A Development in Salicylate Therapy

'ALASIL' presents the beneficial therapeutic effects of acetylsalicylic acid in such a form that it is readily acceptable even to patients with finely balanced digestive systems. This high tolerability is due to the fact that 'Alasil' combines acetylsalicylic acid with Dibasic Calcium Phosphate and 'Alocol' (Colloidal Aluminium Hydroxide), an effective gastric sedative and antacid.

For this reason 'Alasil' can be administered with confidence in all the conditions in which such an agent is indicated, while its use affords the advantage of greater freedom from the possibility of unpleasant gastro-intestinal sequelae.

'Alasil' is, therefore, an analgesic, antipyretic and antirheumatic which can be prescribed for patients of all ages. Moreover, it is so well tolerated that its use can be continued to the desired extent.

BISMUTH
INJECTION

FOR THE
TREATMENT
OF
ARTHRITIS

It has been reported recently,* from a series of cases, that this preparation is of great value in Rheumatoid Arthritis. When injected in this form, it is stated that Bismuth is less toxic than Gold. Appropriate physical methods, such as actinotherapy, can be combined with "S.B.T." with advantage.
