"Mathaplast"

SULPHATHIAZOLE Elastic Strip Dressing

Mathaplast Sulphathiazole Elastic Strip Dressing consists of surgical gauze impregnated in a solution containing 5 per cent sulphathiazole and stained with brilliant green. It is backed with zinc oxide adhesive plaister, and is intended for use as a dry dressing. It is eminently suitable for small septic and potentially septic wounds, as well as for simple cuts and abrasions.

Striking evidence of the antibacterial action of Mathaplast Sulphathiazole Elastic Strip Dressing is afforded by the fact that when removed from a septic wound it comes away odourless. Apart from its sulphathiazole content, it is stained with brilliant green—in itself an important therapeutic agent. Mathaplast Sulphathiazole Elastic Strip Dressing is obtainable in one yard lengths, and in widths of 1½ in., 2½ in., and 3 in.
