

SULPHONAMIDE COMPOUND TABLETS

Sulphamerazine	0.130 G.
Sulphathiazole	0.185 G.
Sulphadiazine	0.185 G.

As compared with single members of the series, combinations of Sulphonamides have certain advantages. The dose can be made really effective without the risk of renal complications, whilst the danger of sensitization is minimised

"That talk was by . . ."

Through the microphones of the British Broadcasting Corporation come facts and comments every day. You may hear an explanation of an international incident or about life today in another country. An author's recollections or a traveller's tale may follow an observer's account of a great moment in political affairs. You may miss hearing them. But you will find the best of the broadcast talks given permanent form in the pages of *The Listener*.

PROPAMIDINE CREAM — M&B

PROPAMIDINE CREAM is recommended for both the prophylaxis and the treatment of infection in wounds and burns. Clinical experience has shown that, where penicillin is applied topically sensitization of the patient to penicillin may occur, and that its use sometimes leads to the development of resistant strains of organisms. Propamidine has the advantage over penicillin in that neither of these phenomena has been observed, and for this reason Propamidine is preferred by many doctors.

NEW STRENGTH 'ALBUCID' SOLUBLE
Eye Preparations

Now available

20% EYE DROPS 10% EYE OINTMENT

THE GENTLE GIANT

'Albucid' Soluble in Ocular Therapeutics

FOR TISSUE of the highest sensitivity it is essential that local chemotherapy be effected by agents free from irritation. 'Albucid' Soluble Eye Drops are adjusted to pH 7.4 and are thus free from irritating alkalinity. High therapeutic efficiency, combined with ready solubility and very low toxicity, makes 'Albucid' Soluble the agent of choice in most eye infections. 'Albucid' Soluble Eye Ointments, containing 'Albucid' Soluble in a neutral cream base, are available for the treatment of infections of the eye and lids, where a slower and more prolonged absorption may be considered advantageous.

For the Relief of Pain in Migraine

"DIHYDROERGOTAMINE-SANDOZ"

"Dihydroergotamine-Sandoz" is effective in aborting the true migraine attack and in preventing the occurrence of excruciating pain. This is best obtained by early parenteral administration, which is efficacious in 90 per cent of cases. Oral administration is also beneficial in a lesser proportion of cases, particularly mild ones. "Dihydroergotamine-Sandoz" may be given where other ergot preparations are badly tolerated, and during the menses and pregnancy.

Full clinical information available upon request to:—

SANDOZ PRODUCTS LIMITED

BRETENHAM HOUSE, LANCASTER PLACE, LONDON, W.C.2.

In a report of 146 cases it was found that sacro-iliac sprain "is the major cause of low back pain." Treatment included "in severe and chronic cases a suitable sacro-iliac belt as protection."*

Spencer Sacro-iliac Support especially designed for this man. A pelvic binder of non-elastic webbing (see inset) encircles the pelvic girdle *inside* the support. Easily adjustable from *outside* the support to degree of control required.

For the relief of Sacro-iliac pain prescribe SPENCER

The reason why Spencer Supports are therapeutically effective is: each Spencer is *individually designed, cut, and made* at our Manufactory in Banbury—after a description of the patient's body and posture has been recorded and detailed measurements taken.

This assures the doctor that each patient will receive the proper design to aid his treatment; that the support will fit with precision and comfort.

* *Treatment of Sacro-iliac Sprain by Manipulation, Jr. Fla. Med. Assn., 33: 193-196 (Oct.), 1946.*

LAWS OF MEDICINE

*Flint's
Law**"The ontogeny
of an organ
is the phylogeny
of its blood supply"*

AUSTIN FLINT, JN.

AUSTIN FLINT, Jn. (1836-1915) was an American physiologist. In 1874 he published a treatise on physiology in which his law appeared.

Ontogeny repeats phylogeny in modern drug manufacture as well as in nature.

The stages in the synthesis of a new compound often recapitulate the stages in the development of the chemical family to which that compound belongs.

The files of Boots research organisation carry records of thousands of experiments made in the search for new remedies. These carefully compiled records form almost a race history of compounds synthesised in the service of the medical profession.

HYPON TABLETS**A BALANCED FORMULA PLUS.**

Caffein and phenolphthalein

In cases requiring continuous administration of Codein compounds the general practitioner is often concerned by the SIDE EFFECTS of **INTESTINAL STASIS** and **MENTAL DEPRESSION**.

The inclusion of a fractional dose of Phenolphthalein ensures that the normal function of the alimentary tract remains undisturbed, whilst the stimulating effect of Caffein counteracts depressive tendencies associated with Codein and Acetylsalicylic medication.

HYPON TABLETS can be prescribed with confidence in all cases where an analgesic or antipyretic is indicated.

FORMULA: Acid. Acetylsalicyl. 40.22%. Phenacet. 48.00%. Caffein 2.00%. Codein Phosph. B.P. 0.99%. Phenolphthal. 1.04%. Excip. 7.75%. (Each tablet 8 grains.)

Samples gladly sent on request.
