

**Glucose—in a most refreshing form**

LUCOZADE has solved a sick-room problem which has existed ever since the virtues of glucose have been recognised. All too often, glucose has proved to be distasteful to the invalid palate, and much of its therapeutic value has therefore been lost. But in LUCOZADE the Patient discovers a most acceptable solace, a refreshing source of strength and optimism.

### 'DRINAMYL'

A balanced combination of  
'Dexedrine' and amylobarbitone

Samples and further information are available on request. 'Drinamyl' is available on prescription only, in bottles of 25 tablets — each tablet contains 'Dexedrine' (dextro-amphetamine sulphate) 5 mg. and amylobarbitone (gr.  $\frac{1}{2}$ ) 32 mg.

'Drinamyl' ameliorates mood and relieves inner tension in cases of mental and emotional distress, particularly where anxiety is a factor. It is invaluable in the treatment of mild neuroses, and for the alleviation of somatic symptoms that are without organic basis. 'Drinamyl' relieves the symptoms of depression and anxiety, stimulating mental activity, and restoring optimism and cheerfulness, and an interest in life.

## *When side effects are an obstacle to treatment...*

... the administration of a combination of Veriloid with phenobarbitone enables Veratrum therapy to be continued successfully in a majority of those patients who cannot tolerate Veriloid alone because of frequent nausea.

The two substances are now available together as Veriloid-VP, each tablet of which contains 2 mg. of Veriloid with 15 mg. of Phenobarbitone B.P.

# **VERILOID-VP**

**VERILOID WITH PHENOBARBITONE**

## **IN ALL DEGREES OF HYPERTENSION**

Given concomitantly, phenobarbitone raises the threshold of tolerance of the Veratrum alkaloids and relieves the emotional tension which is so often present in the hypertensive patient. Therapeutically effective doses can thus be given with little or no side-effects.

Dosage of Veriloid-VP is adjusted to individual requirement, an average dose being one to one and one-half tablets four times daily, after meals and at bedtime.

Reference: *Lancet*, 261:1002 (Dec.) 1951.

Veriloid-VP is available in bottles of 100 and 500 scored tablets.

### **NOTE**

Veriloid, plain, remains available as before in tablets of 1 mg. and 2 mg. Veriloid is a unique, biologically standardised fraction of Veratrum viride and has been used with marked success in all forms of hypertension. Blood pressure is significantly lowered, without loss of the postural reflexes essential to normal living. Great relief of subjective symptoms is a common feature of therapy.

#### DIHYDROXY ALUMINIUM AMINOACETATE

#### The Medical Management of Gastro-Duodenal Ulceration

presents a positive approach to the medical management of gastro-duodenal ulceration in providing dihydroxy aluminium aminoacetate.

The reaction of this new buffering agent under conditions of gastric hyperacidity is threefold —

It rapidly neutralises excess acid bringing quick relief from pain.

A freshly precipitated colloidal gel is formed which protects the exposed gastric submucosa from the action of the digestive ferments.

By slow hydrolysis the amino acid, glycine, is released, which in addition to the free glycine in the formula assists in the promotion of healing.

## Treatment of the Streptococcal Throat

'PONDETS' Penicillin are a new and ingenious vehicle for local oral penicillin therapy that combine the striking advantages of extreme palatability with prolonged action. Each 'Pondet' contains 5,000 international units of crystalline potassium penicillin-G in a delicious hard, fruit, toffee-like base that completely masks the bitter taste of penicillin.

Because of the nature of their hard base, 'Pondets' dissolve slowly and uniformly, supplying an uninterrupted high concentration of penicillin to infected areas of the oro-pharyngeal mucosa.

INDICATED in minor superficial oral infections due to penicillin sensitive organisms ranging from the 'Streptococcal Throat' to the less common Vincent's infection and recommended for routine prophylactic use following Tonsillectomy.

*Individually wrapped in bottles of 20.*

Children accept 'Pondets' as readily as a sweet, and they are particularly useful in controlling throat infections in juvenile communities.

## THE EXTRA PHARMACOPOEIA (MARTINDALE)

**Volume I, 23rd Edition**

During the eleven years that have passed since the last edition of Volume I was published there have been more important additions to materia medica than in any similar previous period. In this volume will be found information on the composition and character of practically every substance used in medicine, together with a concise summary of its use, its method of administration and its contraindications, with abstracts of the world literature. The book gives details, with references, of the most recent innovations in medical practice.

Details are provided on the toxicity of chemicals and drugs, on reports of cases of poisoning, and on treatment of overdosage. It is unlikely that any medicinal agent of established value has been omitted from the Therapeutic Index, which is about half as long again as that of the last edition and contains approximately 750 headings.

The book has a larger page size and more pages than any previous edition, but it retains the original handy format.

Penicillin for prompt action against most gram-positive organisms . . . streptomycin to deal with a wide range of gram-negative organisms. These, today, are well established precepts. Clearly then the antibacterial "coverage" is greatly increased when the two antibiotics are used together; and the additive or synergistic effect of this combination is also of obvious advantage. These principles are put into practice with the introduction of Seclomycin and Estomycin.

## PAIRED FOR EFFECTIVENESS

The association of methyltestosterone and ethinylœstradiol in 'Mepilin' enables a reduction to be made in the effective dose of œstrogen for the relief of menopausal symptoms. Undesirable side-effects such as breast turgidity and pelvic congestion are avoided and the risk of withdrawal bleeding is reduced. The anabolic properties of the combination provide an increased feeling of confidence and well-being.

In ageing people of both sexes Mepilin, through improvement in the general nutritional condition, retards both mental and physical decline.

# 'Viules'

## Single-dose injections in disposable cartridges

### *A new and important development in injection technique*

A new and improved injection technique has been made possible by 'Viules', medical cartridges which have been introduced after considerable research and experiment by BOOTS PURE DRUG CO. LTD.

'Viules' are single-dose containers of stable sterile solutions and consist essentially of a cylinder of special glass sealed at both ends by rubber diaphragms; when inserted in a special all-metal syringe\* one diaphragm acts as a plunger and the solution is expelled by means of a piercer needle through the other diaphragm. The cartridge therefore is a disposable syringe barrel containing the sterile solution ready for injection and offers the following advantages over conventional injection technique *at no greater expense* :—

1. Ready for immediate use.
2. No syringe breakage.
3. Sterilisation procedures reduced to a minimum.
4. Ease of injection.
5. Ideal in emergency.

The introduction of 'Viules' is a significant advance in the administration of injection

solutions. The risk of syringe-transmitted infection is reduced and the cleaning, sterilisation and lubrication of glass syringes is obviated.

The following range of 'Viules' is now available; further additions are to be made shortly :—

<i>Atropine Sulphate</i> ..	.. gr. $\frac{1}{100}$ (1 c.c.)
<i>Methyl Amphetamine</i> ..	.. 30 mg. (1.5 c.c.)
<i>Morphine Sulphate</i> ..	.. gr. $\frac{1}{4}$ (1 c.c.)

# Solprin overcomes the defects of both aspirin and calcium aspirin

The defects of aspirin are its acidity and low solubility. The defect of calcium aspirin, as generally prepared, is its liability to chemical breakdown and consequent contamination.

By providing pure calcium aspirin in stable, soluble, palatable tablet form, 'Solprin' overcomes the defects of both aspirin and calcium aspirin, and combines the advantages of both.

Aspirin dosage can now be administered for its analgesic, antipyretic and anti-rheumatic effects in a complete solution which is both palatable and bland. Extensive clinical trials carried out in leading hospitals show that, even in large amounts given over prolonged periods, Solprin is unlikely to cause gastric or systemic disturbances, except in cases of extreme hypersensitivity. Thus an obstinate and long-standing problem in aspirin therapy has been solved.

# CIDAL SOAP

## INVALUABLE IN DAILY PRACTICE

### CIDAL HAS GERMICIDAL POWERS

CIDAL Soap has remarkable germicidal properties which make it particularly useful to the medical profession, as a protection against infection. These properties are attributable to the 2% of Hexachlorophene in CIDAL. Hexachlorophene (2:2'-dihydroxy-3:5:6:3':5':6'-hexachlorodiphenylmethane) is colourless, odourless, non-irritant and non-toxic. It is 125 times more efficient than carbolic acid at 37°C against *Staphylococcus aureus*, and possesses a high dilution coefficient.

The Hexachlorophene in CIDAL purifies the skin by attacking the bacteria which settle within folds and pores, and forms an anti-bacteria barrier which gives protection until the next washing.

### CIDAL FOR SKIN AILMENTS

CIDAL can be recommended whenever soap and water form part of the therapy (acne and seborrhoea). It is effective in treating impetigo and barber's rash, and keeps children free from spots and rashes. There is evidence that the regular use of CIDAL reduces the incidence of boils, styes, carbuncles and other forms of folliculitis and cellulitis.

CIDAL prevents secondary infections of minor cuts and abrasions.

### CIDAL FOR PERSONAL HYGIENE

CIDAL is a high-grade, triple-milled toilet soap, with a light, pleasant perfume. It ensures lasting freshness by destroying the bacteria which ferment perspiration and cause unpleasant body-odours.

## The Complex Nature of Deficiency Conditions

Nutritional deficiencies in general, and vitamin deficiencies in particular, can rarely be attributed to the absence of a single factor. Treatment with a single synthetic factor alone is therefore not usually recommended.

In the case of the B<sub>2</sub> vitamins, which appear to act synergistically, it is especially important to administer a source of the whole group, either alone or in addition to a single factor. As a source of the vitamin B<sub>2</sub> complex, Marmite yeast extract has been found exceptionally useful, because it is easily administered and supplies these vitamins in the naturally occurring state.

## For ease of administration in penicillin therapy

'Distaquaine' brand preparations of procaine penicillin G for administration in aqueous suspension are designed to make penicillin therapy more convenient to practitioner and patient. The prolonged effective action of procaine penicillin G makes frequent injections unnecessary. In the majority of infections single daily injections are adequate. 'Distaquaine' brand preparations are easily prepared and administered. There is little or no pain on injection and the equipment is easily cleaned after use.

## The facts about Glucose

**Glucose**, a term used to include a substance resulting from the partial hydrolysis of starch, is in practice a general description rather than a precise one. It is applied to medical preparations which contain additives that may not always be wanted and to commercial products of varying degrees of refinement. To identify Glucose in its purest form, *and only in this form*, the term Dextrose is used.

**Dextrose**, as found in the blood and tissues, is the sugar into which the body converts all carbohydrates. Requiring neither digestion nor chemical alteration, Dextrose is used by the body as a source of immediate energy.

The Dextrose (pure medicinal Glucose) produced by the Pharmaceutical Division of Corn Products Company Limited is prepared in two convenient forms:—

### **Dextrosol Powdered Glucose**

This contains no additives of any kind. It can be taken in large quantities without causing nausea, and should be prescribed in all cases where a patient needs a source of heat and energy with the least demand on the digestion. Packed in 1 lb. &  $\frac{1}{2}$  lb. cartons.

### **Dextrosol Karo Glucose Syrup**

for Infants and Children

An appetising blend of pure Glucose and selected carbohydrates, carefully balanced to provide the ideal sugar addition to the milk diet of artificially-fed infants. Of special value in cases of nutritional disorder. Spread on rusks, bread, etc., it offers an excellent supplementary source of energy for growing children. Packed in 1 lb. tins. A Karo Baby Book is available for the guidance of mothers.

Professional samples of both Dextrosol products will be gladly provided. For further information, doctors are invited to write to the Dextrosol Information Bureau, Wellington House, 125/130 Strand, London, W.C.2.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

Deferment of recruitment for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to a Third House Officer post (£450 per annum).

Under present arrangements in England and Wales the C.M.R.C. normally allows an "R" practitioner to proceed directly from a Second House Officer post to a Senior House Officer post (£670 per annum) for one year, but this practice will be discontinued on January 1, 1953.

An "R" practitioner who completes six months in a Second House Officer post on or after January 1, 1953, will require the special written permission of the C.M.R.C. or Scottish C.M.R.C. to proceed to any further post.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

#### Other Grades, Whole-time

(a) **HOUSE OFFICER:** £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

## For even greater security in Sulphonamide Therapy

'Cremotresamide' reduces the incidence of crystalluria — the primary factor causing renal complications in patients undergoing sulphonamide therapy.

'Cremotresamide' is particularly acceptable to children, but will be found useful in all age groups.

'Cremotresamide' contains:

*Sulphadiazine 0.2 G., Sulphamerazine 0.1 G., Sulphacetamide 0.2 G.,*  
in each average household teaspoonful.

*Descriptive literature, clinical package and dosage card*  
*gladly forwarded on request.*
