Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room. Prepared without seasoning, it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

## A major advance in the local treatment of the common cold and other catarrhal conditions

The nasal vasoconstrictor of choice with all these advantages:

- 1 Two-stage vasoconstriction — immediate and prolonged without secondary vasodilatation.
- 2 Water miscible and non-oily — no interference with ciliary action and no danger of lipid pneumonia.
- 3 Remains at the site of action — same viscosity as mucus.

4 Non-irritant — pH adjusted and isotonic with nasal secretion.

5 Readily absorbed by the mucosa — low surface tension.

6 Suitable for both adults and children.

# Infantile Scurvy and Sub-Scurvy

## THE INFLUENCE OF VITAMIN C DEFICIENCY

In the case of a baby which is pale and fretful; not feeding or thriving well; showing low resistance to infection and slow healing in the event of wounds, it is often advisable to examine the possibility of a lack of Vitamin C as the basic cause.

If the child is *BREAST FED* it is probable that the mother is not eating a sufficiency of fresh fruit and vegetables or is in poor health with anorexia, anaemia and fatigue. She may indeed be suffering from sub-scurvy herself, yet wishes to continue breast feeding.

If the child is *BOTTLE FED*, the mother may have omitted to give some fresh fruit juice, possibly because the baby may be sick on such additions. It is well to remember also that cow's milk has less than one third of the Vitamin C

content of human milk and that this is further reduced by pasteurisation.

In order to remedy Vitamin C deficiency and so restore the devitalised health which may otherwise end in symptoms of scurvy with its painful muscular haemorrhages and rapid heart failure, the use of Delrosa Rose Hip Syrup is confidently recommended. Delrosa is the richest natural source of Vitamin C, is very palatable and quickly absorbed. It provides all the Vitamin C necessary for positive health, the development of new tissue (such as red blood cells, new bone and teeth cells) and for cementing the walls of blood vessels and other tissues. Because of its high Vitamin C content (57 mgms. per fluid oz.), Delrosa plays a part in helping to increase resistance to bacterial infections.

# THROMBIN (M A W)

## *in Tonsillectomy*

THROMBIN is now being widely used in tonsillectomy operations for the control of excessive bleeding. It acts efficiently, quickly and is extremely simple to apply. The wound surface should first be swabbed clean of blood, then syringed with a concentrated solution of THROMBIN.

THROMBIN can be successfully used in any operation which involves excessive bleeding, and may often be applied in conjunction with absorbable haemostatic dressings such as fibrin foam, gelatin foam and alginates.

### SOME FACTS ABOUT THROMBIN

**STABILITY:**—THROMBIN keeps indefinitely in the dry state, and therefore may be kept in stock against an emergency.

**STERILITY:**—THROMBIN is sterilised by filtration, and needs no re-sterilisation.

**ADSORPTION:**—THROMBIN is easily adsorbed by solids, and should therefore be applied by syringe or spray.

**APPLICATION:**—THROMBIN is supplied in a dry ampoule, together with an ampoule of diluent. Solution is very rapid.

**QUANTITY:**—THROMBIN is available for surgical purposes in ampoules of 50, 200 and 5,000 N.I.H. UNITS, and for oral use in packages of 5,000 N.I.H. UNITS.

*Good results for THROMBIN are being reported in many varied surgical applications, and we shall be glad to supply further information. Inquiries should be addressed to:*

COMBINED THERAPY  
in the treatment of  
TUBERCULOSIS

The tuberculosis research worker now has available to him a number of drugs which are of clinical value, and in particular isoniazid, P.A.S. and streptomycin are receiving extensive study. The latter two drugs are, almost without exception, used concurrently. The problem of drug resistance arising from the use of isoniazid alone now suggests that this substance also should not be used in the absence of another chemotherapeutic agent. The desirability of assessing the value of combinations of isoniazid and P.A.S., and deciding on the optimum dose combination, is clearly important. They are available in the following pharmaceutical forms:—

## *Paediatrics*

The value of Terramycin in paediatrics, as in the general field of infective medicine, is due to its very wide antibacterial range, its versatility and ease of administration, the rapidity of its action, and its remarkably low toxicity. British investigators<sup>(1)</sup> have stressed the particular value of Terramycin in paediatric practice, and have drawn attention to the palatability of the paediatric forms available (Elixir and Oral Drops) and to the absence of toxic reactions.

### INDICATIONS IN PAEDIATRICS

#### RESPIRATORY TRACT INFECTIONS

Bacterial Pneumonia • Atypical Pneumonia • Bronchiectasis. Laryngotracheobronchitis, etc.

#### UPPER RESPIRATORY TRACT INFECTIONS

Rhinopharyngitis • Sinusitis • Laryngitis • Tonsillitis • Otitis Media • Pertussis, etc.

#### URINARY TRACT INFECTIONS

#### GASTROINTESTINAL INFECTIONS

#### MENINGITIS

#### EYE INFECTIONS

Conjunctivitis • Trachoma • Blepharitis • Inclusion Blennorrhoea of Newborn, etc.

#### SYSTEMIC INFECTIONS OF BACTERIAL ORIGIN

#### OTHER INFECTIONS DUE TO TERRAMYCIN-SENSITIVE ORGANISMS

Terramycin can now be used for all suitable conditions in Hospitals in Great Britain, and the forms at present available include Oral Drops, Elixir, Sugar-Coated Tablets, Intravenous, and Ophthalmic Ointment.

## New Peptic Ulcer Treatment Comparable to Drip Therapy

Whole milk and alkaline constituents combine to produce increased buffering action

**N**ULACIN TABLETS have been evolved to meet a very real need in the treatment of gastric and duodenal ulcers.

All the literature on the treatment of peptic ulcers emphasizes the proven value of diminishing the acidity of the gastric juice. Many large and otherwise intractable ulcers can be healed by a continuous, intragastric drip of milk or alkali.

Drip therapy is, however, not always available, nor is it practicable to use it in many instances. Nulacin offers a satisfactory alternative.

### Continuous Neutralization

A NULACIN TABLET allowed to dissolve slowly in the mouth has been shown clinically to provide a continuous neutralization comparable with that of drip therapy.

NULACIN TABLETS contain nutrient in a most acceptable form to the peptic ulcer patient. Nulacin tablets obviate the necessity of taking frequent feeds, and so lessen the tendency to obesity which must inevitably occur in those who are following a dietary regime of food at frequent intervals.

During ulcer activity the suggested dosage is 3 tablets to be sucked each hour, and for follow-up treatment 2 tablets should be sucked between meals, beginning half an hour after a meal.

The tablet is of a suitable size, and of a consistency and hardness, so that, when it is sucked, the result is a constant and prolonged neutralization of the gastric juice.

NULACIN TABLETS are extremely palatable, and during extensive clinical tests their taste has proved to be particularly acceptable to patients.

The patient should be instructed to place the tablet between the gum of the upper jaw and the cheek. Here it will be comfortable, and slowly dissolve. The efficacy of the tablet is greatly diminished if it is chewed and swallowed.

NULACIN TABLETS are not advertised to the public. There is no B.P. equivalent to this tablet.

NULACIN TABLETS are prepared from whole milk combined with dextrins and maltose, and incorporate:

Magnesium Trisilicate 3.5 grs. Magnesium Oxide 2.0 grs. Calcium Carbonate 2.0 grs. Magnesium Carbonate 0.5 grs. Oil, Menth. Pip. q. s.

NULACIN TABLETS are at present packed in bottles of 100 and tubes of 12.

A new dispensing pack of Penicillin Lozenges B.P. *Glaxo*—containing 100 foil-wrapped rolls of 10 lozenges—has been introduced. Its purpose is twofold—to reduce prescribing costs, and to give maximum protection against loss of potency during storage of the lozenges.

Ten lozenges (instead of twenty) now constitute the smallest pack admissible under Drug Tariff regulations; that is why prescribing costs can be reduced. The pharmacist receives *Glaxo* lozenges in a pack designed to secure maximum stability of its contents; that is how potency is further safeguarded.

*On many counts, therefore, there is good reason to prescribe*

'KEMADRIN' offers a greater measure of symptomatic relief to the victims of Parkinson's disease. A new synthetic compound, it produces fewer side effects than do the traditional belladonna and stramonium alkaloids.

Though not significantly affecting tremor, 'Kemadrin' produces a marked reduction of the disabling "cog wheel" rigidity. Muscular co-ordination is improved, and the greater activity which patients are free to enjoy is reflected in improved emotional tone and a more cheerful outlook.

'Kemadrin' is issued as compressed products of 5 mgm. (scored for division) in bottles of 25, 100 and 500. Further information on request to 183-193, Euston Road, London, N.W.1.

the convenient, volatile vasoconstrictor brings instant, safe, and effective relief, from nasal congestion accompanying head colds or sinusitis.

'Benzedrine' Inhaler often aborts a cold, but even in the acute stages it affords welcome symptomatic relief and often prevents the onset of serious complications.

The decongestive action of 'Benzedrine' Inhaler takes place immediately after inhalation and the effect lasts a full hour, thus normal nasal respiration is facilitated for long periods.

'Benzedrine' Inhaler causes no appreciable change in the amplitude or rapidity of the ciliary beat — local reactions to its use are so infrequent and mild as to be virtually negligible — and children show none of the hostility which often complicates treatment with liquid vasoconstrictors.

**Indications** Chardox is indicated in the treatment of flatulence, epigastric or abdominal discomfort, nausea, anorexia, and related symptoms.

It is particularly valuable in catarrhal and mucous colitis, for which many practitioners have found it to be almost specific.

**Dosage** Chardox tablets may be chewed, or swallowed whole with a little water. Since the action of Chardox is entirely physical, there can be no fixed dosage scheme. As a general guide, it is suggested that children be given 3 tablets at a time and adults 6. This dose may be repeated as often as necessary. Many adults have found that 2 or 3 tablets are sufficient for their particular needs.

“... The need for a more suitable form of iron for the treatment of iron deficiency anaemias of pregnancy is evident.

Clinical trials have shown that for tolerance, absorption and utilisation the organic iron of FERROUS GLUCONATE as

presented in Elixir Cerevon is more acceptable to the gastric mucosa and haemopoietic system.

Elixir Cerevon also provides adequate doses of the important factor of the Vitamin B complex and the inclusion of 15% blackcurrant juice provides approximately 5.0 mgm. Vitamin C per teaspoonful and makes the preparation highly palatable.

### INNERAZE —

The in-built wedge  
for the treatment of flat feet

There is nothing new about the use of a wedged heel for the treatment of pronation, but the Inneraze method of applying it *inside the shoe* is new and much superior. For the in-built wedge (of non-absorbent plastic) and the buttressed heel give a degree of correction that is as lasting as the shoe. Neither wear nor repair will alter it, and so the surgeon is relieved of much time-consuming supervision. And at all times Inneraze is practically indistinguishable from a normal shoe. Inneraze was designed, in the closest collaboration with an eminent orthopaedic surgeon, by the makers of the very well-known 'Start-Rite' shoes for children. The definition of "Purity" is:—

"Complete freedom from mixture of any kind". This faithfully describes "Simple" Soap which is of natural colour, and guaranteed to contain no Aniline Dyes, Perfumes, or Fillings such as Titanium—not even animal fat—as these, Dermatologists and scientists have established, are often the causes of bad skins, setting up or aggravating Dermatitis. Many Dermatologists and doctors are recommending "Simple" Soap to patients whose skins are allergic to ordinary soaps, and as a non-medicated cleansing agent for troublesome skin conditions.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of recruitment for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to a Third House Officer post (£450 per annum).

Under present arrangements in England and Wales the C.M.R.C. normally allows an "R" practitioner to proceed directly from a Second House Officer post to a Senior House Officer post (£670 per annum) for one year, but this practice will be discontinued on January 1, 1953. An "R" practitioner who completes six months in a Second House Officer post on or after January 1, 1953, will require the special written permission of the C.M.R.C. or Scottish C.M.R.C. to proceed to any further post.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

#### Other Grades, Whole-time

(a) HOUSE OFFICER: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) SENIOR HOUSE OFFICER: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

(12/9/52)

**SERVICES****CIVILIAN SPECIALISTS FOR THE ARMY OVERSEAS**

Immediate applications are invited from men and women for appointment as

**CIVILIAN SPECIALISTS**

in Anaesthetics, Obstetrics, Ophthalmology, Otolaryngology, Pathology, Radiology, and Surgery, for service with the R.A.M.C. overseas. Full particulars and application forms can be obtained from the Under Secretary of State, The War Office (AMD 1), Lansdowne House, Berkeley Square, London, W.1 (tel.: GRO 80 00, Ext. 528). Salary is at the rate of £1,800 or £2,200 per annum. To qualify for £2,200 per annum an applicant must be experienced in the practice of his specialty and must hold the higher qualification in the specialist sub ect. In addition, except in Germany and Austria, where different arrangements apply, a tax free Foreign Service allowance is paid to meet the extra cost of living at the duty station. Foreign service allowance varies, according to the duty station and the status of the applicant, between £25 and £191 for single men and women and £90 and £365 for married men. An initial out-fit allowance of up to £30 is paid, except for stations in Western Europe. Leave of 36 days a year may be granted. Engagements will be for eighteen months, all to be spent overseas, with possible extension of a further six months. Superannuation payments under the National Health Service can be continued if desired with the War Department paying employer's contribution, and pension rights under that service are thus retained. Service with the War Department counts for incremental purposes on re-employment under the N.H.S. Free accommodation, and in some areas free rations, is provided for single individuals, but official accommodation is not available for families of married individuals. Rent of private family accommodation and payment of passages for families are the responsibility of the employee. (4325)

# Pleasurable relaxation

In addition to the established use of Myanesin Elixir in the treatment of neurological conditions associated with muscular rigidity and tremor it has now been successfully employed in the relief of psychological states characterised by anxiety and tension. Amer. J. Med. Sci., 1950, 220, 23 describes a group of patients in which anxiety states and obsessional conditions were

present and which following the administration of mephenesin, the active constituent of Myanesin Elixir, obtained complete relaxation.

Best results occurred in anxiety states, however chronic, and 47 out of 50 patients treated for this condition improved.

Dosage of from  $\frac{1}{2}$  to 1 tablespoonful, one to six times daily, is suggested.

## ‘MYANESIN’ ELIXIR

Containing 1 gramme mephenesin in each tablespoonful. Bottles of 8 fl. oz. 6s. 4d.; 40 fl. oz. 26/1d.  
Also available ‘Myanesin’ Tablets each containing 0.5 gramme mephenesin. Bottles of 50 at 9/8d.
