HÆMODUCTOR MODEL 'H'

**HOSPITAL
SUCTION
APPARATUS**

The model 'H' Hæmoductor has been designed especially for use in the operating theatre. It consists of a twin-cylinder pump driven by a 1/6 h.p. induction motor which produces a vacuum of 60 cm. Hg. An automatic control cuts off the suction to the bottle when the liquid reaches a predetermined level. The capacity of the bottle is 4 pints. A notable feature of this machine is that the motor can be left running while the bottle is being changed. A resetting push button is situated in the centre of the bottle cap.

Illustrated literature will be sent on request.
