

SAFE and INSTANT RELIEF in ASTHMA

* SAFETY & IMMEDIACY
OF RELIEF IN ASTHMA
ARE ENSURED BY
FELSOL POWDERS

FELSOL is compounded in powder form to obviate any crushing of tablets before use. The dictum of Hale-White (Materia Medica, 18th edition) that "Tablets . . . are very popular, but are sometimes useless, for they may be so hard and insoluble that they are found in faeces quite unaltered" is too frequently overlooked.

FELSOL contains no narcotic and no morphia. It is safe for use in cardiac cases. FELSOL is absolutely non-cumulative in action.

* The powder form and special method of manufacture are the essentials of immediacy of relief with FELSOL in ASTHMA.

WARTIME GASTRIC DISORDERS

'BiSoDoL' is the result of painstaking research and extensive clinical trial.

A finely-divided powder, easily miscible with milk or water, it is especially well suited to the treatment of gastric disorders frequently resulting from a change of occupation.

Symptoms of nausea, flatulence and dyspepsia respond well to its sedative properties. Incorporation of the enzymes, papain and diastase, ensures completion of the digestive processes.

Mag. Carb. Levis., in addition to exerting an antacid action, is effective in counteracting any tendency to constipation.

Home Front

For those who make the weapons, as for the men who use them, good general health is essential to maximal effort and optimal efficiency. The common cold, so widespread and therefore liable to be accepted as a matter of course, is probably responsible for the loss of more working hours than any other single condition. For aborting colds or curtailing their course, the Karsodrine Inhaler has proved to be signally effective. The volatile vasocon-

strictor contained, rapidly decongests the swollen and inflamed mucosa, restoring potency to the air passages, facilitating discharge of secretions, and bringing prompt symptomatic relief to the patient. The incidence of unpleasant and disabling complications, such as sinusitis, is notably reduced, and return to full working efficiency accelerated. Compact, safe, and particularly convenient in use—there is only one cap to remove—the Karsodrine Inhaler greatly commends itself to patients.

Free Clinical Samples. Free Samples of the Karsodrine Inhaler for surgery use will gladly be sent to any member of the medical profession. Please address your request to: Karsodrine Clinical Department, E. Griffiths Hughes, Ltd., 1, Adelphi, Salford, 3, Manchester.

Problem

How to obtain rapid ulcer healing?

Answer

'ALUDROX'

Clinical evidence shows that when 'Aludrox,' diet and rest are prescribed rapid healing of Peptic Ulcer results.

Four important features of 'Aludrox' are:—

- Prompt relief from pain.
- Rapid healing of ulcer.
- Cannot be absorbed and eliminates the risk of alkalosis.
- Reduces excess acidity without completely neutralising the gastric contents.

The Natural aid to *Nutrition*

WHEN the general nutrition of the body is below normal as a result of dietary errors or of debilitating diseases, the use of 'Ovaltine' is of greater and more lasting value than that of chemical stimulants. It adequately reinforces and renders safe the ordinary dietary; is a powerful source of energy and assists tissue regeneration.

A considerable measure of the value of 'Ovaltine' as a highly satisfactory accessory food and aid to nutrition, is due to its constituents—milk, eggs and malt extract. Noteworthy features are its high percentage of readily assimilable calcium, phosphorus and iron. 'Ovaltine' is not only highly nutritious, but really delightful to the taste and particularly easy of digestion.

Samples of 'Calfos' Tablets will gladly be sent to any interested physician.

★ *"Calcium is an essential constituent of the diet, and the need for it continues throughout life. This is most imperative in the period of growth and adolescence, in pregnancy and lactation, but is none the less imperative in adult life and old age. (Brit. Med. Jour. 1:281, 1941).*

A great amount of ill-health and poor physique is due to insufficient intake of calcium and phosphorus; much of this could be prevented by the administration of 'Calfos.' 'Calfos' is derived from the natural mineral constituents of bone, and presents calcium and phosphorus in the most assimilable form and in the correct physiological ratio. Its use ensures the retention of these two essential minerals in the body in adequate amounts to replace natural losses. It marks an advance in nutritional therapy of outstanding importance to all who suffer from calcium and phosphorus deficiency.

Shaped to follow the curve of the abdomen . . .

HENCE, NO SLIPPING

Salts' Belt for Umbilical Hernia is shaped to follow the curve of the abdomen, thus completely obviating the difficulty, often present with an umbilical truss, of the appliance slipping downwards. With this Belt the pad is definitely retained in position under all circumstances. In exceptional cases, where the measurements are large and the hernia is irreducible, a concave blocked leather pad, let in the front of the belt, has proved highly successful. Support of Ventral Hernia can also be given, by incorporating a stiff-backed pad of requisite size. Salts' Corset and Belt Book makes it a simple matter to order.

THE MOST EFFICIENT WOUND ANTISEPTIC

2:7-Diaminoacridine combines a very high antiseptic action with minimum effect upon the tissues of the host. It is thus the nearest approach to the ideal antiseptic.

This new compound has significantly less effect upon the tissues than the other aminoacridine antiseptics and thus does not interfere with wound healing. It inhibits growth of all organisms commonly associated with wound infection and particularly it is effective against *Ps. pyocyanea*. It is penetrative and retains activity in the presence of tissue fluids.

GOLD CYCLE

Gold was first used (by primitive peoples who knew no better) for its intrinsic value as a metal in the fashioning of weapons and domestic utensils. Iron and copper proved superior for these purposes and gold then became a mere ornament and later still a standard of currency—and an alternative to work. Lease-lend has almost completed the process of rendering gold redundant. The full cycle has almost turned to the utilitarian application of gold (by civilised people who now know better), a notable example being the administration of gold salts in the treatment of rheumatoid arthritis.

'Myocrisin' brand sodium aurothiomalate has a definite place in the relief of the crippling symptoms of rheumatoid arthritis. Our Medical Information Department will be glad to supply you, on request, with a comprehensive booklet describing its use in this condition.

The Parasympathetic System

'Prostigmin' is used in any condition in which it is desired to stimulate the parasympathetic nervous system or to damp down the effects resulting from over-stimulation of the sympathetic. It has therefore an exceedingly wide range of therapeutic usefulness.

Experience has shown 'Prostigmin' to be singularly free from the unwanted side-reactions such as flushes, sweating, increased salivation and lacrimation, and a fall in blood pressure which is apt to be caused by acetylcholine analogues (*B.M.J.*, October 10, 1942).

'PROSTIGMIN'

PARASYMPATHETIC STIMULANT

The main indications for its use by mouth or injection include:

SURGICAL

The prevention and treatment of paralytic ileus, post-operative distention.

Acute dilatation of the stomach.

Post-operative retention of urine.

Expulsion of ureteral calculi.

MEDICAL

Neuromuscular disorders, e.g., myasthenia gravis.

Severe constipation, megacolon and flatulence.

Peripheral vascular diseases.

Paroxysmal tachycardia.

Atrophic rhinitis, etc.

In the diagnosis of early pregnancy and the treatment of delayed menstruation 'Prostigmin' can be safely and conveniently used and gives reliable results.

COMMON COLD & ANTI-CATARRH VACCINE No. 3 (EVANS)

Immunisation with Common Cold and Anti-Catarrh Vaccine No. 3 (Evans) is advised as a prophylactic against winter colds. There is no doubt that secondary infection by these organisms aggravates the condition and is responsible for the complications.

VITAMIN THERAPY

Infant Welfare begins during Pregnancy!

Present day obstetrical investigation stresses the profound influence of the nutrition of the pregnant woman on the morbidity and mortality rate during

the early months of infantile life. Most of the recognised vitamins are known to be necessary to the foetus, which depends entirely on the mother for its supply.

REQUIREMENTS OF THE FOETUS

It has been shown that during the first half of pregnancy, vitamin A is stored in the foetal liver against the time when growth becomes more rapid. Deficiency of the vitamin B complex may result in abortion or premature delivery. The demand for vitamin C becomes increasingly insistent during the last few months of gestation and, if hypovitaminosis C is sufficiently pro-

nounced, it may cause intra-uterine death of the foetus, death shortly after birth, or reduced resistance to infections. There are also numerous examples of the fundamental importance of vitamin C to the development of the bones and teeth. During the last month of pregnancy calcium is required by the foetus in approximately 16 times the amount present in the maternal blood at any one time.

PREGNAVITE—A CONVENIENT SUPPLEMENT

Nutrition during pregnancy can be maintained at the optimal level to achieve a safe gestation and a healthy start in life for the infant, by the use of Pregnavite Tablets. The first preparation to contain vitamins and mineral salts in correct amounts and proportions to meet the requirements of pregnancy, Pregnavite is also the most convenient and economical means of supple-

menting the diet both of the pregnant and nursing mother.

PREGNAVITE in recommended doses supplies, at time of manufacture, approximately:—

Vitamin A	4,000 i.u.	Calcium	350 mg.
Vitamin B ₁	200 i.u.	Phosphorus	550 mg.
Vitamin C	400 i.u.		
Vitamin D	300 i.u.	Available Iron	12 mg.

'Synapoidin'

Combined Anterior Pituitary and Chorionic Gonadotrophins

"Synapoidin" is a balanced combination of the follicle-stimulating principle from the anterior lobe of the pituitary gland and the luteinizing hormone obtained from pregnancy urine. These combined gonadotrophins, when administered in proper doses to sexually immature animals, induce precocious maturation and the onset of functional activity of the gonads, indistinguishable from that occurring during normal sexual development.

Although it has not been demonstrated that "Synapoidin" exerts the gonad-stimulating activity in the human subject in the same qualitative and quantitative manner as in laboratory animals, its clinical effectiveness has been found satisfactory by a number of investigators. "Synapoidin" appears to be a particularly useful agent for the stimulation of ovarian activity in women with functional menstrual disorders and sterility resulting from deficiency of pituitary gonadotrophins.

NOTICE—Applications for vacancies advertised should, except where otherwise specified, state name, address, age, nationality, qualifications with dates, and be accompanied by copies of three recent testimonials with short statement of experience and appointments held. Unless closing date is stated applications should be sent at once.

HIS MAJESTY'S COLONIAL SERVICE. The Colonial Medical Service. Vacancies for Medical Officers.—The maintenance of an efficient Colonial Medical Service constitutes a vital part of the national war effort, and it is most important that the Service should be assured of an adequate supply of doctors. The Secretary of State for the Colonies therefore invites applications from doctors possessing a medical qualification registrable in the United Kingdom who are British subjects and who are under 35 years of age. Medical Officers are appointed in the first instance for general service, but there are ample opportunities for work in special branches of medicine and surgery, in public health, and in medical research. The normal salary scale is from £600 to between £1,000 to £1,120. There are large numbers of super-scale posts, to which promotion is made on merit and which carry higher salaries. Government quarters, in many cases free of rent, and first-class passages to and from the Colonies, are provided, and an adequate pension scheme is in force. Selected candidates are normally required to attend a course of instruction in Tropical Medicine and Hygiene either before proceeding overseas or during their first period of leave. Further particulars, including the regulations governing admission to the Colonial Medical Service, may be obtained from the *Director of Recruitment (Colonial Service)*, 2, Park Street, London, W.1.

ST. ANDREW'S HOSPITAL, NORTHAMPTON

For Nervous and Mental Disorders

President: THE MOST HON. THE MARQUESS OF EXETER, K.G., C.M.G., A.D.C. *Medical Supt.:* THOMAS TENNENT, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble; temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological, and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

WANTAGE HOUSE—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; in-patient treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Vichy Douche, Scotch Douche, Electrical baths, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, and fruit-growing.

BRYN-Y-NEUADD HALL—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The Hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own garden, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the MEDICAL SUPERINTENDENT (Telephone Nos. 2356 and 2357 Northampton), who can be seen in London by appointment.

WOMEN'S WAR WORK AND ITS REACTIONS

War demands have led thousands of women to undertake many of the tasks normally expected only of men. Such work often entails long hours and unaccustomed manual work with ensuing muscular pains, backache and headache.

This applies particularly to those subject to dysmenorrhoea and those approaching middle age and the climacteric.

Veganin gives most satisfactory results in such conditions since it is a synergistic association of codeine, acetylsalicylic acid and phenacetin, producing rapid and prolonged relief without ill effects.

RESTRICTED SUPPLIES

Owing to the shortage of certain ingredients and the consequent limitation of output, chemists have been asked to give priority to doctors' prescriptions. Veganin is not advertised to the public.
