

To Maintain proper Nutrition During and After Pregnancy

THE results of modern ante-natal care have emphasized the importance of proper nutrition of the expectant mother, in securing a normal pregnancy, labour and puerperium, and in endowing the infant with an initially sound constitution.

The use of 'Ovaltine' throughout pregnancy goes far towards ensuring this ideal state of nutrition. 'Ovaltine' is a natural food tonic prepared from milk, eggs and malt extract with a cocoa flavouring. 'Ovaltine' is delightful to the taste and is so readily digestible that unsettled digestion does not preclude its use.

During lactation its use enriches the milk and permits the mother to continue adequate feeding until the normal time for weaning occurs.
