

One-dimensional Feet?

An adult soon knows if his shoes pinch. A child's more pliable feet will condition themselves only too easily to the wrong shape of shoe—one cause of hammer toes and some foot deformities. Clarks children's shoes are designed to allow plenty of room for the quick-growing toes while firmly hugging the ankle and instep. They are made in several widths and girths to each size.

Clarks Footgauge takes three-way measurements of the feet to ensure that each child gets its "own" shoe.

GRADUATED FITTINGS

ANTISEPSIS

The Time Factor

In estimating the true nature of an antiseptic, Time is a dimension. An antiseptic may be entirely efficient in that, over a given area, it destroys all pathogenic organisms. But there remains to be considered the risk of fresh contamination. The protection given by 'Dettol' is prolonged. Unless washed off or grossly contaminated, 30% 'Dettol' painted on the unbroken skin and allowed to dry will remain bactericidal against *streptococcus pyogenes* for at least two hours.*

* This experimental finding (*J. Obstet. Gynaec. Brit. Emp. Vol. 40 No.6*) has been confirmed in obstetric practice extending well over a decade.

'DETTOL' THE MODERN ANTISEPTIC

HIGHLY SATISFACTORY RESULTS follow the adoption of SALT'S PATENT COLOSTOMY BELT

Since we first introduced this Belt we have supplied many hundreds, and the results have been highly satisfactory. Outstanding advantages are: (1) Receiver is detachable and sterilizable by boiling; (2) Bag easily removed without removal of belt; (3) Bag easily emptied and washed; (4) No crevices or metal fittings to hold faeces; (5) Smell reduced to a minimum; (6) Less bulk than the old style. Bags are easily and economically replaced. Further details and Measure/Order forms available to professional people on request.

HOSPITALS SUPPLIED UNDER N.H.S.
