**NEW CORRECTIVE HEEL**

*for Children*

Clarks have pleasure in announcing that they are making a new heel, suitable for attachment to an ordinary pair of Clarks Children's Shoes, which can successfully replace the use of T-irons or heavy surgical boots in the treatment of certain foot ailments and leg weaknesses.

**CLARKS CURATOR HEEL**

was designed for, and clinically tested by an orthopaedic surgeon, who has employed it in a number of cases with most encouraging results. The heel, moulded in light-weight rubber, is shaped to give arch support to weak feet (valgus feet).

It is intended, as far as possible, to ensure that there shall not be indiscriminate use of this corrective device. Clarks prefer that it should be used only when specified by medical practitioners and that its fitting, etc. should be under expert supervision. Full details are available to members of the medical profession, children's clinics, etc. on application to Clarks.

Indicated for all personal and professional writing needs.

Biro is a tremendous boon to medical practitioners. It is always ready for use and writes clearly under all conditions. It takes excellently clear carbon copies—as many as six at a time if required. It is ideal for form-filling because it writes equally well on

every kind of paper surface and the ink dries at once; no blotting paper is required. Very shortly refill units will be available with coloured inks—royal blue, red or blue-black—another point of considerable convenience to medical men.

## GAINING TWO AND LOSING ONE

Gaining two and losing one may be good draughts, but it usually is not sound therapy in peptic ulcer. Yet that is what may occur when ordinary alumina gel reacts with gastric HCl to form astringent chloride. Efforts to relieve the resulting constipation may partially offset the healing effects of alumina therapy.

Gelusil\* Antacid Adsorbent tablets provide a specially prepared alumina gel which remains virtually unaltered in contact with hydrochloric acid in the stomach. Gelusil forms a protective colloid which permits normal healing without producing constipation, acid rebound or alkalosis.

Each Tablet contains approximately  $7\frac{1}{2}$  grains Magnesium Trisilicate and partially dehydrated Aluminium Hydroxide gel corresponding to 4 grains Aluminium Hydrate.

# SAFE **Persomnia** TRADE MARK OR BARBITURATES?

The frequently reported losses of barbiturates announced by the B.B.C. are considered to be, more often than not, attempts by addicts to obtain additional supplies of the drug. The medical profession is therefore rightly reluctant to prescribe this drug frequently or for long periods.

*The best means to stop such undesirable practice is to restrict prescriptions of barbiturates to cases which are not likely to respond to other sedatives or hypnotics.*

Persomnia, a combination of two *open-chain* ureides\*—bromisovalerylurea and carbromal—has been proved by long clinical practice to be as effective as barbiturates in practically all cases in which a sedative or mild hypnotic is indicated. The preparation discloses a marked synergistic enhancement of effect as compared with the therapeutic value of the two component drugs *individually* employed.

\*Barbiturates are *closed-chain* ureides

Some of the advantages of PERSOMNIA over barbiturates are the following:

- Safety in use, even in doses largely in excess of therapeutic requirements
- Not habit-forming
- No after-effects
- No effect on the normal circulation
- Minimal risk of bromism
- No cumulative action
- Well tolerated
- Rapid absorption and excretion
- Induces quiet sleep without preliminary excitement

**NOTE:—Persomnia has no official B.P., B.P.C., or N.(W.)F. equivalent.**

## Diet and Health

In recent years, much attention has been drawn to available food supplies in relation to the health of the nation. And although there appears to be considerable controversy as to the exact requirements of calories, fats and other nutrients, it is generally accepted that a good supply of essential vitamins is of the utmost importance.

Marmite is a yeast extract containing naturally-occurring vitamins of the B complex. It supplies riboflavin (1.5 mg. per oz.) and nicotinic acid (16.5 mg. per oz.) as well as the less well-known members, pyridoxin, pantothenic acid, choline, biotin and folic acid.

## EFFUGERE NON POTES NECESSITATES

(SENECA)

*You cannot ignore necessities*

In the treatment of hypochromic anaemia it is generally recognised that iron should be presented in the most easily assimilable form.

This is achieved in 'PLASTULES' by enclosing ferrous iron in semi-fluid form in gelatin capsules. The small dosage of three a day is easy to take and the iron is readily absorbed. Digestive upset is avoided and a rapid response is achieved.

### PLASTULES

Each Plastule Plain contains Ferrous Sulph. Ersic. B.P. 5 grs. dried yeast 1/2 grs. They are also available with hog stomach, with liver extract, and with folic acid.

## PRE-NATAL DIET and the course of PREGNANCY

The normal functioning of the reproductive organs during pregnancy depends, among other things, upon the plentiful intake of vitamins and minerals.

Medical opinion is gaining ground that there is an increased need for Vitamin B in late pregnancy and the early puerperium. Its administration during the period before childbirth has resulted in less vomiting and nausea and in marked improvement in the nutritional value of the breast milk. In order to assure the building of the foetal bones *in utero* and afterwards during breast-feeding, the importance of Vitamin D and of calcium and phosphorus is also established.

In Supavite Capsules the practitioner has at hand a combination of these and other essential vitamins and minerals in a scientifically balanced form of particular value in maternity cases.

## THE IMPORTANCE OF SELECTION

As in most things the best results depend on the correct selection of implements, so success in the field of haematology depends on the correct choice of a haematinic. Folic acid and iron are haematinic fundamentals in that the former is the maturation factor for red cells (or its precursor) and ferrous iron is the principal building stone of haemoglobin. 'FOLVRON' supplies both these essential factors in a readily absorbable form.

## PLAIN TALKS ON INFANT FEEDING

## Let us Give Thought to the Amino-Acids

As every doctor knows, the nutritional value of proteins depends on their amino-acid composition and grouping. Here Humanised Trufood scores spectacularly for a comparison between the amino-acids in mother's milk and in Trufood reveals a very close approximation. (*A detailed comparison of percentages is given in a special leaflet which is sent free on application.*) The significance of this approximation hardly needs emphasising. Since the quantity of casein is reduced, and the amino-acid content is brought into approximation to that of human milk by building up the soluble proteins, it means that the young child prospers on Trufood with the same ease and success as it does on mother's milk. This statement is proved by the experience of countless mothers and the observation of welfare officials. *Literature giving detailed information can be obtained by writing to Trufood Ltd. (Dept. BM30), Bebington, Wirral, Cheshire,*

It adequately reinforces and renders safe the ordinary dietary; is a powerful source of energy and assists tissue regeneration.

A considerable measure of the value of 'Ovaltine' as a highly satisfactory accessory food and aid to nutrition is due to its constituents—milk, eggs, malt extract, cocoa and soya.

'Ovaltine' is not only highly nutritious, but really delightful to the taste, and particularly easy of digestion.

## The WHY and WHEREFORE of CEREAL FORTIFICATION

### \* Number Two : Iron

Iron used to be given in the form of those complex organic compounds which occur in nature such as haemoglobin. This seemed sound common sense until it was found that in order to use the iron the body had first to break these compounds down, and that simple forms of iron were more readily assimilated.

Various forms are, of course, used in food fortification. One of these is reduced iron—the ferrum redactum of the British Pharmacopoeia; this can be defined as "metallic iron reduced to a fine impalpable powder, associated with oxides of iron in small amounts, the whole being readily soluble in gastric juice".

Both in this country and the United States reduced iron has been proved to be admirably suitable for the fortification of cereal products. Incidentally, no discoloration of the cereal takes place when milk is added and the mixture brought to the boil.

Robinson's 'Patent' Groat consists of finely ground oat flour with the addition of ferrum redactum, creta preparata and calciferol (vitamin D). The iron content is 7 mg. per oz. of Groats.

## The BUK'S head means business

Each of BUK'S 5 self-sharpening blades has 60 cutting edges, so with every complete movement of the vibrator, 300 separate cutting edges get busy on your beard. BUK'S head gently presses down your skin, which is shielded by a wafer-thin metal guard from the cutters, thus ensuring a close, clean shave, without any pulling or 'burning'. Electric dry shaving, without the penalty of soap, brush and water is a wonderful saving of time and trouble, and we believe a trial with BUK will convince you for life. The BUK is recommended for disabled and bedridden patients. The BUK fully guaranteed, is obtainable from good stores, chemists and electrical shops. Price £5 0s. 9d. (including purchase tax).

# Pregnancy and Lactation

During pregnancy Andrews Liver Salt will be found of great service. Its pleasant taste and refreshing qualities make it an acceptable draught, which can be repeated with advantage two or three times a day if necessary. Taken thus, Andrews obviates the tendency to constipation and also relieves hepatic congestion. In the persistent vomiting of pregnancy the sedative effect of Andrews will be found helpful, and its aperient action is of great value in cases of renal insufficiency. During lactation, Andrews can be used with confidence for the relief of constipation.

## In treating Para-nasal Infection Avoid RHINITIS MEDICAMENTOSA

### R ARGYROL for decongestion without rebound

Rhinitis Medicamentosa—a result of repeated rebound congestion—is attributed solely to the use of vaso-constrictors.

Use of ARGYROL accomplishes the main purpose of treatment—the restoration of normal nasal function—without danger of inducing this chronic condition.

**The ARGYROL Technique**

1. The nasal meatus . . . by 20 per cent ARGYROL instillations through the nasolacrimal duct.
2. The nasal passages . . . with 10 per cent ARGYROL solution in drops.
3. The nasal cavities . . . with 10 per cent ARGYROL by nasal tamponage.

**Its Three-Fold Effect**

1. Decongests without irritation to the membrane and without ciliary injury.
2. Definitely bacteriostatic, yet non-toxic to tissue.
3. Cleanses and stimulates secretion, thereby enhancing Nature's own first line of defence.

## Nitrogen Mustard Hydrochloride- Boots

A POWERFUL cytotoxic agent which in carefully controlled dosage acts selectively against cells showing increased proliferative activity. Clinical trials have shown that the intravenous injection of Nitrogen Mustard Hydrochloride will reduce the tumour masses in cases of Hodgkin's disease that have become resistant to X-rays, and will bring about a fall in the white cell count in some cases of chronic myelogenous leukaemia. It is also of value in the reticulosos and in some cases of lymphosarcoma.

*Available in boxes of 10 x 10 mg. rubber-capped vials.*
