"There is a time for every purpose," and Nature has appointed the hours of night as the time for rest and recuperation. Making these hours coincide with the taking of an evacuant has sound psychologic as well as therapeutic justification if the medication does not interfere with the salutary effect of unbroken sleep. In the case of Agarol, the patient is hardly conscious of having taken an evacuant. There is no unpleasant after-taste, no griping; and there need be no fear of an untoward premature result, for Agarol acts with almost clock-like regularity, allowing eight hours from the time of taking to the time of evacuation. Agarol is a mineral oil emulsion with a small dose of phenolphthalein.

COMPOSITION: Mineral Oil, Glycerine and Phenolphthalein: a perfectly homogenized emulsion.
