The anticipated effects of glucose as an energiser and restorer are to some extent lost if the patient shows a degree of unwillingness to accept it.

But the common aversion to the sickly, sometimes nauseating, taste of glucose in many of its ordinary forms is strikingly absent whenever LUCOZADE is offered.

LUCOZADE is so palatable, so refreshing, that neither children nor adults ever need urging to take it as prescribed.

(Containing Dextrose, Maltose and Dextrin in solution equivalent to 23% w/v Liquid Glucose B.P.)

### *Tropical Storm in Essex*

Here is the Weatherometer used in the Ford laboratory to produce a tropical storm at will! Ford body enamels have to stand heavy punishment in many climates; so they must be rigorously tested for resistance to sun and rain. Enamel-coated panels are placed in the cylinder, revolved slowly under the ultra-violet rays of a powerful

arc lamp and soaked with a sudden jet of soft water after each circuit. The enamel must endure this series of shocks for a period of 500 light hours! Any sample that fails to pass these stringent tests is ruthlessly rejected.

(Calcium Bromo-Lactobionate)

## Indications:

All the neuropsychiatric indications for bromides. Allergic disorders. Vaso-motor disorders. Itching dermatoses.

Calcibronat fulfils the three most important desiderata of a sedative for general use—efficacy, safety and freedom from objectionable side effects. From the point of view of the patient, palatability and convenience of administration are very desirable supplementary attributes. Being available in sweetened granules and in effervescent tablets, Calcibronat is pleasant to take and well tolerated by the most fastidious patient.

Although they would not be classed as insomnia cases, nevertheless many patients complain that they are unable to get a good night's rest. Often the underlying cause of their restlessness is difficulty in breathing due to catarrh and nasal congestion. In these conditions free breathing may be obtained by the administration of 2 or 3 drops of Endrine Nasal Compound before retiring. 'Endrine' contains ephedrine, which shrinks the engorged mucosa, together with essential oils which soothe the inflamed membranes.

## AS THE TISSUES WEAKEN WITH THE YEARS

SECRETORY dysfunction and muscular atrophy of the senile intestinal wall result in:

1. **Inadequate mucinous lubrication** of intestinal contents. Agarol\* provides replacement by colloidal agar-agar similar to natural mucin in its lubricant qualities.
2. **Inadequate peristalsis.** Agarol re-activates peristalsis. White phenolphthalein induces gentle stimulation sufficient to overcome intestinal atonicity.
3. **Inadequate moisture.** Faecal hardening in the colon is corrected by Agarol: delay is eliminated and a moist, well formed stool passed. Each tablespoonful of Agarol ensures the retention of 100 c.c. of water in the stool.

*Composition*—Mineral Oil, Glycerine and Phenolphthalein perfectly homogenized emulsion.

## A PIONEER *in the Production of Lifesaving* ANTIBIOTICS

AS ONE of the leading American manufacturers of fine chemicals for the professions and industry, Merck & Co., Inc. has played an important part in the development and large-scale production of the well-known antibiotics, penicillin and streptomycin.

Research chemists, microbiologists, engineers and production technicians working in the laboratories and factories of Merck & Co., Inc., were pioneers in the development of penicillin. Beginning in 1940, intensive research established a sound basis for the successful development and mass production of this important antibiotic agent. During World

War II, Merck & Co., Inc., helped to bring about a reciprocal arrangement between American and British investigators to spur the production of penicillin to meet military and civilian medical needs throughout the world. Today, Merck & Co., Inc. is a leading producer of Crystalline Penicillin G Sodium, one of the pure, active factors of the original product.

Streptomycin was another achievement. It was first produced in the Research Laboratories of Merck & Co., Inc. in 1944. The following year, engineering plans were started for a large-scale plant, and within

nine months the first shipment of streptomycin was made from the new unit. This project has been acclaimed as one of the outstanding accomplishments in the history of the American chemical industry, and last year Merck & Co., Inc. was the recipient of the *Award for Chemical Engineering Achievement* with a citation, "For Distinguished Service to Humanity."

The therapeutic value of these two antibiotic agents is well known to physicians, and the advantages of Crystalline Penicillin G Sodium and Streptomycin Calcium Chloride Complex are clearly indicated in the published literature.

**A** COLLOID OF FERRIC HYDROXIDE (10% Fe). One teaspoonful is equivalent, in iron content, to approximately 30 grs. iron and ammonium citrate.

Neo-Ferrum is an inexpensive and highly effective form of iron suitable for general use in the treatment of iron deficiency anæmias. It is pleasantly flavoured and does not upset the stomach nor discolour the teeth.

Neo-Ferrum Tablets provide an extremely convenient and pleasant alternative; two tablets are equivalent to one teaspoonful of the liquid product.

Neo-Ferrum may be given to young infants as well as to children and adults. The liquid preparation is readily miscible with milk feeds.

**'VIMALTOL'** presents special advantages to the physician requiring a product which incorporates important vitamins in a form entirely pleasant and acceptable to every patient.

'Vimaltol' is made from specially prepared malt extract of high protein content, yeast—one of the richest sources of vitamin B<sub>1</sub>—and Halibut Liver Oil, an important source of vitamins A and D. It is also fortified with additional vitamins and mineral salts, and is deliciously flavoured with orange juice.

'Vimaltol' is standardized to contain in each fluid ounce: 648 international units of vitamin A and 1390 of vitamin D; also 0.3 milligrammes of vitamin B<sub>1</sub>, 4 of Niacin (P.P. vitamin), and 4.8 of Iron, in a readily assimilated form.

'Vimaltol' is thus an important aid in the treatment of the many abnormal conditions resulting from the deficiency of one or more of the essential vitamins in the average everyday dietary.

The routine use of 'Vimaltol' helps normal development of the growing organism and the maintenance of correct metabolism, while raising the general resistance against infection.

Following the early diagnosis of pregnancy, one of the more commonly expected minor complications is the train of gastric symptoms usually referred to as morning sickness.

Gastric discomfort, nausea, retching or actual vomiting are all too common in the early months. Of particular assistance during this period is a regular dose of 'BiSoDoL' immediately on waking in the morning.

The alkaline composition of 'BiSoDoL' controls excessive acidity; the magnesia present is mildly aperient, while the enzymes, papain and diastase it contains assist the digestive processes. Pleasantly flavoured with peppermint oil it is easily taken in milk or water.

## INCREASED PREVALENCE OF HYPERACIDITY

One legacy of war-time strain persists. It is evidenced by the number of patients exhibiting symptoms of gastro-intestinal disorder.

The same stress factors of overwork, hurried, irregular meals and the inability to relax completely still prevail.

In such instances, 'Milk of Magnesia' is invaluable in securing rapid control of discomfort. A colloidal suspension of magnesium hydroxide, it soothes the inflamed mucosa, and neutralizes the excess acid, without liberation of gas. Furthermore, its mild laxative action ensures removal of toxic waste products.

'Milk of Magnesia' may be prescribed with confidence equally in the mild case of dyspepsia or the acute ulcer stage where sustained alkaline treatment is essential.

## 'PERNIVIT'

*Tablets of Acetomenaphthone  
and Nicotinic Acid B.D.H.*

Considerable success in the treatment of chilblains has been reported following the use of acetomenaphthone in one group of patients and of nicotinic acid in a second group.

It may be that abnormal venous permeability and prolonged blood clotting time on one hand and venous stasis from vasoconstriction on the other may both be contributory causes of chilblains.

Trial of a combination of acetomenaphthone and nicotinic acid coherently, therefore, seems justified. 'Pernivit' is now available as tablets, each containing

### AUTOMATIC VOLUME CONTROL

The 'MONOSTAT' is a very small three-valve hearing aid which provides fully automatic regulation of volume.

This unique development eliminates the discomfort experienced with many older forms of aid due to unexpected changes of sound intensity. The 'MONOSTAT' user can move from quiet to noisy surroundings without readjusting the manual control; also any sudden loud noise is automatically reduced to a tolerable level.

A selector switch enables the user to cut out the automatic control when full volume variation is required such as when listening to music.

The 'MONOSTAT' measures only  $4\frac{1}{2} \times 2\frac{1}{2} \times 1$  inches and weighs  $6\frac{1}{2}$  ounces. It uses the new Vidor 'Kalium' low tension battery and costs approximately  $\frac{1}{2}$ d. an hour to maintain.

# ST. EBBA'S HOSPITAL, Epsom

## SOUTH WEST METROPOLITAN REGIONAL HOSPITAL BOARD TWO PHYSICIANS

Applications are invited by the Board for the appointments of Physician (two posts) at the above hospital. Provisional salary will be at the rate of £1,450 per annum, subject to review at a later date. Applicants should possess the D.P.M. and a higher qualification. St. Ebba's Hospital is concerned principally with the treatment of acute and recent cases, and its present linkages with the London training hospitals are likely to be increased in scope. It is hoped that psychiatric research in all its branches will develop there and during the next year departments of neuropathology and electroencephalography are to be established. The hospital is under the same Management Committee as Belmont Hospital (formerly Sutton Neurosis Centre) and the staffs of the two hospitals will work in close collaboration. There are two appointments, and for one of these experience in, or aptitude for, teaching is desirable. For clinical purposes each physician will rank equally with the Deputy Medical Superintendent and will lead his own team with full clinical responsibility. The appointments will be subject to the National Health Service (Superannuation) Regulations, 1947, or to the Asylum Officers' Superannuation Act, 1909, and terminable by three months' notice on either side. Applications, stating age, qualifications, experience and present appointments, and giving names and addresses of three referees, should be made by letter (in envelopes endorsed "Medical Appointments") to the Secretary, South West Metropolitan Regional Hospital Board, 11a, Portland Place, W.1, to be received not later than November 8, 1948. Canvassing will disqualify.

### PRINCE OF WALES'S HOSPITAL, Plymouth SURGEON

Applications are invited from registered medical practitioners for the appointment of Surgeon in the Plymouth Clinical Area, the smaller hospitals of which are in Kingsbridge, Tavistock, Launceston, Bude and Liskeard. The surgeon appointed will have charge of beds in the Prince of Wales's Hospital, Plymouth. Candidates must have high surgical qualifications and be experienced general surgeons. The appointment is subject to regulations made now and hereafter under the National Health Service Act, 1946, and may be terminated by three months' notice on either side.

The appointment may be held on a part-time or whole-time basis: in the former case, the surgeon selected will be required to devote five half days per week to the work of the hospital services and the interim payment will be £1,000 per annum plus the current fees for domiciliary consultations. Applications from candidates who desire appointment on a whole-time basis will also be welcome; the salary will be related to the candidate's qualifications and experience and he will be allowed to undertake domiciliary consultations at the approved fees. In both cases the salary is subject to review. Applications, stating age, qualifications and experience, together with the names and addresses of three referees, should reach the Secretary of the South Western Regional Hospital Board, 6, Elton Road, Bristol, 8, not later than November 13, 1948. Canvassing either directly or indirectly will lead to disqualification.

#### THE RETREAT, YORK

The Pioneer Hospital, opened 1796, for the humane treatment of those suffering from Nervous and Mental Disorder.

This Hospital of 230 beds, administered by a Committee of the Society of Friends, combines what is best in the investigation and treatment of nervous illness with a sympathetic and friendly atmosphere. During 1947 346 patients were admitted of whom no fewer than 289 were voluntary cases. Much curative work is accomplished in our mental hospitals to-day, and the recovery rate compares very favourably with that of our general hospitals.

For information and terms of admission apply to the Physician-Superintendent, Arthur Pool, M.R.C.P., D.P.M. (Tel.: York 54551.)

## Relief from an onerous duty

When asked to act as executor or trustee friends do not like to refuse and as a result are committed to undertake duties which often require considerable technical knowledge and prove to be more onerous than expected. The appointment of Lloyds Bank avoids this burden and secures, at a moderate cost, the services of experts without losing the human understanding expected from friends. Before making a will or creating a trust ask the Manager of any Branch of Lloyds Bank for particulars of the services of the Executor and Trustee Department.

## Compensation FOR THE SERIOUS LACK of FAT

World-wide rationing has reduced our fats and in consequence our fat-soluble vitamins. Angier's Halibut Liver Oil Capsules solve the problem of how the physician can prescribe the essential fat-soluble vitamins A & D, because Halibut Liver Oil is so rich in these *natural* vitamins that Angier's are able to put enough into two or three small, tasteless and easily swallowed capsules to provide the body's entire requirements for the whole day. Thus Angier's Halibut Liver Oil Capsules enable the physician to prescribe a preparation which can justly be expected to help in countering some of the more serious results of our dietary lack of fat.

## greater foot freedom

It is flexibility and *not* arch support which gives the foot muscles the exercise necessary for them to become strong. Always first with any new development in the field of research into children's shoes, the makers of Start-rite have proved, first with the perfection of the New Last, and now with the introduction of greater flexibility, that Start-rite shoes are in the front rank. The Medical Profession can confidently specify Start-rite both for their own children and for those of their patients.
