

## Sleep, too, is rationed ..

There is often a shortage of sleep-hours for those working under the stress of war conditions . . Up at all hours . . Extra late shifts . .

Here is a way to make the limited sleep ration go further. Drink a cup of Bourn-vita before putting out the light. It contains malt, milk, eggs and chocolate and its Vitamin B, phosphorus and calcium are valuable for the nerves.

Bourn-vita brings healthy, *natural* sleep. It is light and easily digestible—as good for you as it is for your convalescent patients.

**FOR DEEP, RESTORING SLEEP**

## ENO'S "FRUIT SALT" for use with sulphonamides

SINCE it is still regarded as the safer practice during sulphonamide medication to prohibit strong purges and sulphur-containing foods, etc., ENO'S "Fruit Salt" remains the aperient of choice. It contains no sulphates and leads to no risk of systemic dehydration. ENO'S is partially absorbed into the system and increases the alkalinity of the body fluids. In this way it tends to promote the therapeutic efficacy of the sulphonamide treatment.

ENO'S "Fruit Salt" is prepared by a special process and contains approximately: Sod. Bicarb. 53.25%, Acid. Tart. 43.50%, Sod. Bitart. 1.50%, Sod. Tart. 1.75%.

## 'SOLVOCHIN'

**25% AQUEOUS SOLUTION OF QUININE**

for

**painless intramuscular (intragluteal) injection**

Isotonic (pH—7.2)

SOLVOCHIN has been introduced for the treatment of malaria. Its parenteral administration is simple and free from complications. The preparation is painless and does not call for prolonged massage of the site of injection. It is economical, and when combined with mepacrine two daily injections for four days are generally sufficient.

Further particulars will be supplied on request.
