Tried and True

★ Made from the finest Sheffield steel, Swann-Morton surgical blades are individually tested for keenness and flawlessness — then sterilised and coated with pure Vaseline to reach the surgeon's hands in perfect condition. Handles are of stainless metal, precisely machined to ensure that blades fit accurately and rigidly. There are eleven types of blade, as illustrated, and three types of handle.

*When Constipation and
Hyperacidity are concurrent —*

— as they usually are ...

In the treatment of chronic constipation, particularly where it is associated with gastric hyperacidity, 'Mil-Par' provides a reliable antacid laxative of unvarying efficacy.

A balanced combination of 'Milk of Magnesia'*, with a selected grade of medicinal paraffin, 'Mil-Par' neutralizes excess gastric acidity and checks the development of acid conditions

in the lower alimentary tract. In the intestine, where it readily permeates the faecal mass, 'Mil-Par' softens the bowel content and provides both lubrication and gentle stimulation.

'Mil-Par' is specially to be recommended during convalescence after operation or protracted illness; for infants and children, expectant and nursing mothers.

DEAFNESS IN DECIBELS

Determination of the precise degree of hearing loss is the function of the Marconi Pure Tone Audiometer. It conforms to the specification drawn up by the Electro-Acoustics Committee of the Medical Research Council, and is standardised against N.P.L. determinations to provide sinusoidal tones between 125 and 8000 c/sec. The audiometric response of the patient — who may be instructed via a crystal microphone and amplifier — is indicated by a signal lamp on the operator's panel.

When
nourishment
is the main problem . . .

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

Brand's Essence
(BEEF OR CHICKEN)

Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

The same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

New Peptic Ulcer Treatment Comparable to Drip Therapy

Whole milk and alkaline constituents combine to produce increased buffering action

NULACIN TABLETS have been evolved to meet a very real need in the treatment of gastric and duodenal ulcers.

All the literature on the treatment of peptic ulcers emphasizes the proven value of diminishing the acidity of the gastric juice. Many large and otherwise intractable ulcers can be healed by a continuous, intragastric drip of milk or alkali.

Drip therapy is, however, not always available, nor is it practicable to use it in many instances. Nulacin offers a satisfactory alternative.

Continuous Neutralization

A NULACIN TABLET allowed to dissolve slowly in the mouth has been shown clinically to provide a continuous neutralization comparable with that of drip therapy.

NULACIN TABLETS contain nutrient in a most acceptable form to the peptic ulcer patient. Nulacin tablets obviate the necessity of taking frequent feeds, and so lessen the tendency to obesity which must inevitably occur in those who are following a dietary regime of food at frequent intervals.

During ulcer activity the suggested dosage is 3 tablets to be sucked each hour, and for follow-up treatment 2 tablets should be sucked between meals, beginning half an hour after a meal.

The tablet is of a suitable size, and of a consistency and hardness, so that, when it is sucked, the result is a constant and prolonged neutralization of the gastric juice.

NULACIN TABLETS are extremely palatable, and during extensive clinical tests their taste has proved to be particularly acceptable to patients.

The patient should be instructed to place the tablet between the gum of the upper jaw and the cheek. Here it will be comfortable, and slowly dissolve. The efficacy of the tablet is greatly diminished if it is chewed and swallowed.

NULACIN TABLETS are not advertised to the public. There is no B.P. equivalent to this tablet.

NULACIN TABLETS are prepared from whole milk combined with dextrans and maltose, and incorporate:

Magnesium Trisilicate 3.5 grs. Magnesium
Oxide 2.0 grs. Calcium Carbonate 2.0 grs.
Magnesium Carbonate 0.5 grs.
Ol. Menth. Pip. q. s.

NULACIN TABLETS are at present packed in bottles of 100 and tubes of 12.

A MILLION YEARS OF WAR AGAINST AGGRESSION

As long as man has inhabited the earth, the problem of the relief of pain has stimulated him to discover cures for all his ills. Indeed, not only primitive man, but the great apes have been known to dress their wounds. The healing art, like magic, and religion, has roots as deep as those of mankind itself. The fruits of seeds sown a million years ago are nowadays being plucked. No longer the result of magic but of scientific research, new drugs are being discovered in increasing numbers, and today they form deadly weapons in the war between man and his aggressors, the microbes of disease.

PÆDIATRIC CHLOROMYCETIN PALMITATE

Little persuasion is needed to induce children to take this pleasant-tasting suspension of Chloromycetin. It enables the clinical effects of this wide-spectrum antibiotic to be obtained with the full co-operation of the small patient. Pædiatric Chloromycetin Palmitate contains a bitterless derivative that hydrolyses rapidly in the gastro-intestinal tract to liberate active Chloromycetin. Two teaspoonfuls are clinically equivalent to one 0.25 gm. capsule. *In bottles of 60 c.c.*

Increased scope for Chloromycetin

Certain infections of the ear yield rapidly to the application of Chloromycetin Topical, a 10% solution of chloramphenicol in propylene glycol. These infections include chronic otorrhœa, suppurative otitis media and infections of fenestration and mastoid operation cavities.

CHLOROMYCETIN TOPICAL

Chloromycetin Topical has been successfully used also in wound infections, infected burns, gravitational ulcers, pedicle flaps, grafts and abscess cavities.

In dropper-vials of 5 c.c. and bottles of 100 c.c.

Do you prescribe natural Vitamin C Blackcurrant Juice in Gum Infections?

★

It is the opinion of various authorities that many cases of gingivitis, particularly in children and young adults, are associated with Vitamin C deficiency as either a primary or contributory cause (*J. Amer. Med. Ass.*, 144,386).

Clinical confirmation of this is supplied by the good therapeutic results obtainable from the administration of Ribena in such cases, as an adjunct to local therapy.

Contains not less than 20 mgms.

introduces 'ALLEVIN', a balanced combination of salicylamide, caffeine and codeine. Recent experimental studies suggest that *salicylamide has five times the analgesic potency of aspirin*. In contrast to other salicylates, salicylamide does not form free salicylic acid in the stomach and is therefore much better tolerated. To these advantages are added the stimulant and potentiating effect of caffeine together with the analgesic and anti-tussive action of codeine. 'ALLEVIN' is a safe and reliable analgesic and a valuable antipyretic with a wide range of indications.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

Deferment of call-up for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that he obtains it without delay. Under present arrangements the Committees also normally allow an "R" practitioner to hold a Second House Officer post (£400) and a Senior House Officer post (£670), provided in each case that the higher appointment is secured before the termination of the practitioner's current appointment.

"R" practitioners may not accept Third House Officer posts (£450 per annum) unless they have obtained the special permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodgings at the time of submitting their applications, where this is not stated in the advertisement.

Applications are invited by the above Boards from registered medical practitioners for the joint appointment of

REGISTRAR in Psychiatry
to the South-Western Region

The successful candidate will be based on the Bristol Mental Hospitals Group (Barrow and Fish-

ponds Hospitals and the Bristol Neurosis Centre). The appointment, which may be resident or non-resident, will be held for one year in the first instance, when the contract will be reviewed and the Registrar may then be posted to a mental hospital elsewhere in the Region. It is intended that the post will offer training to enable the holder to obtain the Bristol D.P.M. The successful candidate will therefore be required to gain experience in child psychiatry, mental deficiency and neurology, as well as the general and special branches of adult psychiatry, and the work will be arranged accordingly. He will also be able to attend the course for Part I and Part II D.P.M. at the University of Bristol. The post also offers excellent opportunities for special postgraduate experience in psychiatry and for research work for the preparation of a thesis for higher qualifications. There are well-equipped departments of electroencephalography, experimental and applied psychology, and biochemical and endocrinological research, and an extensive psychiatric library at Barrow Hospital. Twelve copies of applications, stating date of birth, qualifications and experience, together with twelve copies of two testimonials, and the names and addresses of two referees, should be sent to the Secretary of the Regional Hospital Board, 27, Tyndalls Park Road, Bristol, 8, not later than August 25, 1952.
