EPHAZONE tablets

*Rational, symptomatic
treatment in
Asthma & Bronchitis*

Each tablet contains Ephedrine, the important anti-spasmodic for bronchial spasm, Theobromine, for its relaxing effect on the bronchial muscle and for stimulation of the coronary circulation, Phenazone, for its soothing effect on the higher centres, and Calcium gluconate, a readily absorbable calcium salt, for diminishing capillary permeability and checking the secretion of mucus.

These active ingredients with complementary effects in bronchial asthma are presented in the following proportions in the 'EPHAZONE' Tablet:

Ephedrine hydrochloride - - - $\frac{1}{2}$ grain
Theobromine - - - $\frac{1}{2}$ grain
Phenazone - - - 1 grain
Calcium gluconate - $\frac{1}{2}$ grain

This preparation is sanctioned for prescription under N.H.S. Please write for samples and descriptive leaflet.

Extinguish the flame of Rheumatic Disease

In the first published clinical reports on Butazolidin, these encouraging comments have been made: —

*"... as an anodyne in cases of rheumatoid arthritis, Butazolidin is quite exceptionally effective. . . . The number of patients showing objective improvement . . . seems significantly high. . . . Butazolidin does produce a marked degree of symptomatic relief in acute exacerbations of rheumatoid arthritis. Moreover, the drug seems to have some antirheumatic property, which can reduce periarticular swelling, tenderness and oedema."*¹

*"The relief of pain and stiffness that followed was almost constant and in some instances dramatic. . . . I am using Butazolidin and strongly recommend other people to try it."*²

A highly active preparation in a wide range of rheumatic conditions, Butazolidin is effective in acute phases of rheumatic disease and in chronic cases. Diminution of pain and increased freedom of movement are strikingly noticeable, resulting in a marked improvement in the well-being of the patient. The drug is rapidly absorbed and, being slowly excreted, remains in the blood at a therapeutic level for a considerable period. Butazolidin (3, 5-dioxo-1, 2-diphenyl-4-n-butyl-pyrazolidine) may be administered orally or parenterally. The tablets are formulated to disintegrate in the small intestine, thus obviating any risk of irritating the gastric mucosa. Literature is available on request.

DEBILITY

The B-complex group of vitamins is responsible for the utilization of carbohydrate in the diet. It also plays an important part in other cellular oxidation systems. In convalescence associated with debility, B-complex is an essential adjunct to treatment, but it is important that a correctly balanced preparation be selected. Such a one is Crookes B-Complex, each sugar-coated tablet containing:

aneurine	1.0 mg.	nicotinamide	10 mg.
riboflavine	1.25 mg.	yeast	227 mg.

Terramycin

in

URINARY TRACT INFECTIONS

The value of Terramycin in the general field of infective medicine is due to its very wide anti-bacterial range, its versatility and ease of administration, the rapidity of its action, and its remarkably low toxicity.

In urinary tract infections, the particular value of Terramycin lies both in its ability to reach relatively high concentrations in the urine on low dosage and in a corresponding increase in urine concentration which results from an increase in dose.^{(1) (2)}

INDICATIONS IN URINARY TRACT INFECTIONS

1. Infections due to mixed bacterial flora.
2. Infections resistant to other chemotherapeutic and antibiotic agents.
3. Infections due to *Pseudomonas pyocyanea*.
4. Infection with anatomical abnormalities or other complicating mechanical factors of the urinary system.
5. For pre-operative and post-operative control of infection in genito-urinary surgery.
6. Infections due to other Terramycin-sensitive organisms.

Terramycin can now be used for all suitable conditions in Hospitals in Great Britain, and the forms at present available include Sugar-Coated Tablets, Elixir, Oral Drops and Intravenous.

Full literature is available and will be supplied on request.

"You will have to go on a Soft Diet"

WHEN YOU SAY THAT, DOCTOR...

When you say that, you can remind the patient that a nutritionally balanced and interesting Soft Diet is obtainable to-day.

To-day's shortages can conveniently and economically be overcome by including Heinz Strained Foods in the diet. These provide ample choice, which prevents loss of appetite. Strained Foods are exactly suited to patients requiring a Soft Diet—they include no irritating seasonings or spices, and all coarse fibres are removed, while sufficient bulk is retained.

Moreover, special cooking methods *conserve* the nutritive values of these foods. They are therefore *more* nutritious than similar foods prepared by home cooking methods. Their regular inclusion in the diet makes it easy to provide the patient with protein, vitamins and minerals.

For hospital use, these foods can be obtained in 15½-oz. cans from the usual suppliers, or direct from H. J. Heinz Company Ltd., Harlesden, London, N.W.10.

Strained Chicken Broth with Vegetables & Cereal

Young chicken, fresh vegetables, wheat germ, cereal and the chicken broth.

Strained Tomato Soup

Ripe tomatoes, cooked with wheat germ, whey powder, sugar, rice-flour, and then sieved.

Strained Vegetable Soup

Several different fresh vegetables strained to a delicious purée.

Strained Beetroot

Selected young beetroot cooked and sieved.

Strained Carrots

Sweet, juicy carrots, cooked to tenderness and sieved.

Strained Green Beans

Crisp, tender french beans cooked, with all the strings and fibres carefully removed.

Strained Peas

Sweet, garden peas cooked and strained to a fine purée.

Strained Spinach

Best dark green spinach, cooked to retain goodness and sieved.

Strained Apples

A purée of selected cooked apples.

Strained Apple, Prune and Custard

Blended dessert apples and prunes, with riceflour, eggs, milk, cornflour, and sugar.

Strained Custard Pudding

Riceflour, milk, sugar, eggs, and cornflour make this a delicious, highly nutritious pudding.

Strained Plums with Semolina

Fine, ripe plums, cooked and blended with semolina and sugar.

Strained Prunes with Cereal

**Anæmias of Pregnancy*

PROVIDES ORGANIC IRON

** (B.M.J., 23.2.52, p. 407.)*

"... It was found that 33% of the patients in group A and 40.2% in group C found it difficult or impossible to tolerate ferrous sulphate tablets, and it can be assumed that between 30 and 40% of all antenatal patients will not, in fact, take these tablets if they are routinely prescribed in the antenatal department."

The need for a more suitable form of iron for the treatment of iron deficiency anaemias of pregnancy is evident.

Clinical trials have shown that for tolerance, absorption and utilisation the organic iron of FERROUS GLUCONATE as

presented in Elixir Cerevon is more acceptable to the gastric mucosa and haemopoietic system.

Elixir Cerevon also provides adequate doses of the important factor of the Vitamin B complex and the inclusion of 15% blackcurrant juice provides approximately 5.0 mgm. Vitamin C per teaspoonful and makes the preparation highly palatable.

FORMULA: Each teaspoonful contains : Ferrous Gluconate 0.3 gm. ; Aneurine Hydrochloride 1 mgm. ; Riboflavin 1 mgm. ; Nicotinamide 10 mgm. With trace elements of Copper and Manganese.

THE NEW ANTICONVULSANT

For Grand Mal Epilepsy

'Mysoline' can effectively control the convulsive seizures of grand mal epilepsy.

In a trial of 40 patients who were continuing to have major epilepsy despite other forms of treatment, 80% were improved by 'Mysoline' and 30% were completely freed from attacks of all kinds.

This result was achieved with the minimum of side-effects and there was an improvement in the mental alertness, outlook and general well-being of the patients.*

*See *Lancet*, (1952), 1, 742

Sprains, strains and muscle spasms

A new, powerful penetrating agent in the external treatment of rheumatism and allied conditions

THE effectiveness of surface applications in the relief of pain depends partly on the ability of the therapeutic agent to reach quickly the actual tissue affected. 'Algipan' supersedes all external treatments by the use of the potent penetrative agent methyl nicotinate in conjunction with the powerful vaso-dilator histamine. The way is opened up by the methyl nicotinate for the histamine rapidly to reach the deeper tissues, where it promotes a prolonged pain-relieving hyperæmia. A comforting rubefacient action is imparted by glycol salicylate and capsicin.

THE CLINICIAN CHOOSES

In the majority of recent papers on digitalis action, the drug described was Digoxin.

Digoxin is selected for clinical research in cardiology because it is a pure glycoside of constant composition, is very rapid in action, and its rate of elimination is slow enough to allow adequate maintenance therapy.

Digoxin rarely produces local gastric effects.

As in research, so in practice. For accuracy and safety the first choice is

Sterathal Suspension contains phthalyl sulphacetamide (10.5%) — a new sulphonamide of low toxicity which exerts maximum chemotherapeutic activity in both the lumen and wall of the intestinal tract. Systemic absorption is negligible and also included is Pectin (2.5%), a detoxicant in the large bowel and Kaolin (10%), a protective and adsorbent in the small intestine.

Although the Suspension contains no sugar, it is palatable and readily acceptable by both children and adults alike in the treatment of specific and non-specific diarrhoeas, gastro-enteritis and the so-called "summer diarrhoea" which is so prevalent at this time of year.

NOTE

Veriloid, plain, continues to be available in scored tablets of 1 mg. and 2 mg. A distinct, biologically assayed fraction of *Veratrum viride*, Veriloid has given outstanding results in hypertension of all degrees. It produces a significant reduction in arterial pressure without compromise of the postural reflexes necessary for normal living.

When side-effects prevent satisfactory adjustment of dosage of Veriloid given alone, Veriloid-VP usually makes possible continuation of therapy. This combination in one tablet of Veriloid, 2 mg., with phenobarbitone, B.P., 15 mg., is of value in all forms of hypertension. Arterial pressure is reduced by the specific hypotensive effect of the Veratrum alkaloids; phenobarbitone given concurrently effectively raises the limit of tolerance to Veriloid, and reduces emotional tension. There is marked relief of subjective symptoms.

The initial dose of Veriloid-VP (subsequently adjusted according to clinical response) is one to one and one-half tablets four times daily, after meals and at bed-time.

Veriloid-VP is available in bottles of 100 and 500 tablets.

Detailed information sent on request.

A NEW TOILET SOAP WITH EXCEPTIONAL GERMICIDAL POWERS

CIDAL is a high-grade, triple-milled toilet soap containing 2 per cent of Hexachlorophene, which gives it exceptional germicidal powers. This property makes CIDAL extremely valuable in daily practice.

Hexachlorophene (2:2' dihydroxy-3:5:6:3':5':6' - hexachlorodiphenylmethane), is colourless, odourless, non-irritant and non-toxic. It is 125 times more efficient than carbolic acid at 37°C against *Staphylococcus aureus* and possesses a high dilution coefficient. The hexachlorophene in CIDAL completely purifies the skin by attacking the bacteria, which settle deep within folds and pores, and forms an anti-bacteria barrier which gives protection until the next washing.

CIDAL Soap assists in preventing secondary infections of minor cuts and abrasions, and diseases such as athlete's foot. Used regularly, it helps to reduce the incidence of boils, styes, carbuncles and other forms of folliculitis and cellulitis. CIDAL is found to be beneficial in treating impetigo and barber's rash, and can be commended in all cases of skin ailments where soap and water form part of the therapy.

CIDAL is also recommended for personal hygiene, since it destroys the bacteria which ferment perspiration and cause unpleasant body odours.

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B Complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

SMELL ADSORPTION

IMPORTANT NEW AIDS FOR PATIENT AND MEDICAL STAFF

Here are three new and important products that should become part of the normal equipment of every ward and surgery. Each solves a serious problem. Their common function is the adsorption of foul smells associated with such conditions as osteo-myelitis, carcinoma of the rectum, senility, gas gangrene, etc. The adsorption is effected by granules of activated carbon, sandwiched in the layers forming Denidor Blankets, Pads and Masks. The materials enclosing the carbon allow free passage of air, but any smell carried in the air is adsorbed by the carbon. Denidor Blankets, Pads and Masks serve a threefold purpose. The blankets help the bed-patient suffering from a noxious complaint, and those who visit him or are near him. The masks make nursing him less unpleasant; and the pads free those mobile patients whose social and personal activities are restricted by, say, a colostomy.

Denidor Blankets and Pads are available now: the Nursing Masks will be obtainable shortly
