

National HEALTH SERVICE

As a result of the new Act that came into force on the 5th July the general practitioner will be confronted with the problem of filing National Health Service envelopes. In many cases the numbers involved will approach the statutory limit, yet these large collections must be kept in such wise that any envelope is readily available. Roneo have received many requests for a solution to this problem and they have designed a new card filing tray specially for these envelopes. It is soundly constructed of light alloy, compact and easy to handle. Supplies will be available very shortly and enquiries are welcomed.

A new approach to the relief of pain

TETRAETHYLAMMONIUM salts were found in 1945 to block the transmission of nerve impulses through the autonomic ganglia, and they have been employed diagnostically in selecting patients for sympathectomy suffering from peripheral vascular disease.

Tetraethylammonium Bromide may be used therapeutically to give relief from pain in peripheral vascular disorders, causalgia and post-herpetic neuralgia.

In treating Para-nasal Infection Avoid RHINITIS MEDICAMENTOSA

Rx **ARGYROL** for decongestion without rebound

Rhinitis Medicamentosa—a result of repeated rebound congestion—is attributed solely to the use of vaso-constrictors.

Use of ARGYROL accomplishes the main purpose of treatment—the restoration of normal nasal function—without danger of inducing this chronic condition.

The ARGYROL Technique

1. The nasal meatus . . . by 20 per cent ARGYROL instillations through the nasolacrimal duct.
2. The nasal passages . . . with 10 per cent ARGYROL solution in drops.
3. The nasal cavities . . . with 10 per cent ARGYROL by nasal tamponage.

Its Three-Fold Effect

1. Decongests without irritation to the membrane and without ciliary injury.
2. Definitely bacteriostatic, yet non-toxic to tissue.
3. Cleanses and stimulates secretion, thereby enhancing Nature's own first line of defence.

...FIRST in weaning

On the first weaning food depends the baby's progress during many months ahead. The food must be smooth and palatable because texture and taste have a meaning even as early as the third or fourth month. Above all, it must be a nourishing and readily digested food.

Beyond question, Farex fulfils these requirements. Three cereals and other important nutritional elements are carefully blended, cooked and sieved to produce in Farex a bland, highly digestible food containing carbohydrate, protein, fat, iron, calcium and vitamin D. Farex needs only the addition of milk and sugar. No cooking is required. Tastes at first, then a teaspoonful at the 10 a.m. feed... imperceptibly, weaning has begun.

TEMPUS IN AGRORUM CULTU CONSUMERE DULCE EST (OVID)

'Tis sweet to spend one's time in the cult of the field... yet for those who are allergic to pollen, pleasure is cut short at this time of the year by the distress of hayfever and allergic rhinitis.

Prompt relief of congestion may be obtained by the simple application of a few drops of 'ENDRINE' nasal compound. Free breathing is ensured by ephedrine, which shrinks the engorged mucosa, whilst the bland oily base soothes the inflamed mucous membranes.

ENDRINE Nasal Compound

Formula: ephedrine 0.75% w/w; menthol 0.5% w/w; camphor 0.5% w/w; eucalyptol 0.5% w/w; oleum ricini 0.35% w/w; light liq. paraffin q.s to 100.

Analgesia from a travelling case

The Minnitt Gas-Air Apparatus is ideally suited to the needs of visiting practitioners and midwives alike. Now standard throughout Great Britain, it weighs only 15lbs. in its travelling case, measures 19" x 12½" x 5" and is specially designed for self-administration by the patient. The flow of gas-air is controlled by the patient's own respiration; complete unconsciousness never occurs as on the verge of insensibility the pressure of the patient's finger relaxes, allowing additional air to enter and dilute the mixture. Muscular action remains unimpaired. A wheeled model for hospitals and nursing homes is also available.

'KEMITHAL' SODIUM

'Kemithal' Sodium (sodium cyclohexenyl-allyl-thiobarbiturate) is a new ultra-short-acting intravenous anaesthetic, evolved in the I.C.I. Research Laboratories.

In extensive clinical trials, 'Kemithal' Sodium has proved to be a highly efficient and satisfactory agent for basal hypnosis and for surgical anaesthesia of short or prolonged duration.

Having a relatively high therapeutic quotient, 'Kemithal' Sodium effects anaesthesia without undue respiratory depression. A number of workers have commented upon the reduced incidence of laryngeal spasm with 'Kemithal' Sodium.

Literature on request.

'Kemithal' Sodium is issued in ampoules of 1 gramme and 2 grammes in boxes of 5 and 25, with or without sterile distilled water in ampoules of 10 c.c. and 20 c.c. respectively; ampoules of 5 grammes 'Kemithal' Sodium are also available in boxes of 5.

Case History

G.H.H. Aged 38. Dock Labourer. Injured his left shin whilst at work. On attending the clinic he had a deep traumatic ulcer surrounded by an inflamed area of skin . . . no varicose veins. (Fig. 1.)

Fig. 2

Treatment. August 9th, 1946.—Jelonet was applied to cover the ulcer and inflamed area, and a pad of cotton-wool to cover the ulcer only. The leg was bandaged from toes to knee with Viscopaste. (Fig. 2.)

August 23rd, 1946.—The inflamed area was re-dressed with Jelonet covered by strips of Ichthopaste. A well-bevelled adhesive sponge rubber pad was applied to cover the ulcer, and the leg firmly bandaged with Elastoplast.

Sept. 13th, 1946.—After liberally painting with calamine in oil, covered with Ichthopaste, a large pad of cotton-wool

was placed to cover the ulcer and the leg again firmly bandaged with Elastoplast.

October 4th, 1946—Ulcer healed. (Fig. 3.)

October 18th, 1946.—Patient discharged to work.

Comment. Although initial bandaging with Viscopaste resulted in marked improvement, there was not sufficient pressure as was evident on August 23rd when, although the ulcer was reduced in size, there was pronounced granulation tissue. This resolved rapidly with concentrated compression beneath sponge rubber with the additional support of Elastoplast. (August 23rd and September 13th.)

Details and illustrations above are of an actual case. T. J. Smith & Nephew, Ltd., Manufacturers of Jelonet, Viscopaste, Ichthopaste and Elastoplast are privileged to publish this instance, typical of many, in which their products have been used with success, in the belief that such authentic records will be of general interest.

PREPARATION FOR A MASTERPIECE

"THE only solution that gave virtual disinfection with great regularity in 15-20 sec. was 2 per cent. iodine in 70 per cent. alcohol, the virtues of which are well known and have been upheld by many investigators. . . . This then is the ideal disinfectant for needle puncture, when great rapidity is essential. It seems that for surgical incisions also a single painting just before the operation is all that is necessary, and that elaborate washings and other preparation of the skin could be omitted. . . ."

"*Rapid Chemical Disinfection of Clean Unwashed Skin,*"
LANCET, May 11, 1946, pp. 683-686.

This is one of the classic papers relating to the anti-septic value of iodine. All the research literature is collated and made readily available to members of the medical profession by the Iodine Educational Bureau. Many of the newer iodine uses and research findings are not widely known. Medical practitioners are invited to consult the Bureau about them.

MULTITONE ELECTRONIC PHYSIOTHERAPY APPARATUS

The MULTISURGER is a two-valve portable Faradic unit generating square unidirectional pulses which are automatically de-ionised.

The output can be continuous or surged at five predetermined rates selected by a switch, the output voltage is controlled by a potentiometer.

The absence of skin sensation, lack of moving parts, small size, light weight and robust construction make this the ideal instrument for use in Departments of Physical Medicine.

The output of this apparatus has a degree of comfort which is believed to be unobtainable except by electronic means.

The ratio of surge to rest period remains constant at all rates of surge and the relaxation period is of sufficient duration to reduce muscle fatigue to a minimum.

STANDARD MODEL £18 10s. 0d.

HOSPITAL MODEL £16 0s. 0d.

HOMES

ST. ANDREW'S HOSPITAL, NORTHAMPTON For Nervous and Mental Disorders

President: The Most Hon. the MARQUESS of EXETER, K.G., C.M.G., A.D.C. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Vichy Douche, Scotch Douche, Electrical baths, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own garden, and facilities are provided for handicrafts such as carpentry, etc.

IN DEPRESSIVE STATES

The Central Nervous
Stimulant of Choice

In depressive conditions 'Dexedrine' may be relied on to increase the patient's accessibility to treatment, to effect a remarkable improvement in mood and outlook, and to aid him in regaining a normal grip on life and living. The striking preponderance of its central nervous effect over its weak peripheral activity makes 'Dexedrine' virtually a single-action drug. Patients are ordinarily spared the disturbing consciousness of 'drug stimulation,' and thus 'Dexedrine' is especially suitable for the highly-strung, the emotionally unstable, convalescents, men and women undergoing the climacteric, and the aged.

Available for prescription in packs of 24 tablets in three 'Sealtite' units of eight.

'DEXEDRINE' TABLETS

(5 mg. dextro-amphetamine sulphate)

OFF SCHEDULE...

Working at an accelerated pace, with their daily routine disrupted, more people than ever ignore the urge to evacuate, thereby increasing the incidence of constipation. Agarol* Emulsion provides deft and almost effortless supplementation to the finely balanced mechanism of normal evacuation. This smooth, palatable, free-flowing emulsion is geared to co-operate with natural physiological processes and to help to re-establish a regular schedule of bowel movements . . . by retaining moisture in the stool, by supplying lubrication and by mild stimulation of peristalsis.

Composition—Mineral Oil, Glycerine and Phenolphthalein; a perfectly homogenized emulsion.
