

Biro

Indicated for all personal and professional writing needs.

Biro is a tremendous boon to medical practitioners. It is always ready for use and writes clearly under all conditions. It takes excellently clear carbon copies—as many as six at a time if required. It is ideal for form-filling because it writes equally well on

every kind of paper surface and the ink dries at once; no blotting paper is required. Very shortly refill units will be available with coloured inks—royal blue, red or blue-black—another point of considerable convenience to medical men.

THE SAFE LAXATIVE

Constipation is not uncommon, and it is the concern of those who tend the sick to relieve their patients from this disorder.

In this connection 'California Syrup of Figs' perfectly meets the need for a safe yet efficacious aperient. Completely void of mineral or synthetic cathartics, it is corrective not purgative, and re-educates the bowel to normal function.

Its pleasant taste and simplicity of dosage makes 'California Syrup of Figs' the laxative of choice for young and old alike. It may safely be employed either in occasional constipation, or for routine use in everyday family life.

Contains approximately 27.8% Ext. Senn. Fol. and 27.0% Syrup Ficorum (1 in 10) with carminative, sweetening, and flavouring agents.

WHEN THE GALL-BLADDER FAILS TO EMPTY

"Surgically, the drainage of the gall-bladder is accomplished by cholecystotomy.

Medically, the same result is achieved in a physiological manner by Veracolate, because the combined bile salts, sodium taurocholate and glycocholate, of which Veracolate is essentially composed, stimulate the formation of bile, which irrigates the entire biliary tract, promote drainage and overcome stasis.*

Veracolate is of established value in chronic cholecystitis, cholangitis, biliary insufficiency, biliary engorgement, before and after biliary tract surgery and as a prophylactic where a gall-stone diathesis exists.

SAFE Persomnia OR BARBITURATES?

The frequently reported losses of barbiturates announced by the B.B.C. are considered to be, more often than not, attempts by addicts to obtain additional supplies of the drug. The medical profession is therefore rightly reluctant to prescribe this drug frequently or for long periods.

The best means to stop such undesirable practice is to restrict prescriptions of barbiturates to cases which are not likely to respond to other sedatives or hypnotics.

Persomnia, a combination of two *open-chain* ureides*—bromisovalerylurea and carbromal—has been proved by long clinical practice to be as effective as barbiturates in practically all cases in which a sedative or mild hypnotic is indicated. The preparation discloses a marked synergistic enhancement of effect as compared with the therapeutic value of the two component drugs *individually* employed.

**Barbiturates are closed-chain ureides*

Some of the advantages of PERSOMNIA over barbiturates are the following:

- Safety in use, even in doses largely in excess of therapeutic requirements
- Not habit-forming
- No after-effects
- No effect on the normal circulation
- Minimal risk of bromism
- No cumulative action
- Well tolerated
- Rapid absorption and excretion
- Induces quiet sleep without preliminary excitement

NOTE:—Persomnia has no official B.P., B.P.C., or N.(W.)F. equivalent.

Free clinical samples and literature will be gladly sent on request.

A Well Balanced Diet

The need for a well-balanced diet at all times cannot be over-emphasised, and in cases of sickness or convalescence it is clearly of primary importance. In addition to carbohydrates, proteins, fats and minerals, adequate amounts of the essential vitamins must be supplied.

Marmite is a yeast extract which contains naturally-occurring vitamins of the B₂ complex; it is ordered not only where there is a suspected deficiency of the B₂ vitamins but also as a useful prophylactic measure. It is easy to include Marmite in the diet as it can conveniently be added to soups, stews and savouries, or it may be spread lightly on bread and butter, or given simply as a clear soup made with boiling water.

VITAMINS PLUS—WHAT?

There's more than vitamins in SevenSeaS

The vitamin story is not the whole story—the vehicle which carries them and the manner in which they are carried are of great significance. Vitamins A and D, as well as pro-vitamin A, are fully efficient only when they are dissolved in oil. But what of the oil? And of the manner in which the vitamins are associated with it? Isolated or synthesized vitamins dissolved in oil are not the same thing as the natural combination of the vitamins with the oil that characterizes cod liver oil.

Cod liver oil is richer in metabolically important unsaturated and readily digestible fats than any other edible oil or fat. Unsaturated fats are important in themselves and are doubly so when, as in the case of cod liver oil, the vitamins are an integral part of them.

SevenSeaS cod liver oil, extracted at sea from fresh livers, presents both the unsaturated fats and the fat soluble vitamins in their ideal combination for meeting nutritional needs and especially those of convalescents, mothers, and children.

THE IMPORTANCE OF SELECTION

As in most things the best results depend on the correct selection of implements, so success in the field of haematology depends on the correct choice of a haematinic. Folic acid and iron are haematinic fundamentals in that the former is the

"THE only solution that gave virtual disinfection with great regularity in 15-20 secs. was 2 per cent iodine in 70 per cent alcohol, the virtues of which are well known and have been upheld by many investigators . . . This then is the ideal disinfectant for needle puncture, when great rapidity is essential. It seems that for surgical incisions also a single painting just before the operation is all that is necessary, and that elaborate washings and other preparation of the skin could be omitted . . ."

PLAIN TALKS ON INFANT FEEDING

Dilution is not the Answer

It is a fallacy to believe that by diluting cow's milk you solve the infant's digestive problem. By halving with water, you halve the fat content and the nutritional balance of the feed is disturbed. The baby needs all the fat but it must be finely emulsified so that the young stomach can take it. In Trufood the fat is emulsified as finely as in mother's milk; and every Trufood feed contains *all* the fat that the baby needs for healthy development. Then again dilution does not really deal with the difficulty of the protein in cow's milk. The point here is the ratio between casein and soluble proteins. The *quantity* of casein must be reduced *scientifically*—so that the ratio of casein to soluble proteins is as near to the ratio in mother's milk as it is possible to make it. This is what has been done in Humanised Trufood. Trufood does not throw up the hard, indigestible curd that causes the baby so much trouble. Moreover, the grouping and percentages of amino-acids in Trufood are almost identical with the grouping and percentages of these vital factors in human milk. For these reasons Trufood supplies practically the same nutritive value, the same ease of digestion and the same all-round satisfaction as the baby gets from the breast. *Literature giving detailed information can be obtained by writing to Trufood Ltd. (Dept. BM35), Bebington, Wirral, Cheshire.*

Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath. Vichy Douche, Scotch Douche, Electric baths. Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own garden, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone Nos.: 2356 and 2357 Northampton), who can be seen in London by appointment.
