Biro

Indicated for all personal and professional writing needs.

Biro is a tremendous boon to medical practitioners. It is always ready for use and writes clearly under all conditions. It takes excellently clear carbon copies—as many as six at a time if required. It is ideal for form-filling because it writes equally well on

every kind of paper surface and the ink dries at once; no blotting paper is required. Very shortly refill units will be available with coloured inks—royal blue, red or blue-black—another point of considerable convenience to medical men.

There's more than vitamins in SevenSeaS I

UNSATURATED FAT DEFICIENCY

Present day diets have an admitted quantitative fat deficiency. There is an equally serious qualitative deficiency in unsaturated fats which is frequently overlooked. Dry or unhealthy skin and membranes and prematurely falling hair which are common symptoms nowadays, even in quite young people, can arise from these combined fat deficiencies.

Cod Liver Oil is richer in metabolically important unsaturated fats than any other edible oil or fat.

In SevenSeaS Cod Liver Oil, arising from the method of extraction at sea from fresh livers, and by the care taken in processing, these delicate fats are present in an undamaged and easily digested form. One teaspoonful a day is equivalent to an extra ounce of dairy butter per week, in fats and calories, and supplies very much more unsaturated fats and vitamins A and D than this amount of butter contains.

As for the vitamin content, here are the figures:

STANDARD OIL	
Vitamin A	- 20,000 I.U.
Vitamin D	- 2,500 I.U. per oz.
CONCENTRATED OIL CAPSULES	
Vitamin A	- 60,000 I.U.
Vitamin D	- 6,000 I.U. per oz.

Penicillin by mouth

ALTHOUGH penicillin is the most effective of antibacterial agents, it has presented one disadvantage ever since it came into clinical use. In mild infections especially, the practitioner has found it irksome to have to administer penicillin *by injection*. Penicillin Oral Tablets (Boots) have been prepared to overcome this difficulty. Each tablet is buffered with 1G. of sodium citrate and contains 50,000 units of Calcium Penicillin.

Why 'Ribena' in fatigue and asthenic states?

Because controlled clinical tests carried out in many large factories and institutions have indicated that *natural* vitamin C, in the form of Ribena blackcurrant syrup, definitely tends to prevent fatigue, and thus increase the capacity for strenuous physical effort. It has been observed also that the occurrence of muscular cramp following prolonged severe exercise has been lessened, and mental alertness increased.

'Ribena' is employed, too, in asthenic states as a general restorative and for the biological effect of its vitamin C content or utilisation of iron by the organism.

Ribena is the pure undiluted juice of fresh ripe blackcurrants with sugar, in the form of a delicious syrup. Being freed from all cellular structure of the fruit, it cannot upset the most delicate stomach. It is particularly rich in natural vitamin C (not less than 20 mgm. per fluid ounce) and associated factors.

The Portanaest pays a visit

It means much to the General Practitioner to know that the Portanaest is always at hand, equally ready for midwifery in the home or for use in the consulting room or factory. Completely portable the Portanaest is very compact—yet it leaves nothing to be desired in the completeness of its equipment or the facility of its use. A master knob controls the rate of flow and pressure; another controls the mixture which can be read from the dial at a glance. For dentistry, the Portanaest can best be described as a portable "Walton"—an indispensable part of a visiting practitioner's equipment. Rutin in Capillary fragility

Rutin is a crystalline glycoside obtained from the leaves and flowers of buckwheat. Recent reports attribute to Rutin the property of reducing capillary fragility when this is abnormally raised.

In our research laboratories a limited quantity has been isolated from buckwheat grown in this country and is available in the form of tablets.

Rutin A & H is suggested for administration in haemorrhagic conditions due to increased capillary fragility or permeability, especially when this condition is associated with hypertension, nutritional deficiency or toxic effects of drugs.

THE PROBLEM OF *Seborrhæic affections*

CHRONIC skin diseases such as acne, seborrhœa oleosa, and rosacea are very distressing to the patient. In the case of women it is particularly difficult to treat facial lesions without further disfigurement.

Genatosan Products offer two happy solutions to the problem. Dermatological Cream No. 10 (Zinc. Sulph. 3%, Potass. Sulphurat. 3%) contains the active in-

gredients in a non-greasy base. For day use the cream may be employed as a powder base without detracting from its therapeutic value, and your patients will appreciate the lack of restriction on the use of cosmetics.

Antacid and Adsorbent

The particular value of MAGSORBENT in chronic hyperchlorhydric disorders depends upon the moderation of its rate of interaction with acids. The time required for complete interaction approximates to the normal emptying time of the stomach. "What is Benger's Food?"

"You have heard the medical evidence and you may have formed the conclusion that, in spite of his undoubtedly high qualifications, Dr. Telmy-More was not entirely clear in his own mind as to the nature and functions of Benger's Food.

"The fact that his father prescribed it and his grandfather before that, whilst indicating continuity in the treatment of gastro-intestinal disorders, is not in itself conclusive evidence that the witness was fully aware of their reasons for so doing.

"And, whereas, at one point in his testimony he admitted the unique enzymic action of Benger's Food in modifying milk, at another he appeared to confuse Benger's Food with ordinary bed-time drinks in which this principle is absent.

"Nevertheless, Dr. Telmy-More's frank admission that a busy practitioner is not always able to keep au fait with a wide variety of proprietary products impressed me, as did his declared intention of questioning the medical representative of the makers of Benger's Food at the first opportunity."

Johnson's BABY LOTION

used after nappie changes
Johnson's Baby Lotion
spreads a discontinuous
film that allows the
skin to "breathe"
naturally

One of the chief causes of chafing and infant skin irritations is perspiration that cannot escape freely. Johnson's pure white antiseptic Baby Lotion leaves a soothing, discontinuous film on the skin that protects it against surface bacteria and at the same time allows it to "breathe" easily, because the oil-in-water emulsion is homogenized under pressure to provide extreme dispersion of the oil in micron-size globules. Thus perspira-

tion can readily escape and the chances of heat rash and irritations are reduced. Laboratory and clinical tests show that, used after nappie changes, Johnson's Baby Lotion is the perfect product for baby skin care—and a very important step forward.

Strap is fixed to Pad at A. Therefore greater pressure is exerted at B, when the strap is pulled tightly.

Where treatment of Hernia by surgical methods is undesirable for any reasons, the HECSON super elastic truss can be confidently recommended. The Special Feature of the HECSON Truss is that the perineal or under strap is attached to the top of the pad instead of the lower margin as in the ordinary elastic or old spring truss. Thus it becomes part of the leverage mechanism for increasing the pressure of the pad at its base.

... **ANTIBIOTIC - VASOCONSTRICTOR ACTION!**

Extensive clinical use has demonstrated the *antibiotic* action of tyrothricin and the *vasoconstrictor* action of 'Propadrin', as combined in 'PROTHRICIN' to be ideal for the effective local treatment of coryza, sinusitis, rhinitis, ethmoiditis and nasal congestion.

Tyrothricin *promptly* attacks invading bacteria, and its low surface tension permits *penetration* into minute tissue crevices and mucosal folds. It exerts its anti-biotic action *in the presence* of pus and mucus, is *sparingly* absorbed, and its local activity is prolonged.

When applied locally, tyrothricin *does not* sensitize the patient, form mucosal crusts that block drainage or produce toxic reactions.

'Propadrin' is an effective vasoconstrictor which helps to *re-establish* normal drainage, breathing and mucosal function, and is notably *free* of the unpleasant side-effects of ephedrine and its analogues.

'PROTHRICIN' is an isotonic buffered solution with a pH of 5.5 to 6.5 - the same pH as normal nasal secretions. It is clear and free-flowing and *does not cause cessation* of ciliary function. It contains tyrothricin 0.02% and 'Propadrin' 1.50%.

Supplied in 1-ounce bottles with dropper assembly.

EXTRACTS FROM REVIEWS OF PREVIOUS EDITIONS

"Originality and sound perspective have raised this book out of the ranks of the synopses, while a grasp of the essential has enabled the writer to cover the wide range of medicine in a remarkably short space. We enjoyed the breakaway from the classical text-book style, the approach to the subject from the clinical aspect."—*Charing Cross Hospital Gazette*.

"To have covered such an enormous field and yet to have brought all this material within the bounds of such a handy little volume, scarcely greater than pocket-book size, is a feat of which Dr. Walker may well feel proud."—*Cambridge University Medical Society Magazine*.

"We are so enthusiastic about the book that we cannot but say to our colleagues—'Whatever hundreds of medical books you have, get this one.'"—*South African Medical Journal*.

IN SOLID STAINLESS STEEL

These Bedpans and Kidney Bowls in mirror-polished solid stainless steel fulfil the most exacting demands of hospital authorities and staff. They provide comfort for the patient, are perfectly hygienic, extremely serviceable and light in weight.

The Bedpans are seamless, and have drainage holes in open half-roll lip.

The Kidney Bowls have open half-roll edge and are designed to nest, thus saving storage space. In 3 sizes—8" × 1½" deep, 10" × 2" deep and 12" × 2½" deep.

These are but two items from the extensive range of "Atec" Surgical and Medical Equipment in Solid Stainless Steel—the modern material for modern hospitals.

Write to the manufacturers Andrews Bros. (Bristol) Ltd., 6 Stainless House, Weston-super-Mare.
