

THE THERAPY OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the underlying cause is not discoverable or changes from time to time—now irritant dusts, now bacterial infection, etc. The underlying factor is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.

NO MORPHIA—NO NARCOTICS

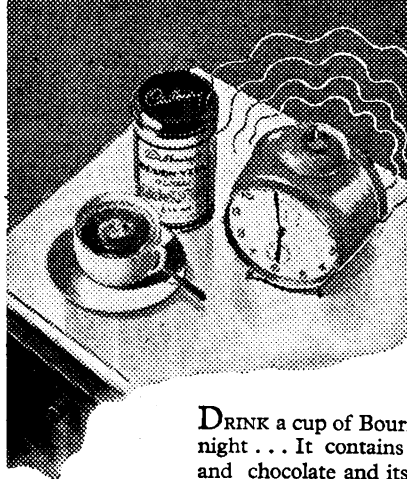

Physicians' samples and literature willingly sent on request.

They suffer alarm-clocks gladly

who have
natural
restful
sleep

DRINK a cup of Bourn-vita last thing at night... It contains malt, milk, eggs and chocolate and its Vitamin B, phosphorus and calcium are valuable for the nerves. It induces healthy, *natural* sleep. (It is light and easily digestible too, and a perfect nightcap for convalescents.) Good sleep is an important commodity in these days of war-strain. This is a simple way to get the most out of it,
