

THERAPY OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the *underlying cause* is not discoverable or changes from time to time—now irritant dusts, now bacterial infection, etc. The *underlying factor* is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.

This year advertisers have been asked to help make people more aware of the need to look after their health. Naturally, as producers of fine quality cod liver oil, we have always endeavoured to do this.

Last winter we backed up the Ministry of Food's distribution scheme for expectant mothers and infants. Now that this excellent scheme is more widely known and good supplies are assured, we are using our advertising to encourage adults also to take SevenSeaS as a regular diet supplement.

We hope our endeavours will result in some lightening of the load on medical and health services.

A SPENCER SUPPORT PROVIDES A SUBSTITUTE ABDOMINAL WALL FOR TREATMENT OF VENTRAL AND UMBILICAL HERNIA

At left: Photograph of a woman with inoperable hernia, weight seventy-five pounds.

At right: Photograph of same woman with hernia effectively controlled by Spencer Hernia Belt, which is economical, efficient, and comfortable.

It is especially important in the case of hernia that the support fits perfectly, and that it affords the greatest degree of comfort. Only a support which is individually designed for the patient will meet these specific requirements. A Spencer Support will stay securely in place whether the patient is standing, moving, or in a sitting position—and the weight of the support will be borne entirely by the pelvic girdle, not by the spine at, or above, the lumbar region.

The Spencer Hernia Support is remarkably strong and well made, is flexible, easily laundered, and is guaranteed to hold its exact shape up to the day it is discarded. (Any support that yields under strain or stretches out of shape loses its effectiveness.)

Economy in Disinfectants

USE OF HYPOCHLORITES RECOMMENDED

In a statement on economy in the use of certain types of disinfectants in short supply the Therapeutic Requirements Committee of the Medical Research Council emphasised the necessity of selecting "those materials which are most readily available." Among the substances recommended to replace those in short supply for special purposes are "hypochlorites."

Milton, the Hypochlorite Antiseptic, has been recommended in recent medical and pharmaceutical literature or in statements by authoritative bodies for many uses including the following :—

As an antiseptic and therapeutic agent

In the Envelope Irrigation treatment of wounds, burns and ulcers.

Treatment of simple boils, carbuncles, whitlows and any septic wounds.

Treatment of mustard gas burns.

As a general sterilising agent

For the sterilisation of the new standard Jaconet, Battiste and Artificial Silk Waterproof Dressings.

For the sterilisation of non-metallic sick-room utensils and instruments.

For the emergency sterilisation of water.

For the disinfection of air in operating theatres, hospital wards, air-raid shelters, offices, etc.

Details of references and information with regard to these and other uses of Milton may be obtained from the Medical Dept., Milton Antiseptic Ltd., John Milton House, London, N.7.

A VERY FINE 'CRUDE' LIVER EXTRACT

● There are certain cases of resistant pernicious anaemia and of other types of macrocytic anaemia that require, in addition to the anti-anaemic factor, other "liver factors" of the vitamin B group. This combination of factors is also essential in macrocytic anaemias of obscure etiology.

'Plexan' contains the combination of factors—the anti-anaemic factor and the

B vitamins of the liver—essential for these anaemias, such as tropical macrocytic anaemia and macrocytic anaemia in sprue and coeliac disease.

Consistent potency and lack of toxicity are checked by clinical and biological tests.

In classical uncomplicated pernicious anaemias, 'Examen'—the highly refined and concentrated liver extract—remains the preparation of choice for efficiency and infrequency of injection.

ENERGY IN RESERVE

'SUPAVITE' is indicated in the treatment of NERVOUS INSTABILITY, LASSITUDE, loss of MENTAL AND PHYSICAL ENERGY and SEX POTENTIAL, and all asthenic conditions arising from a deficiency of vitamins and mineral constituents necessary to health.

'Supavite' provides the practitioner with an effective and convenient remedy for vitamin deficiency. 'Supavite' is a pharmacologically active combination of the six vitamins A, B₁, B₂(G), C, D and E in a scientifically balanced form, plus iron, calcium and phosphorus. The specific action of 'Supavite' is the restoration and maintenance of vigorous health and the building up of a reserve of energy. In convalescence, debility and anæmia and in cases where asthenic patients show a tardy response to medication, 'Supavite' will prove a valuable source of mental and physical vitality and strength.

SOLUBLE PHENYTOIN

A preparation of soluble phenytoin supplied as a sugar-coated tablet for the treatment of epilepsy.

Eptoin Tablets are free from the narcotic effects usually associated with bromides and barbiturates and greatly decrease the number of convulsive seizures in cases which have not responded satisfactorily to other forms of treatment.

If a patient has already been treated with barbiturates or bromides, these drugs should be withdrawn slowly as their sudden cessation before a reservoir of soluble phenytoin has been built up may precipitate attacks.

The average daily dose is one 0.1 gm. ($1\frac{1}{2}$ grains) Eptoin Tablet during or just after meals three times a day.

Depend upon it...

Welfare and sick-room experience amply demonstrates the fundamental importance of regularity of bowel evacuation particularly for children during their growth and development. In this connection the choice of a laxative is obviously of first importance.

•
'California Syrup of Figs' offers marked advantages over the harsher mineral and synthetic drugs. Skillfully prepared from selected sennas, it effects thorough evacuation without griping or discomfort. Moreover it has no exhausting effect on the alimentary system and is completely safe and dependable in action.

•
'California Syrup of Figs' may confidently be recommended as the routine laxative for children of all ages. Being pleasantly flavoured it is accepted readily by the most fastidious patient.

NICOTINIC MEDICATION

The clinician treating different cases may need a variety of routes for the administration of the underlying principle of *nicotinic acid therapy*. True pellagra may be rare, but there are abundant indications of the value of nicotinic therapy in cases of deficiency, Vincent's infection, muscular atony, etc. *Genatosan Ltd. offer the following preparations:—*

NICOTINIC AMIDE

TABLETS Containing 25 and 50 mg. of nicotinamide. In some cases the dilation of the peripheral circulatory system caused by nicotinic acid is undesirable; the use of nicotinamide largely obviates this. 'R_x. Nicotinamide Tabs., *Genatosan* 50 mg.' will ensure your patients getting this preparation. Pure NICOTINIC ACID and NICOTINAMIDE are available in 10 gm., 100 gm. and 500 gm. packages for experimental and prescription services.

NICOTINIC ACID

TABLETS 25 and 50 mg. each for direct oral administration. In tubes or bottles of 25, 100 and 1,000.

LOZENGES Pleasant pineapple flavoured and sweetened lozenges for dissolving slowly in the mouth during the treatment of Vincent's infection. Each lozenge contains 50 mg. pure nicotinic acid. In packages of 25, 100 and 1,000.

ELIXIR A pleasant and palatable liquid preparation, containing 30 mg. of nicotinic acid per drachm, for the use of clinicians who prefer to prescribe a fluid. 'R_x. Elix. Nicotinic Acid, *Genatosan*' will ensure your patients getting this preparation.

INJECTIONS Solutions of the sodium salt of nicotinic acid are available for administration parenterally. Each ampoule contains 100 mg. of nicotinic acid (as the sodium salt) in 10 c.c. sterile pyrogen-free water. In boxes of six and twelve ampoules.

REGULATION...

Regulation of the daily programme, especially diet and exercise is beneficial to normal bowel movement and in some cases of constipation serves as sufficient treatment. Others require additional aid to facilitate regular evacuation. When an adjunct to diet and exercise is required, as it often is, 'Petrolagar' provides a mild but effective treatment. Its miscible properties make it easier to take and more effective than plain mineral oil. Further, by softening the faeces, 'Petrolagar' induces large, well-formed stools, which are easy to evacuate.

Palatable Refreshing & EFFECTIVE

Vigorous purgation by harsh agents is not needed for normal occasions. All that is required is a pure, palatable, refreshing and healthy aperient beverage such as ENO'S 'Fruit Salt.' Its laxative action depends only on reinforcing the natural process of osmotic diffusion. ENO'S does not irritate the intestinal nerve-endings; nor does it cause any disintegration of the delicate mucus. The regular, complete evacuation encouraged by ENO'S is due simply to the retention of sufficient bulk within the alimentary canal to stimulate peristaltic action.
