Park St., London, W.1

**INDIAN MEDICAL SERVICE.** Recruitment of WOMEN MEDICAL OFFICERS.—The Government of India are prepared to recruit a limited number of women medical officers for service with the Indian Medical Service for the duration of the war. Applicants must be British subjects, of not more than 45 years of age, and those selected will be appointed in the rank of Lieutenants. Antedate of seniority may be granted up to a maximum period of 64 years in respect of resident hospital appointments, higher qualifications, and/or professional experience. The antedate will count for pay and promotion, but, in the case of candidates recruited in this country, higher rank will not be assumed until the date of disembarkation in India. On termination of service, a minimum gratuity is guaranteed to those officers who complete one year of service—viz., Rs. 2,000 to officers whose registrable medical qualification is dated before January 1, 1940, and Rs. 1,000 to those who qualified after that date, plus one month's pay for each further completed year of Army service. Further particulars regarding rates of pay, etc., may be obtained from the Medical Adviser, India Office, London, S.W.1, or from the Secretary, Military Department, India Office, to whom all inquiries should be addressed.

Scientific Glassware  
resists heavy  
attacks from acid!

Ask for PYREX Brand and see that you get it!  
**James A. Jobling & Co. Ltd., Sunderland.**

(T.15.E.)

PYREX Brand Glassware is highly resistant to all acids other than hydrofluoric and glacial phosphoric. Its resistance against other mineral and organic acids, hot or cold, dilute or concentrated, is truly remarkable.

Besides being acid-proof, PYREX Brand Glassware also resists attack by hot and cold water, while alkalis have practically no effect on its surface.

PYREX Brand Scientific Glassware is supplied only through Laboratory Furnishers, but illustrated catalogue and two free copies of our Chemist's Notebook will be sent direct on application to us.

Making good  
the nervous wear and tear

Carefully washed and screened corn is ground to extreme fineness retaining its natural protein and phosphates but eliminating grit and cellulose by sifting through fine silk screens.

Following the processing of the powder in special ovens and a final blending and refining, the preparation of Jenner's Malted Food is complete.

Its fine texture makes it assimilable by weak and nervous digestions. It is consequently a valuable supplementary food for war workers as well as for nursing mothers, babies, old people and invalids.

## "THE BEST NEEDLES I HAVE EVER USED"

Many Practitioners have expressed their opinion of Vim Needles in the above words. A typical appreciation is that of a Surgeon Specialist attached to an important Colonial Government Hospital. He writes : "They are the best I have ever used. I have given instructions to the Medical Store to order them and nothing but them."

### FIRTH-BREARLEY STAINLESS STEEL HYPODERMIC NEEDLES

Medical testimony which is both written and verbal comes from practitioners in all parts of Britain and the Empire and from both private and hospital users. The manufacturers base their claims for superiority on these FIVE REASONS WHY VIM NEEDLES Supersede all others :

- ★ Made from Firth-Brearley Stainless Steel the only Stainless Steel which can be hardened and tempered to points which stay sharp and keen after scores of injections.
- ★ They outlast 3 to 5 ordinary steel needles, and therefore cost less to use.
- ★ Never rust or corrode, and do not need to be wired or even dried after cleansing.
- ★ Distinctive square hub makes for easier manipulation.
- ★ Keen, sharp, more durable points result in less painful injections for the patient.
