Safe, effective bacteriostasis with 'SULFEX' in nasal and sinus infections

The intranasal use of 'Sulfex' ensures prolonged local bacteriostasis and prompt vasoconstriction. The microcrystalline sulphathiazole forms a fine, even 'frosting' over the nasal mucosa, and makes possible the maintenance of high local concentrations with the minimum of systemic absorption. The shrinking action of 'Paredrinex' renders the tissues more accessible to the sulphathiazole and promotes ventilation and drainage. 'Sulfex' is indicated in nasal and sinus infections—particularly those secondary to the common cold—and in sore throat. It is equally suitable for children and adults.

'Sulfex' is an aqueous suspension of microcrystalline ('Mickraform') sulphathiazole, 5%, in an isotonic solution of 'Paredrinex', 1% (pH 5.5 to 6.5). Issued in 1-oz. and 8-oz. bottles.

CALCIBRONAT

(Calcium Bromo-Lactobionate)

Indications:

All the neuropsychiatric indications for bromides.
Allergic disorders. Vaso-motor disorders. Itching dermatoses

Calcibronat fulfils the three most important desiderata of a sedative for general use—efficacy, safety and freedom from objectionable side effects. From the point of view of the patient, palatability and convenience of administration are very desirable supplementary attributes. Being available in sweetened granules and in effervescent tablets, Calcibronat is pleasant to take and well tolerated by the most fastidious patient.

AN ADJUVANT IN THE THERAPY OF INFERTILITY

Nutri-Sal

- In the absence of organic deficiencies or pathogenies, hostile genital secretions may apparently cause infertility merely through immobilization of sperm.

In these cases Nutri-Sal — a physiologic glucose douche powder — encourages a more favourable environment, and supplies metabolic stimulus for sperm motility.

Clinical tests have shown that in such cases, where pregnancy *can* occur, a pre-coital douche of Nutri-Sal will often promote fertility.

*"I've got a job at
the new suture factory!"*

*"I'm in luck! I've been picked for
a job at this new Sighthill factory, in the*

country near Edinburgh. They say it's the most modern factory of its kind in the world. There's shadowless lighting, and they've got air-conditioning too. The most wonderful thing is the plant for making the sutures, and the way everything is kept absolutely spotless. It's important work, suture-making, and it's grand to be with the firm which has such a famous name for it."

May we go on from there? It isn't just a new factory—important though that is—it is also the occasion of the merging of two firms both well known in the world of surgical sutures. The Suture Department of Johnson & Johnson is now merged with G. F. Merson Ltd. The name of the new Company is Mersons (Sutures) Ltd. The factory is literally

the most modern in the world for the making of surgical sutures.

The famous "Mersutures" (eyeless needled sutures for Plastic, Ophthalmic and General Surgery) will still be available, together with a full range of Ethicon suture materials.

All orders for Ethicon and Ethicon Mersutures should be sent to your usual wholesalers.

... FIRST in weaning

On the first weaning food depends the baby's progress during many months ahead.

The food must be smooth and palatable because texture and taste have a meaning even as early as the third or fourth month. Above all, it must be a nourishing and readily digested food.

Beyond question, Farex fulfils these requirements. Three cereals and other important nutritional elements are carefully blended, cooked and sieved to produce in Farex a bland, highly digestible food containing carbohydrate, protein, fat, iron, calcium and vitamin D. Farex needs only the addition of milk and sugar. No cooking is required. Tastes at first, then a teaspoonful at the 10 a.m. feed . . . imperceptibly, weaning has begun.

DIENŒSTROL OINTMENT B.D.H.

The greater pituitary inhibiting activity and lower œstrogenic effect of dienœstrol (Journ. Clin. Endocrinol., October 1947, p. 688) as compared with stilbœstrol render it especially useful for the treatment of menopausal disturbances in which the œstrogenic effect is comparatively undesirable. This applies to local application as well as to systemic administration and Dienœstrol Ointment B.D.H. is of special value for the treatment of menopausal dermatoses. It is also recommended for the treatment of endocrine dermatoses at all ages when the maximum local effect is desired with the minimum effect on the uterus. 'SULPHAMEZATHINE' ORAL SUSPENSION

for

CHILDREN

For many bacterial infections in children, 'Sulphamezathine' is the safest and most effective of all the sulpha drugs. It rarely gives rise to unpleasant symptoms, and renal complications are almost unknown.

'Sulphamezathine' Oral Suspension is a palatable orange-flavoured preparation containing 1 gramme of 'Sulphamezathine' per 2 fluid drachms. Children take it readily, and it provides an attractive alternative to 'Sulphamezathine' tablets.

'Sulphamezathine' Oral Suspension is issued in bottles of 100 c.c.

For promoting

Natural, Restful Sleep

THE control of insomnia presents a problem that often cannot be effectively or safely solved by recourse to the use of hypnotic drugs.

'Ovaltine' provides a safe and natural means of inducing sleep in many cases, especially where the basis of the insomnia is digestive unrest, nocturnal hunger or nervous instability. Taken before retiring, it promotes quiet and restful sleep, by reason of its gentle sedative effect on the nervous system and its faculty of assisting digestive ease.

'Ovaltine' is a natural food tonic prepared from milk, eggs, malt extract, cocoa, and soya. It is possessed of a truly delightful taste and is appreciated by every type of patient.

"You could knock me down with a nylon"

Stronger than any natural fibre, nylon is a feather-weight yarn — and to these useful properties it adds elasticity, flexibility, low moisture pick-up and abrasion resistance. The man-made yarn is equipped to do surprising things in industry — and industry has made a start. Ropes, car hoods, trawling nets, filter cloths — nylon is making all these to-day. Business men interested in nylon's tomorrow should talk to their textile supplier or to B.N.S. direct.

High strength — light weight
Toughness — durability
Elasticity — flexibility
Low moisture absorption and high wet strength
Quick drying — easy cleaning
Resistance to deterioration by mildew, petroleum oils, alkalis and soil rot
Resistance to attack by moths and other insects
Flame proof, i.e. does not propagate combustion

ALGINATE WOOL

The ideal dressings for all burns and wounds

In the treatment of burns and wounds it is essential for the dressing to act as a barrier against reinfection. When treating infected burns and wounds it is essential to incorporate bacteriostatic or bactericidal substances in the dressing. It has been stated both conclusively and authoritatively that the danger period is during the "Change of Dressing".* CALGITEX ALGINATE GAUZE OR WOOL fulfils all the requirements of the ideal dressing. By being SOLUBLE in physiologically tolerated Alkaline media, they permit the change of dressing to take place without exposure of the raw surface to the potentially microbe-laden atmosphere. They provide the ideal dressing for both CLEAN and INFECTED accidental burns and wounds, also for OPERATION WOUNDS in all branches of Surgery.

In treating Para-nasal Infection Avoid RHINITIS MEDICAMENTOSA

Rx ARGYROL for decongestion without rebound

Rhinitis Medicamentosa—a result of repeated rebound congestion—is attributed solely to the use of vaso-constrictors.

Use of ARGYROL accomplishes the main purpose of treatment—the restoration of normal nasal function—without danger of inducing this chronic condition.

The ARGYROL Technique

1. The nasal meatus . . . by 20 per cent ARGYROL instillations through the nasolacrimal duct.
2. The nasal passages . . . with 10 per cent ARGYROL solution in drops.
3. The nasal cavities . . . with 10 per cent ARGYROL by nasal tamponage.

Its Three-Fold Effect

1. Decongests without irritation to the membrane and without ciliary injury.
2. Definitely bacteriostatic, yet non-toxic to tissue.
3. Cleanses and stimulates secretion, thereby enhancing Nature's own first line of defence.

Easy to digest SOUPS & VEGETABLES

for Babies . . . and for special diets

By Libby's patented process of Homogenization ★ the cells containing the valuable food elements of Vegetables, Soups and Fruits are broken open making the nutriment readily assimilable by the most delicate digestive system. Also, tough irritating fibres are eliminated and the bulk evenly spread throughout the product. Thus it is possible to give all the goodness of these foods at a very early age — without the digestive strain which would normally ensue. Excellent, too, for adults requiring a smooth diet.

★ Homogenized Foods have been forced through tiny valves under high pressure — a much more effective process than the usual 'straining' process than machines. Clinical data and laboratory reports gladly supplied on request. Write to Libby, McNeill & Libby Ltd., Forum House, 15/16 Lime Street, London, E.C.3.

Clarks

NEW CORRECTIVE HEEL

for Children

Clarks have pleasure in announcing that they are making a new heel, suitable for attachment to an ordinary pair of Clarks Children's Shoes, which can successfully replace the use of T-irons or heavy surgical boots in the treatment of certain foot ailments and leg weaknesses.

CLARKS CURATOR HEEL

was designed for, and clinically tested by an orthopaedic surgeon, who has employed it in a number of cases with most encouraging results. The heel, moulded in light-weight rubber, is shaped to give arch support to weak feet (valgus feet).

It is intended, as far as possible, to ensure that there shall not be indiscriminate use of this corrective device. Clarks prefer that it should be used only when specified by medical practitioners and that its fitting, etc. should be under expert supervision. Full details are available to members of the medical profession, children's clinics, etc. on application to Clarks.

APPOINTMENTS

HIS MAJESTY'S COLONIAL SERVICE COLONIAL MEDICAL SERVICE

The Colonial Medical Service offers an interesting career and provides unique opportunities for applying medical science in all its branches in territories which are undergoing rapid development. There are immediate openings in many parts of the Colonial Empire, and applications are invited from both men and women doctors who are British subjects and who possess qualifications registrable in the United Kingdom. Medical Officers are usually appointed in the first instance for general duties which require all-round ability and a balanced outlook on both preventive and curative medicine. Doctors who hold the Diploma of Public Health or who have had previous experience in health work are also required for specific public health posts. In addition, ample scope exists for research and field investigation, and officers who possess special interests and aptitude are encouraged to obtain such higher qualifications as will enhance their value to the service. Appointments to the super scale posts in the administrative and specialist grades are invariably made by promotion of officers in the service who possess the necessary qualifications and experience. Full details regarding conditions and terms of service may be obtained on application to the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1.

CONTROL COMMISSION FOR GERMANY NUTRITIONAL ADVISER

A medical man is required as Nutritional Adviser for service with the Control Commission in Germany for a year in the first instance, with the possibility of further extension. Applicants should be preferably not younger than 35 years of age with a higher qualification in science or medicine. They should be familiar with the physiology and biochemistry of nutrition and should have had experience of the clinical side of nutrition. The post demands organizing ability, active interest in the subject, and a well developed critical faculty; experience in food and nutrition problems in war or famine stricken countries would be a valuable asset. A knowledge of German would be helpful. The salary is in the range of £1,100 to £1,320 per annum according to experience and qualifications, and in addition Control Commission and Foreign Service allowances are payable, which, for a married man, would probably amount to the equivalent of some £250 after payment of income tax. Free accommodation and board are provided for the time being. Local and home leave granted. Written applications, giving date of birth, full details of qualifications and experience, including dates, should be addressed to the London Appointments Officer, 1-6, Tavistock Square, London, W.C.1, quoting reference F.B.76. Original references should not be forwarded. Only candidates selected for interview will be advised.

MINISTRY OF PENSIONS STOKE MANDEVILLE HOSPITAL Aylesbury, Bucks

SENIOR MEDICAL OFFICER (B1)

Applications are invited from registered medical practitioners (male) for the appointment of Senior Medical Officer (B1) for duties in connexion with the Spinal Injuries Unit at the above-named hospital. Suitably qualified R practitioners holding B1 posts who are ineligible for H.M. Forces are invited to apply. Salary £1,000 to £1,400 per annum according to qualifications and experience. If board and lodging are provided in the hospital, a deduction of £100 per annum will be made from salary.

MUSGROVE PARK HOSPITAL, Taunton MEDICAL OFFICER (B2)

A vacancy exists for a Medical Officer (B2) at the above-named hospital, and applications are invited from registered medical practitioners. The appointment offers opportunities for experience in general medicine. Applications from R practitioners holding A posts cannot be considered unless they are ineligible for H.M. Forces. If an R practitioner is appointed the appointment will be limited to six months. Salary £428 to £540 per annum and free board and lodging or an allowance of £100 per annum if permission is given to live out.

Applications, stating date of birth, qualifications (with dates) and nationality, accompanied by copies of two recent testimonials, should be addressed to the Secretary, Ministry of Pensions, Medical Services Division, Norcross, Blackpool, Lancs.

ROYAL AUSTRALIAN NAVY SURGEON LIEUTENANTS

Applications are invited from legally qualified medical practitioners for appointment as Surgeon Lieutenants in the Royal Australian Navy. Daily rate of pay for single Officers is 41s. and 48s. for married officers, plus certain allowances in both cases. First appointment is for short term service with prospect, if desired, of appointment to Permanent Naval Forces. Full details may be obtained from R.A.N. Liaison Officer, Canberra House, 87, Jermyn Street, London, S.W.1.

MINISTRY OF HEALTH—DENTAL STAFF DENTAL OFFICERS

Applications are invited from registered dentists, men or women, for permanent and pensionable appointment as Dental Officers on the staff of the Ministry of Health and Welsh Board of Health. Inclusive salary scale in London £1,000 by £30 to £1,300 per annum, rather less in the provinces. The minimum of the scale will be linked to the age of 35 years, with deductions below that age of £30 per annum and additions of £30 per annum up to the age of 37 years. Of the six vacancies, some are outside London, including one in Wales. Candidates must have had not less than ten years' experience in the practice of dentistry, whether in private practice or in some branch of Public Dental Service. For the post in Wales a knowledge of the Welsh language is very desirable. Further particulars and forms of application may be obtained by writing to the Secretary, Civil Service Commission, Burlington Gardens, London, W.1, quoting No. 2239. Closing date for receipt of completed application forms extended from September 9, 1948, to September 30, 1948.

EDUCATIONAL

UNIVERSITY OF GLASGOW POSTGRADUATE MEDICAL EDUCATION COMMITTEE. COURSE IN MENTAL DEFICIENCY.—The University of Glasgow, in co-operation with the Scottish Association for Mental Hygiene, offers a short intensive postgraduate Course in Mental Deficiency from October 11 to October 29, 1948. The Course will consist of: (a) Lectures and demonstrations on various aspects of mental handicap and mental deficiency (legal, medical, educational, social), and on epilepsy and delinquency, especially as associated with mental defect; (b) Instruction in mental testing—observation of testing, practice with individual children and young persons, interpretation of results; (c) Visits for observation, including institutions, an occupational centre, a special school for the mentally handicapped, and a child guidance clinic. Fee: Fifteen guineas. The Course will be limited to twenty practitioners, places being allocated strictly in order of return of application forms, which may be obtained from the Director of Postgraduate Medical Education, The University, Glasgow, W.2.

UNIVERSITY OF GLASGOW, POSTGRADUATE MEDICAL EDUCATION. INTENSIVE COURSE IN SURGERY.—An eight weeks' full-time postgraduate course in Surgery will be conducted from October 11 to December 4, 1948. The course will consist of clinical meetings, pathological demonstrations, and lectures. Fee: Twenty-five guineas. Since the number of enrolments is limited to twenty, early application should be made to the Director of Postgraduate Medical Education, The University, Glasgow, W.2, from whom further particulars may be obtained.

UNIVERSITY OF GLASGOW, POSTGRADUATE MEDICAL EDUCATION. INTENSIVE COURSE IN MEDICINE.—An eight weeks' full-time postgraduate course in Medicine will be conducted from October 11 to December 4, 1948. The course will consist of clinical meetings, pathological demonstrations, and lectures. Fee: Twenty-five guineas. Since the number of enrolments is limited to twenty and only a few vacancies remain, early application should be made to the Director of Postgraduate Medical Education, The University, Glasgow, W.2, from whom further particulars may be obtained.

UNIVERSITY OF MANCHESTER. Nuffield Department of Occupational Health.—A course for the Diploma in Industrial Health will commence in October, 1948. This is divided into two parts. The first occupies the Michaelmas Term and covers the requirements for the Certificate of Public Health (C.P.H.). The second part occupies the Lent and Summer Terms. The fee for the full course is 50 guineas. Part II may be taken separately by those holding a D.P.H. or C.P.H., the fee being 38 guineas. Admissions to this course are limited and applications must be received as soon as possible for the full course and by November 30, 1948, for Part II. Further details may be obtained from the Dean of the Medical School.

UNIVERSITY COLLEGE, LONDON. FACULTY OF MEDICAL SCIENCES. SESSION 1949-50. SPECIAL ENTRANCE EXAMINATION NOVEMBER 30, 1948.—The last day of entry for this examination is SATURDAY, NOVEMBER 13, 1948. Candidates can also be considered for the Session 1950-1951 at this examination, but a further opportunity will arise in November, 1949, for those applicants who are unsuccessful or who are unable to sit the 1948 examination. There will be no vacancies for women applicants in the 1st M.B. courses at University College London; candidates should complete the 1st M.B. externally and apply for the 2nd M.B. course.

UNIVERSITY OF LEEDS POSTGRADUATE COMMITTEE.—A CLINICAL WEEK-END COURSE devoted to RHEUMATISM, open to general practitioners and others interested, will be held at the Royal Bath Hospital, Harrogate, on October 2 and 3. 'Benadryl' Cream

'Benadryl,' the potent antihistamine agent, is now available for topical application as a cream containing 2 per cent of the drug in a specially prepared water-miscible base.

'Benadryl' Cream is used either alone or to supplement oral or parenteral therapy. In the treatment of atopic or contact dermatitis and erythema multiforme it has additional value as a local anti-pruritic, reducing the erythema, oedema and pruritus met with in these conditions.

'Benadryl' Cream has also been found to be of benefit in the treatment of some cases of pruritus ani, pruritus vulvæ, neuro-dermatitis, bee-stings and insect bites.

It is available in 1-oz. collapsible tubes.

**A woman with
an intimate problem . . .**

The question of whether or not to use internally worn sanitary protection is one which all women face sooner or later. In doing so, they naturally seek the guidance of one whose advice they completely trust—that of their Doctor. Tampax, which was invented by a gynaecologist and has already been accepted by thousands of members of the Medical Profession throughout the world, deserves your endorsement for its assurance of hygiene, physical comfort and alleviation of mental strain. If you are not acquainted with Tampax, descriptive literature and samples of both absorbency sizes will gladly be sent on request.

★ Tampax may be confidently recommended by Physicians for use by married women during normal menstruation. Its use by unmarried girls should not be advocated when the size of the hymenial aperture would cause difficulty in insertion and withdrawal.

**For both EXCEPTION
and the rule**

While functional constipation is usually founded on long-term neglect, exceptional circumstances often bring transient distress to otherwise careful individuals. Dietary indiscretion, sudden change in environment, travel and other modifications in the daily routine are frequent exciting factors.

Whether constipation be the exception or the rule, the return to normal bowel function is favoured by the gentle moderating action of Agarol* Emulsion.

Composition—Mineral Oil, Glycerine and Phenolphthalein: a perfectly homogenized emulsion.

LIVER *at meal times**In a Palatable, Readily Acceptable Form.*

Proteolysed Liver A & H is prepared by a process which eliminates the nauseating flavour of raw liver. Its palatability has been further improved by its presentation in a paste form. It may be readily incorporated in the normal diet by its inclusion in soups or on toast, bread or dry biscuits.

In pernicious anæmia and other megalocytic anæmias, proteolysed liver has proved effective in cases which have failed to respond to extracts of liver in general use.

MULTIS TERRIBILIS CAVETO MULTOS (AUSONIUS)

Those that are a cause of fear to many should themselves avoid crowds. In Rome, do as the Romans do. But in modern times crowds are as difficult to avoid as the virus of the common cold. 'Endrine' nasal compound provides a simple method of treating coryza and catarrh. It contains ephedrine which shrinks the engorged mucosa, whilst the oily base brings soothing relief to the inflamed membranes. Free breathing becomes possible and droplet infection is prevented.

ENDRINE Nasal Compound

Formula: ephedrine 0.75% w/w; menthol 0.5% w/w; camphor 0.5% w/w; eucalyptol 0.5% w/w; oleum ricini 0.35% w/w; light liq. paraffin q.s. to 100
