

Clarks

NEW CORRECTIVE HEEL

for Children

Clarks have pleasure in announcing that they are making a new heel, suitable for attachment to an ordinary pair of Clarks Children's Shoes, which can successfully replace the use of T-irons or heavy surgical boots in the treatment of certain foot ailments and leg weaknesses.

CLARKS CURATOR HEEL

has been clinically tested by an orthopaedic surgeon, who has employed it in a number of cases with most encouraging results. The heel, moulded in light-weight rubber, is shaped to give arch support to weak feet (valgus feet).

It is intended, as far as possible, to ensure that there shall not be indiscriminate use of this corrective device. Clarks prefer that it should be used only when specified by medical practitioners and that its fitting, etc. should be under expert supervision. Full details are available to members of the medical profession, children's clinics, etc. on application to Clarks.

Founded

in 1868

The following numbers are included in the Autumn-Winter programme of *The Practitioner*

October: ADVANCES IN TREATMENT, 1948

Fourteen leading authorities survey the principal medical and surgical advances of the year. Dr. Charles A. Janeway, Professor of Pediatrics, Harvard Medical School, contributes the article in the Current Therapeutics series, on "Gamma Globulins."

November: ANÆSTHETICS IN GENERAL PRACTICE

Intravenous Anæsthesia—The Newer Inhalational Anæsthetics—Anæsthesia in Minor Surgery—Pre-Anæsthetic Medication—Analgesia and Anæsthesia in Obstetrics—The Choice of Anæsthetic in Elderly Patients—The Anæsthetist's Bag. Also articles of general medical interest.

These numbers also include practical articles in the "Revision Corner" series, Notes and Queries, abstracts, reviews of books, etc.

A small increase in the paper allocation allows us to accept a limited number of new subscriptions. The annual subscription is £2 2s. post free. When copies are available, students and practitioners in their first year of qualification are granted a subscription concession at £1 5s.

December: WINTER AILMENTS

Pneumonia—Bronchitis—The Common Cold—Cough Mixtures—The Child's Diet in Winter—The Care of the Skin—Chilblains. Dr. J. W. Chambers and Professor Stanley Alstead write on "The Newer Barbiturates" in the Current Therapeutics series. Also articles of general medical interest.

January, 1949: THE PEPTIC ULCER PROBLEM

Contributors to this issue include Professor J. Meulengracht of Copenhagen, Dr. Waltman Walters of the Mayo Clinic, and the leading British authorities. Sir Howard Florey, F.R.S., contributes the article on "Antibiotics" to the Current Therapeutics series.

OFF SCHEDULE...

Working at an accelerated pace, with their daily routine disrupted, more people than ever ignore the urge to evacuate, thereby increasing the incidence of constipation. Agarol* Emulsion provides deft and almost effortless supplementation to the finely balanced mechanism of normal evacuation. This smooth, palatable, free-flowing emulsion is geared to co-operate with natural physiological processes and to help to re-establish a regular schedule of bowel movements . . . by retaining moisture in the stool, by supplying lubrication and by mild stimulation of peristalsis.

Composition.—Mineral Oil, Glycerine and Phenolphthalein: a perfectly homogenized emulsion.

Analgesia from a travelling case

The Minnitt Gas-Air Apparatus is ideally suited to the needs of visiting practitioners and midwives alike.

Now standard throughout Great Britain, it weighs only 15lbs, in its travelling case, measures 19" x 12½" x 5" and is specially designed for self-administration by the patient. The flow of gas-air is controlled by the patient's own respiration; complete unconsciousness never occurs, as on the verge of insensibility the pressure of the patient's finger relaxes, allowing additional air to enter and dilute the mixture. Muscular action remains unimpaired. A wheeled model for hospitals and nursing homes is also available.

Prolonged action

As in gliding, there is in penicillin therapy a constant striving to prolong effective action. This has been achieved by the introduction of Injection of Procaine Penicillin A & H, a suspension of procaine penicillin-G with 2 per cent. aluminium stearate in sterile arachis oil. Each c.c. contains 300,000 units of penicillin and the equivalent of 120 mg. of procaine. The aluminium stearate, together with the sparing solubility of the procaine penicillin, retard the liberation of penicillin into the blood stream, thus prolonging the therapeutic action.

Injection of Procaine Penicillin A & H is administered, with little or no pain, by intramuscular injection. Generally, a single injection of 1 c.c. daily is sufficient.

Available in vials of 10 c.c.

Safe, effective bacteriostasis with

'SULFEX'

in nasal and sinus infections

The intranasal use of 'Sulfex' ensures prolonged local bacteriostasis and prompt vasoconstriction. The microcrystalline ('Mickraform') sulphathiazole forms a fine, even 'frosting' over the nasal mucosa, and makes possible the maintenance of high local concentrations with the minimum of systemic absorption. The shrinking action of 'Paredrinex' renders the tissues more accessible to the sulphathiazole and promotes ventilation and drainage.

'Sulfex' is indicated in nasal and sinus infections — particularly those secondary to the common cold—and in sore throat. It is equally suitable for children and adults.

'Sulfex' is an aqueous suspension of microcrystalline ('Mickraform') sulphathiazole, 5%, in an isotonic solution of 'Paredrinex', 1% (pH 5.5 to 6.5). Issued in 1-oz. and 8-oz. bottles.

THE PRACTICAL
EXPRESSION OF
NUTRITIONAL PRINCIPLES

A sensible balance of protein, fat and carbohydrate; a sufficiency of mineral salts; adequate vitamin nutrition... all these are factors of first importance in the infant diet. Farex takes these factors into full account. Three cereals are blended in Farex with extra iron, calcium and vitamin D, forming a bland, smooth food that is ideally suited to the young digestion. That is why it has won such acceptance as a weaning food. These same nutritional merits make Farex eminently suitable for the sick and convalescent. Farex provides for them a 'square' meal yet a 'light' meal. Moreover, Farex needs no cooking—a particular advantage to the unattended patient.

*Tablets of Acetomenaphthone
and Nicotinic Acid B.D.H.*

Considerable success in the treatment of chilblains has been reported following the use of acetomenaphthone in one group of patients and of nicotinic acid in a second group.

It may be that abnormal venous permeability and prolonged blood clotting time on one hand and venous stasis from vasoconstriction on the other may both be contributory causes of chilblains.

Trial of a combination of acetomenaphthone and nicotinic acid collaterally, therefore, seems justified. 'Pernivit' is now available as tablets, each containing

INCREASED PREVALENCE OF HYPERACIDITY

One legacy of war-time strain persists. It is evidenced by the number of patients exhibiting symptoms of gastro-intestinal disorder.

The same stress factors of overwork, hurried, irregular meals and the inability to relax completely still prevail.

In such instances, 'Milk of Magnesia' is invaluable in securing rapid control of discomfort. A colloidal suspension of magnesium hydroxide, it soothes the inflamed mucosa, and neutralizes the excess acid, without liberation of gas. Furthermore, its mild laxative action ensures removal of toxic waste products.

'Milk of Magnesia' may be prescribed with confidence equally in the mild case of dyspepsia or the acute ulcer stage where sustained alkaline treatment is essential.

The man who has appointed the Westminster Bank to be his Executor or Trustee can, with truth, say that the well-being of his family will be in safe hands. The Bank will carry out his wishes faithfully, bringing to its task a fund of business experience beyond that possessed by any private individual; it will administer its trust with complete integrity; and—more important, perhaps, than any of these—it will at all times show a very sympathetic consideration towards those whose affairs are left in its hands. MULTITONE ELECTRONIC PHYSIOTHERAPY APPARATUS DE-IONISATION

Modern electronic apparatus generates unidirectional pulses, i.e., pulses in which the current flow is in one direction only. These pulses tend to produce a degree of ionisation in skin tissue, which is very undesirable.

This effect has been carefully investigated in clinics and research units and the result of their investigations has shown that a balancing pulse (De-ionisation) is essential to avoid undesirable erythema.

The De-ionising circuit which is incorporated in the Multitone Multitreatment Unit and Multisurger complies with the requirements of this clinical investigation and completely eliminates the possibility of electrolysis of tissue.

*"I see some fool is using cocaine

KÖLLER'S discovery of the anæsthetic powers of cocaine disturbed the orthodox medical world of the 80's. But this was the age of discoveries and inventions — progress was on the march. It was in this inventive era that Scott's of Edinburgh introduced M.O.F. — a new idea in infant feeding. M.O.F. has changed much since 1887. But the same inventiveness and progressiveness has remained an essential part of Scott's policy. Today, Scott's of Edinburgh provide a whole range of infant foods for mixed-feeding time.

APPOINTMENTS

HIS MAJESTY'S COLONIAL SERVICE COLONIAL MEDICAL SERVICE

The Colonial Medical Service offers an interesting career and provides unique opportunities for applying medical science in all its branches in territories which are undergoing rapid development. There are immediate openings in many parts of the Colonial Empire, and applications are invited from both men and women doctors who are British subjects and who possess qualifications registrable in the United Kingdom. Medical Officers are usually appointed in the first instance for general duties which require all-round ability and a balanced outlook on both preventive and curative medicine. Doctors who hold the Diploma of Public Health or who have had previous experience in health work are also required for specific public health posts. In addition, ample scope exists for research and field investigation, and officers who possess special interests and aptitude are encouraged to obtain such higher qualifications as will enhance their value to the service. Appointments to the super scale posts in the administrative and specialist grades are invariably made by promotion of officers in the service who possess the necessary qualifications and experience. Full details regarding conditions and terms of service may be obtained on application to the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1.

BARBADOS MEDICAL DEPARTMENT SUPERINTENDENT OF THE MENTAL HOSPITAL

Applications are invited from medical practitioners who possess qualifications registrable in the United Kingdom for appointment to the post of Superintendent of the Mental Hospital (about 750 beds) in Barbados. Applicants should preferably possess the Diploma of Psychological Medicine, though practical experience without the Diploma would be fully considered. Candidates for permanent and pensionable appointment should be under 40 years of age. Older candidates will be eligible for appointment on an agreement basis. The salary of the post is £900 per annum (pensionable). Consulting practice in lunacy cases is permitted, and a temporary cost-of-living allowance of £140 per annum is payable. Free unfurnished quarters are provided. Taxation is at local rates. A grant of £200 is made towards the cost of passages on appointment but leave passages are not provided. The emoluments and conditions of service of this post are now under consideration and if any change is made the incumbent will have the option of converting to the new salary and terms of service if he so wishes. Application forms may be obtained on request from the Director of Recruitment (Colonial Service), Sanctuary Buildings, Great Smith Street, London, S.W.1.

MINISTRY OF PENSIONS HOSPITAL Chepstow (160 beds) NEWPORT AND EAST MONMOUTHSHIRE HOSPITALS MANAGEMENT COMMITTEE JUNIOR MEDICAL OFFICER (A) Tuberculosis Wards

Applications are invited from registered practitioners for the above appointment. The officer appointed may be required to give occasional assistance elsewhere, e.g. at local Tuberculosis Clinics. Salary will be at the rate of £200 per annum, with residential emoluments. The appointment will be for a period of six months in the first instance, and subject to the National Health Service (Superannuation) Regulations, 1948. The person appointed will be required to pass a medical examination. No married quarters available. Applications, stating age, qualifications, experience, and full information as to liability for military service, together with the names of three referees, should be sent to T. A. Jones, Secretary, Newport and East Monmouthshire Hospitals Management Committee, 16, Cardiff Road, Newport, Mon.

ASSISTANT EDITOR "BRITISH MEDICAL JOURNAL" ABSTRACTING SERVICE

The Council of the British Medical Association invites applications from registered practitioners, including those serving with H.M. Forces, for the appointment of a Medical Assistant Editor to the *British Medical Journal Abstracting Service*. In the first instance the appointment will be for six months on a probationary basis at a salary of £1,000 a year, rising by annual increments of £62 10s. to £1,875 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The Association superannuation scheme will apply on substantive appointment. Candidates must present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is desirable. Applicants should send full particulars of qualifications, experience, age, etc., together with the names and addresses of three persons to whom reference may be made, to the Editor of the *British Medical Journal*, B.M.A. House, Tavistock Square, London, W.C.1, not later than December 11. Envelopes should be marked "*British Medical Journal, Abstracting Service—Assistant Editor.*"

Relief from an onerous duty

When asked to act as executor or trustee friends do not like to refuse and as a result are committed to undertake duties which often require considerable technical knowledge and prove to be more onerous than expected. The appointment of Lloyds Bank avoids this burden and secures, at a moderate cost, the services of experts without losing the human understanding expected from friends. Before making a will or creating a trust ask the Manager of any Branch of Lloyds Bank for particulars of the services of the Executor and Trustee Department.

Nitrogen Mustard Hydrochloride- Boots

A POWERFUL cytotoxic agent which in carefully controlled dosage acts selectively against cells showing increased proliferative activity. Clinical trials have shown that the intravenous injection of Nitrogen Mustard Hydrochloride will reduce the tumour masses in cases of Hodgkin's disease that have become resistant to X-rays, and will bring about a fall in the white cell count in some cases of chronic myelogenous leukaemia. It is also of value in the reticuloses and in some cases of lymphosarcoma.

Available in boxes of 10 x 10 mg. rubber-capped vials.
