

PERNICIOUS ANAEMIA — Treatment

Many years experience has shown that relatively small quantities of 'OXOID' Liver Extract (I.M.) will give entirely satisfactory results, frequent injection being unnecessary.

Potency of each batch is clinically determined before issue, as this is the only reliable method of standardising the dosage required to produce a satisfactory rate of increase in the red blood corpuscles.

'OXOID' Liver Extract (I.M.) is supplied in:
 Ampoules — 2 cc.
 Bottles — 10 cc. and 20 cc.
