in preventive medicine

Diet plays a highly important role in preventive medicine. The B vitamins are known to be essential components of a sound diet, and these factors are contained in Marmite.

Marmite also provides useful anti-anaemic constituents; it is an autolysed yeast extract prescribed extensively as a prophylactic agent.

WARTIME GASTRIC DISORDERS

'BiSoDoL' is the result of painstaking research and extensive clinical trial.

A finely-divided powder, easily miscible with milk or water, it is especially well suited to the treatment of gastric disorders frequently resulting from a change of occupation.

Symptoms of nausea, flatulence and dyspepsia respond well to its sedative properties. Incorporation of the enzymes, papain and diastase, ensures completion of the digestive processes.

Mag. Carb. Levis., in addition to exerting an antacid action, is effective in counteracting any tendency to constipation.

SULPHAGUANIDINE - BOOTS

The value of sulphaguanidine in the treatment of bacillary dysentery is now established, and clinical results show that it is also a valuable adjunct in the control of the spread of bacillary dysentery both in civilian life and in the armed forces. Henderson (*Brit. med. J.*, 1943, 1, 410) reports remarkable results by the use of sulphaguanidine in the treatment of neonatal epidemic gastro-enteritis; the mortality rate falling from 69 per cent. to 10 per cent. following the introduction of sulphaguanidine therapy.

DILAUDID

Brand

dihydromorphinone

Improved Morphine Preparation

Whilst the analgesic power of "Dilaudid" is five times as great as morphine its hypnotic effect is considerably weaker. In the derivative, the euphoric element is largely subdued and the risk of addiction correspondingly lowered. Tolerance is greatly improved, an increase of dosage rarely necessary. The effect on peristalsis is only slight and much less persistent than in the case of morphine.

DICODID

Brand

dihydrocodeinone

Powerful Antitussive

Occupying a place midway between morphine and codeine, "Dicodid" exerts a specific and selective action on the cough centre. The absence of any notable constipating effect is responsible for the use of "Dicodid" as a post-operative analgesic. Better tolerated than morphine, "Dicodid" also interferes very much less with expectoration.

Available in the form of oral tablets, ampoules, hypodermic tablets, and suppositories.

THE MOST EFFICIENT WOUND ANTISEPTIC

2:7-Diaminoacridine combines a very high antiseptic action with minimum effect upon the tissues of the host. It is thus the nearest approach to the ideal antiseptic.

This new compound has significantly less effect upon the tissues than the other aminoacridine antiseptics and thus does not interfere with wound healing. It inhibits growth of all organisms commonly associated with wound infection and particularly it is effective against *Ps. pyocyanea*. It is penetrative and retains activity in the presence of tissue fluids.

VITAMIN THERAPY IN THE DENTAL CARE OF CHILDREN

It would seem reasonable to assume that, as the successful formation of the bony structure of the foetus depends upon maternal health and nutrition, so the development and soundness of the teeth depend upon the well-being and diet of mother and child.

In support of this belief in the importance of diet

may be quoted, amongst other findings, the results of an investigation in the Island of Lewis in the Outer Hebrides, where 28 per cent. of the country children were found to be entirely free from caries, compared with 1.9 per cent. of children in London, and "all the positive indications support the view that only differences in diet can explain the facts."

RECTIFYING NUTRITIONAL INTAKE

The old belief that external treatment and regular brushing were all that could be done to safeguard dental health is logically taking second place to the prophylactic conception of developing and sustaining the living structure of the teeth, through the medium of a diet adequate as regards the various vitamins and mineral salts. Where dietary deficiency is suspected as a contributory factor to the onset of caries, or to late development of the teeth, a multiple supplement is indicated, since malnutrition is seldom of a simple pattern and since several of the known vitamins play a part in the maintenance of healthy teeth and gums.

Complevite has been specially designed for the treatment of multiple dietary deficiency. It provides, in tablet form, Vitamins A, B₁, C and D with calcium, iron and phosphorus in such amounts as will compensate for actual known deficiencies shown by average diets to-day.

Brimstone and Bribery *are things of the past*

It is no longer necessary to bribe Bobby or Betty of the average family with the offer of pennies when he or she needs an aid to relieve the constipation which frequently occurs in children. Agarol is an ideal evacuant in childhood.

'Oxylan' brand Diphenan (*p*-benzylphenyl carbamate) is an anthelmintic of proved efficiency in oxyuriasis. It is not merely a vermifuge, but it also exerts a direct toxic action against the parasites, preventing them from depositing ova in the anal folds, and thus minimising the possibility of reinfection.

'Oxylan' brand Diphenan is well tolerated by both children and adults, and is free from undesirable side effects.

The usual course for adults and children over ten years is one to two products three times a day for one week, with aperients. In persistent cases it may be repeated after seven to ten days. Proportionately smaller doses may be given to children under ten.

PROPAMIDINE JELLY and CREAM

for the prevention and treatment of sepsis

PROPAMIDINE is one of the aromatic diamidines, a series of compounds synthesised in our Research Laboratories. Studied originally for their anti-protozoal action they were found to possess anti-bacterial properties which are not inhibited by pus and tissue fluids or para-aminobenzoic acid. The amidines are active against sulphonamide-resistant strains of beta-haemolytic streptococci. For topical application in the treatment of infection propamidine possesses therefore advantages over the sulphonamides of the same nature as are shown by penicillin.

Two preparations of propamidine are now freely available commercially, a jelly and a cream. The first is used for established sepsis in wounds and burns as in the presence of sloughing or rough granulations, more intimate contact of the drug with the infected area is secured. For other purposes the cream is employed and provides a valuable "first aid" application for burns.

A pamphlet on these products is available on request. Propamidine jelly and cream are supplied as follows:

PROPAMIDINE JELLY Jars of 4-ozs. 4s. 0d. Jars of 16-ozs. 15s. 0d.

Economy in Disinfectants

USE OF HYPOCHLORITES RECOMMENDED

In a statement on economy in the use of certain types of disinfectants in short supply the Therapeutic Requirements Committee of the Medical Research Council emphasised the necessity of selecting "those materials which are most readily available." Among the substances recommended to replace those in short supply for special purposes are "hypochlorites."

Milton, the Hypochlorite Antiseptic, has been recommended in recent medical and pharmaceutical literature or in statements by authoritative bodies for many uses including the following:—

As an antiseptic and therapeutic agent

In the Envelope Irrigation treatment of wounds, burns and ulcers.

Treatment of simple boils, carbuncles, whitlows and any septic wounds.

Treatment of mustard gas burns.

As a general sterilising agent

For the sterilisation of the new standard Jaconet, Battiste and Artificial Silk Waterproof Dressings.

For the sterilisation of non-metallic sick-room utensils and instruments.

For the emergency sterilisation of water.

For the disinfection of air in operating theatres, hospital wards, air-raid shelters, offices, etc.

Details of references and information with regard to these and other uses of Milton may be obtained from the Medical Dept., Milton Antiseptic Ltd., John Milton House, London, N.7.

MILTON THE STANDARD HYPOCHLORITE

Milton is the stable brand of electrolytic sodium hypochlorite, standard strength (1%) and low alkalinity

THE THERAPY OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the *underlying cause* is not discoverable or changes from time to time—now irritant dusts, now bacterial infection, etc. The *underlying factor* is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.

★ "WHAT DID YOU THINK THEN?"

asked a friend of Professor Röntgen when he heard of the puzzling phenomena which led Röntgen to investigate X-rays. "I didn't think—I experimented," he replied. He certainly opened an extensive field of enquiry. In the perfecting of X-ray film alone the volume of research has been considerable.

Ensign X-ray films incorporate all the most recent improvements in X-ray emulsions, and radiographs on Ensign X-ray films exhibit the qualities of definition, clarity and contrast in the highest attainable degree with modern technique and processing.

The range of films available includes Ensign Super Speed (Standard) X-ray film, Ensign Rados X-ray film, and also the new Ensign Cresta X-ray film which allows the TIME OF EXPOSURE TO BE REDUCED BY APPROXIMATELY ONE HALF or the kV employed to be materially reduced, as compared with Standard X-ray film, with no loss whatever of definition, clarity and contrast. Cresta is designed for use with intensifying screens, and can be relied upon to produce radiographs of the greatest diagnostic value with minimum exposures. If occasion requires, Cresta can also be used for direct radiography. The introduction of this new Ensign Cresta X-ray film, at a time when it is necessary to prolong the life of tubes, will be widely welcomed by radiologists.

AN INVITATION—The services of the Ensign technical department are available to deal with enquiries regarding the new Ensign "Cresta" X-ray film and other Ensign X-ray films. Radiologists are invited to communicate with Austin Edwards, Ltd., Ensign Film Works, Warwick (Manufacturers of X-ray film for 30 years.)

INDIAN MEDICAL SERVICE. Recruitment of Women Medical Officers.—The Government of India are prepared to recruit a limited number of women medical officers for service with the Indian Medical Service for the duration of the war. Applicants must be British subjects, of not more than 45 years of age, and those selected will be appointed in the rank of Lieutenants. Antedate of seniority may be granted up to a maximum period of 6½ years in respect of resident hospital appointments, higher qualifications, and/or professional experience. The antedate will count for pay and promotion, but, in the case of candidates recruited in this country, higher rank will not be assumed until the date of disembarkation in India. On termination of service, a minimum gratuity is guaranteed to those officers who complete one year of service, viz., Rs. 2,000 to officers whose registrable medical qualification is dated before January 1, 1940, and Rs. 1,000 to those who qualified after that date, plus one month's pay for each further completed year of Army Service. Further particulars regarding rates of pay, etc., may be obtained from the Medical Adviser, India Office, London, S.W.1, or from the Secretary, Military Department, India Office, to whom all inquiries should be addressed.

ST. ANDREW'S HOSPITAL, NORTHAMPTON) For Nervous and Mental Disorders

President: THE MOST HON. THE MARQUESS OF EXETER, K.G., C.M.G., A.D.C. **Medical Supt.:** THOMAS TENNENT, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble; temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological, and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

WANTAGE HOUSE—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Vichy Douche, Scotch Douche, Electrical baths, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, and fruit-growing.

BRYN-Y-NEUADD HALL—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The Hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own garden, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the MEDICAL SUPERINTENDENT (Telephone Nos. 2356 and 2357 Northampton), who can be seen in London by appointment.

SUBLINGUAL ADMINISTRATION of the SEX HORMONES

...in the form of
LINGUETS
REGD. TRADE MARK

Clinical investigation* has shown that absorption by the rich capillary network under the tongue is more effective than from the intestinal tract since the hormone is destroyed neither by intestinal ferments nor, as it enters directly into the systemic circulation, by the liver before it can exert its effect.

★Brit. Med. J., 1942, 1, 668.
J. Clin. Endocrin., 1942, 2, 639

The Ciba sex hormones for oral administration are, therefore, now being put up in the form of LINGUETS for sublingual use. LINGUETS are sucked under the tongue and take about ten minutes to disappear. As little saliva as possible should be swallowed.

PERANDREN LINGUETS

contain the orally active derivative of the male sex hormone, methyl testosterone, and may be prescribed in all conditions in which Perandren is indicated in moderately low dosage.

(Bottles of 20 and 100 each containing 5 mg.)

LUTOCYCLIN LINGUETS

have replaced the original Oral Tablets and contain anhydro-hydroxy-progesterone (ethisterone), a modification of progesterone with marked oral progestational activity. Indications, dosage, packages and prices remain as for the original form.

(Bottles of 10 and 50 each containing 5 mg.)

OVOCYCLIN LINGUETS

The orally active form of the oestrogenic hormone, oestradiol, will in future be prepared as Linguets in place of Tablets. OVOCYCLIN LINGUETS 0.04 mg. and 0.1 mg. have, therefore, now replaced the original Tablets of the same strengths. As and when conditions allow, the remaining strength will be issued as LINGUETS. Indications, dosage and prices remain as previously.

The packages are as follows:—

LINGUETS

Bottles of 50 each containing 0.04 mg.
Bottles of 30 each containing 0.1 mg.

TABLETS

Bottles of 25 each
containing 1 mg.

Origin of a 'household word'

WRIGHT'S LIQUOR CARBONIS DETERGENS

By the preparation of Liquor Carbonis Detergens 80 years ago, the powerful antiseptic and antipruritic agents in Coal Tar were isolated for the first time from the residuary content of irritants and non-therapeutic substances. Publicly commended by an impressive succession of notable authorities, Liquor Carbonis Detergens soon provided the basis for a toilet soap that has been a household word for generations. Discouraging germs, Wright's Coal Tar Soap produces a generous lather, specially soothing and very thorough in its cleansing.
