Even Mothers may be wrong

Would you believe that 83% of mothers ask for the wrong size of shoes for their children? That's what the records of one shoe shop show. So Clarks safeguard children from mistaken guesswork: they insist that Clarks 'Fullrange' fitting shoes shall be fitted in the shop. Children's foot-health is a serious matter, and neither mothers nor shoemakers can risk being wrong.

Clarks Footgauge fits feet for length, width AND GIRTH

Several widths in every size of Clarks Children's Shoes.

Close fit at heel and instep, with room for toes to grow.

LIVER *at meal times*

In a Palatable, Readily Acceptable Form.

Proteolysed Liver A & H is prepared by a process which eliminates the nauseating flavour of raw liver. Its palatability has been further improved by its presentation in a paste form. It may be readily incorporated in the normal diet by its inclusion in soups or on toast, bread or dry biscuits.

In pernicious anæmia and other megalocytic anæmias, proteolysed liver has proved effective in cases which have failed to respond to extracts of liver in general use.

In Dietary Dyspepsias

EVERY physician is familiar with the patient complaining of sour stomach, flatulence, epigastric pain, etc., yet in whom no cause can be found other than a history of dietary indiscretion often aggravated by the indiscriminate use of Sodium Bicarbonate, Bismuth or similar remedies.

'Alocol' is the logical method of treatment in these cases and physicians constantly confirm its exceptional value. Its use gives effective and lasting relief of symptoms and, in conjunction with dietary discipline, assists in restoring normal digestive balance. 'Alocol' neutralises excess gastric acidity to the most favourable degree without provoking the danger of alkalosis, thus producing a markedly soothing effect on the gastric mucosa with the prompt relief of pain and discomfort.

'Alocol' is available in the form of Powder, Tablets and Cream. Powder—The normal dose is 1 gramme before and after meals. Tablets—Each tablet contains Alocol, 0.5 gm.; P. Sacch. Alb., 0.4 gm.; Cocoa Powder, 0.085 gm.; Excipient, q.s. The normal dose is 2 tablets before and after meals. Cream—Formula: Alocol 6.0 parts approx.; Glycerin 5.0 parts; Ol. Menth. Pip. 0.005 parts; Aq. Chlorof. 4.0 parts; Aq. Dest. to 100.0 parts. The normal dose is 1 to 3 teaspoonfuls between meals and at bed-time.

TEMPORIS ARS MEDICINA FERE EST (OVID)

The art of medicine is generally a question of time. With the peptic ulcer patient, as is well known, the rate of healing is determined by the ulcer's freedom from irritation. By rapidly buffering excess acid and at the same time avoiding acid rebound, 'ALUDROX,' a suspension of 5.6% colloidal aluminium hydroxide in gel form, ensures rest for the ulcer. Pain is relieved and time taken for healing reduced to a minimum.

The answer everywhere

to IRON DEFICIENCY ANAEMIA

Ask a doctor in India... in Australia... in Argentina... anywhere, which condition he meets most often as a result of nutritional defect. Almost always his reply will be: 'iron deficiency anaemia'. Here is one international problem for which there is a unanimous answer—the simple administration of iron by mouth. This is the single, clear-cut purpose of Fersolate Tablets, the original preparation of ferrous sulphate combined with copper and manganese.

Even the severest case normally responds to the recom-

mended dose of three Fersolate Tablets daily, haemoglobin regeneration occurring at the rate of 1 to 2 per cent daily. And, quite apart from the specific action of Fersolate, this simple routine often brings dramatic improvement in the patient's *general* well-being.

eight minutes to go . . .

Doctors today find that a large number of their patients complain of constant tiredness, of 'finding everything too much', of 'feeling generally run down'. Cases of debility and lassitude caused by present-day conditions are becoming increasingly prevalent. For these conditions 'Vibelan' is of particular value. It counteracts B vitamin deficiencies, containing as it does the principal members of the B group in the balanced proportions which are necessary for effective utilisation of proteins, fats and,

more especially, carbohydrates. Each tablet contains vitamin B₁ 0.5 mg., riboflavine 0.75 mg. and nicotinamide 7.5 mg., in a yeast extract base. Four tablets provide the normal daily requirement of these vitamins. 'Vibelan' is available in bottles of 50 tablets. Further details are available on request.

Why Ribena in Peptic Ulcer?

Ribena is being increasingly prescribed in the treatment of Peptic Ulcer because controlled clinical tests have clearly indicated that *natural* vitamin C, in the form of black-currant syrup, accelerated disappearance of symptoms and X-ray evidence of ulcer. Detailed information on this work will be gladly sent to physicians.

Ribena is the pure undiluted juice of fresh ripe black-currants with sugar, in the form of a delicious syrup. Being freed from all cellular structure of the fruit, it cannot upset the most delicate stomach. It is particularly rich in natural vitamin C (not less than 20 mgm. per fluid ounce) and associated factors.

GREEN CORN AT HARVEST TIME

EVERY practising physician has observed the increase in what may be termed "the cult of sub-normal health."—particularly among young girls.

Usually the positive signs are few. They may well be psychogenic.

If the presenting symptoms are debility, with lethargy, constipation, lustreless hair, adenoids and catarrhal disorders an iodine-deficient thyroid should come high on the list of differential diagnoses.

Adequate iodine intake even in known goitre areas would be assured by the addition of iodine to table salt, as recommended by a subcommittee of the Medical Research Council. Medical men are invited to write for WORLD GOITRE SURVEY, which presents a summary of world knowledge on the use of iodine in the treatment of goitre and its allied conditions. WORLD GOITRE SURVEY will be sent free of charge to any interested medical practitioner.

LAXATIVES for CHILDREN

To aid the Physician in choosing a laxative for children, we give the chief characteristics of Andrews. The dosage is easily adjusted according to age. Andrews is pleasant-tasting, and children accept it readily. Its laxative action is mild, and is due to the presence of magnesium sulphate and other salts in balanced proportion which increase the fluid content of the bowel by osmotic action and so lead to easy non-gripping evacuation. Andrews has a soothing effect on the stomach, stimulates the bile-flow and generally aids digestive processes. It is also useful as a gastric sedative in bilious attacks. Andrews has no costive reaction when discontinued.

APPROX. ACTIVE CONSTITUENTS:

Tartaric Acid	...	26.33%
Citric Acid	...	2.40%
Sodium Bicarbonate	...	30.86%
Magnesium Sulphate	...	19.00%

A Medical Sample is again available free on request.

DOSAGE FOR CHILDREN: For two years of age, it is safe to start with $\frac{1}{2}$ teaspoonful and to increase the dose as necessary for older children.

MULTITONE ELECTRONIC PHYSIOTHERAPY APPARATUS

The MULTISURGER is a two-valve portable Faradic unit generating square unidirectional pulses which are automatically de-ionised.

The output can be continuous or surged at five predetermined rates selected by a switch, the output voltage is controlled by a potentiometer.

The absence of skin sensation, lack of moving parts, small size, light weight and robust construction make this the ideal instrument for use in Departments of Physical Medicine.

The output of this apparatus has a degree of comfort which is believed to be unobtainable except by electronic means.

The ratio of surge to rest period remains constant at all rates of surge and the relaxation period is of sufficient duration to reduce muscle fatigue to a minimum.

INCREASED PREVALENCE OF HYPERACIDITY

One legacy of war-time strain persists. It is evidenced by the number of patients exhibiting symptoms of gastro-intestinal disorder.

The same stress factors of overwork, hurried, irregular meals and the inability to relax completely still prevail.

In such instances, 'Milk of Magnesia' is invaluable in securing rapid control of discomfort. A colloidal suspension of magnesium hydroxide, it soothes the inflamed mucosa, and neutralizes the excess acid, without liberation of gas. Furthermore, its mild laxative action ensures removal of toxic waste products.

'Milk of Magnesia' may be prescribed with confidence equally in the mild case of dyspepsia or the acute ulcer stage where sustained alkaline treatment is essential.

Analgesia from a travelling case

The Minnitt Gas-Air Apparatus is ideally suited to the needs of visiting practitioners and midwives alike. Now standard throughout Great Britain, it weighs only 15lbs. in its travelling case, measures 19" x 12½" x 5" and is specially designed for self-administration by the patient. The flow of gas-air is controlled by the patient's own respiration; complete unconsciousness never occurs as on the verge of insensibility the pressure of the patient's finger relaxes, allowing additional air to enter and dilute the mixture. Muscular action remains unimpaired. A wheeled model for hospitals and nursing homes is also available.
