

## Why **ANDREWS** is the Ideal Form of Laxative

Andrews is a pleasant tasting, effervescent aperient with tonic properties, and is a valuable aid to Inner Cleanliness.

Andrews is beneficial in most digestive disorders, feverish conditions, the ailments of children, and in pregnancy and lactation.

Andrews justifies the description of "The Ideal Form of Laxative" because:—

**FIRST** . . Patients like taking Andrews. It is pleasant-tasting. Its brisk effervescence is immediately refreshing and stimulating. It sweetens the mouth and helps to clean the tongue.

**NEXT** . . Andrews allays gastric discomfort, heartburn and nausea by diminishing the stomach's acidity and relieving flatulence.

**THEN** . . Andrews increases bile flow, relieves hepatic congestion and improves digestion. It is partly absorbed from the intestine as alkali, and therefore helps to correct acidity in the blood and to stimulate kidney function.

**FINALLY** . . Acting by osmosis, Andrews clears the bowels gently yet entirely without irritation.

### Approx. active constituents:

## THE THERAPY OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the underlying cause is not discoverable or changes from time to time—now Irritant dusts, now bacterial infection, etc. The underlying factor is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.
