# Extinguish the flame of Rheumatic Disease

Encouraging comments appear in the first clinical reports on Butazolidin :—

"... as an anodyne in cases of rheumatoid arthritis, Butazolidin is quite exceptionally effective. . . . The number of patients showing objective improvement . . . . seems significantly high . . . . Butazolidin does produce a marked degree of symptomatic relief in acute exacerbations of rheumatoid arthritis. Moreover, the drug seems to have some antirheumatic property, which can reduce periarticular swelling, tenderness and oedema."<sup>1</sup> "The relief of pain and stiffness that followed was almost constant and in some instances dramatic. . . . I am using Butazolidin, and strongly recommend other people to try it."<sup>2</sup>

Highly active in rheumatic conditions, Butazolidin is effective in acute phases of rheumatic disease and in chronic cases. Diminution of pain and increased freedom of movement are strikingly noticeable, resulting in a marked improvement in the well-being of the patient. Butazolidin (3, 5-dioxo-1, 2-diphenyl-4-n-butyl-pyrazolidine) may be administered orally or parenterally. The tablets are formulated to disintegrate in the small intestine, thus minimising any risk of irritating the gastric mucosa. Literature is available on request.

*effective control of hypochromic  
anaemia in just 3 tablets a day*

Tired, listless, she is relegated to the role of a spectator. You may recognize her as the typical IBEROL case—hypochromic anaemia. Specifically, her problem is lack of iron. But she may need other important nutritional elements to supplement her diet for a more rapid and complete recovery.

IBEROL therapy provides sufficient iron (210 mg.) plus generous amounts of vitamin B<sub>12</sub>, folic acid and other B complex vitamins as well as standardized stomach-liver digest and ascorbic acid.

Just 3 tablets a day—one after each meal—is the adult therapeutic dose.

The secret of IBEROL potency and compactness is in the ingenious use of the iron itself as one of three sub-coatings which completely seal and protect the vitamins. An outer sugar-coating gives the tablet a pleasant taste and odour.

For prophylaxis in pregnancy, old age or convalescence, one or two tablets daily are usually enough. In pernicious anaemia, IBEROL may be used as a supplemental haematinic. IBEROL is available in bottles of 25 and 100. Specify IBEROL for your next patient with iron-deficiency anaemia.

## THERE'S STRENGTH IN COMBINED ACTION

The answer to many a problem lies in combined action. Witness the higher blood levels and the greater clinical efficacy that have been reported from the oral administration of penicillin and the sulphonamides simultaneously in cases when the oral administration of the antibiotic or chemotherapeutic agent alone has been ineffective. A convenient means of applying this combined antibacterial therapy is Sulpenin. Containing penicillin, sulphadiazine and sulphamerazine in balanced dosage, it provides a valuable treatment for many infections due to susceptible micro-organisms. By utilising the synergistic action between penicillin and the sulphonamides the antibacterial range is increased, the likelihood of kidney damage is lessened and the tendency for the bacteria to develop mutant strains resistant to one or other of the component drugs is reduced.

 in **BRONCHOGRAPHY**

The introduction of DIONOSIL has brought a significant advance in the field of bronchography. Based on a new concept—an aqueous suspension of an organic iodine-containing compound of low solubility—this new preparation is *isotonic* with the body fluids. DIONOSIL tends to spread on the mucosal surface, providing excellent visualisation of the bronchial tree. It shows markedly reduced tendency to enter the alveoli; ample time is provided for exposing films.

Most importantly, the contrast medium is absorbed and completely eliminated from the body. As a rule, shadows in the lung disappear completely within 4 days. Important too—there is no breakdown to free iodine or inorganic iodides liable to give rise to reactions in sensitive subjects.

Veriloid is available in three forms: VERILOID (plain) in scored tablets of 1 mg. and 2 mg. in bottles of 100 and 500 tablets. VERILOID-VP (Veriloid, 2 mg., with Phenobarbitone, 15 mg.), particularly valuable for patients intolerant of Veriloid alone, put up in bottles of 100 and 500 scored tablets, and VERILOID INTRAVENOUS SOLUTION, available in 5 c.c. ampoules containing 0.4 mg. of alkaloids per c.c. in 0.25% acetic acid, used to effect initial control of blood-pressure in hypertensive crises. ## The complete answer for macrocytic anæmias

Clinical experience over a decade has established that the administration of Anahæmin constitutes the most effective form of treatment for pernicious anæmia.

Anahæmin produces, with small and comparatively infrequent doses, a prompt and satisfactory erythropoiesis in patients in relapse, it ensures the

maintenance of a normal erythrocyte level in patients in remission and is effective in preventing the onset of subacute combined degeneration of the cord. Anahæmin has also been found to be of value in the treatment of herpes zoster and post-herpetic neuralgia. The suggested dosage is 4 ml. on alternate days until relief is obtained.

## In the Service...

### Research

The House of Wander continues to maintain its advanced position in pharmaceuticals and quality food products because the standardization of active ingredients during manufacture is backed by careful control and investigation in its extensive Research Laboratories.

### In Quality

The Wander Research Laboratories have made useful contributions in the fields of dietetics, nutrition and vitamins. Their wide experience and up-to-date laboratory facilities help to maintain the high quality of Malt Extract and Cod Liver Oil (Wander) the vitamin content of which exceeds that of the analogous B.P. preparations.

The special consideration of physicians when prescribing a malt and oil preparation is that of vitamin values. Comparative studies prove that to prescribe "Wander Brand" is to specify malt extract and cod liver oil of the finest possible quality.

### In the Service of Medicine

Careful control and investigation help to maintain "Wander Brand" in the forefront of its class. Moreover, with all its special advantages, "Wander Brand" costs no more than some malt and oil preparations with a lower vitamin content.

*And since its vitamin content exceeds B.P. standards it may be prescribed without restriction for therapeutic purposes on N.H.S. scripts, thus :*

# To master malaria...

The satisfactory results already obtained with 'Daraprim' in the suppression and treatment of malaria indicate that it is likely to play a prominent part in the eradication of malarial infection in endemic regions. Notable features are :—

- ▶ High potency — each product contains only 25 mgm. of drug.
- ▶ Small dosage for treatment of acute attacks —  $\frac{1}{2}$  to 4 products according to age.
- ▶ Small dosage for suppression— $\frac{1}{2}$  to 1 product according to age.
- ▶ Prolonged suppressive action—one weekly dose.
- ▶ Has been shown to prevent the development of gametocytes in the mosquito, and to be capable of interrupting the malarial cycle.
- ▶ Unpleasant or toxic side effects have not been reported.
- ▶ Quite tasteless—ideal for children.

Further details of this new compound, which is issued as 25 mgm. compressed products in packs of 6, 30 and 1000, will gladly be sent on application to 183-193, Euston Road, London, N.W.1.

of aerosol penicillin therapy

The considerable clinical evidence which supports the use of aerosol penicillin in the treatment of pulmonary diseases also serves to illustrate the value of the "Oxycillin" Atomiser. *soluble aspirin with*  
codeine phosphate and phenacetin

Codis presents a familiar grouping of analgesic drugs; aspirin, phenacetin, codeine phosphate; with an important advantage. The "aspirin" in Codis is rendered soluble, as in 'Solprin'.

Placed, uncrushed, in water, a Codis tablet disperses in a matter of seconds to form a solution of calcium aspirin and codeine phosphate with finely suspended phenacetin. The chance of irritation of the gastric mucosa by undissolved particles of aspirin is thus minimised.

Codis is recommended for all those conditions for which Tab. Codein. Co. B.P. would be prescribed. It has the added advantages of greater ease of administration and far less likelihood of aspirin intolerance, while the rapid absorption of the soluble aspirin promotes prompt relief.

# CIDAL SOAP

## INVALUABLE IN DAILY PRACTICE

### CIDAL HAS GERMICIDAL POWERS

CIDAL Soap has remarkable germicidal properties which make it particularly useful to the medical profession, as a protection against infection. These properties are attributable to the 2% of Hexachlorophene in CIDAL. Hexachlorophene (2:2'-dihydroxy-3:5:6:3':5':6'-hexachlorodiphenylmethane) is colourless, odourless, non-irritant and non-toxic. It is 125 times more efficient than carbolic acid at 37°C against *Staphylococcus aureus*, and possesses a high dilution coefficient.

The Hexachlorophene in CIDAL purifies the skin by attacking the bacteria which settle within folds and pores, and forms an anti-bacteria barrier which gives protection until the next washing.

### CIDAL FOR SKIN AILMENTS

CIDAL can be recommended whenever soap and water form part of the therapy (acne and seborrhoea). It is effective in treating impetigo and barber's rash, and keeps children free from spots and rashes. There is evidence that the regular use of CIDAL reduces the incidence of boils, styes, carbuncles and other forms of folliculitis and cellulitis.

CIDAL prevents secondary infections of minor cuts and abrasions.

### CIDAL FOR PERSONAL HYGIENE

CIDAL is a high-grade, triple-milled toilet soap, with a light, pleasant perfume. It ensures lasting freshness by destroying the bacteria which ferment perspiration and cause unpleasant body-odours.

## Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

Insufflation  
Apparatus

This apparatus for recording a graph of insufflation has now been produced in an improved and simplified form. The whole control is now obtained by means of a single 4-position flow control valve instead of the two infinitely variable valves previously fitted. The two rates of flow available for insufflation are accurately pre-set during manufacture. The improved valve design ensures consistent operation over long periods. The CO<sub>2</sub> storage cylinder capacity is sufficient for a large number of operations without changing. Made with traditional care, finished in black leatherette with glossy grey instrument panels and supplied with a spare carbon dioxide cylinder and charts.

## Gastro-Duodenal Ulceration

### AMINO ACID AND ANTACID THERAPY

presents a positive approach to the medical management of gastro-duodenal ulceration in providing dihydroxy aluminium aminoacetate.

The reaction of this new buffering agent under conditions of gastric hyperacidity is threefold:—

It rapidly neutralises excess acid, bringing quick relief from pain. A freshly precipitated colloidal gel is formed which protects the exposed gastric submucosa from the action of the digestive ferments.

By slow hydrolysis the amino acid, glycine, is released, which in addition to the free glycine in the formula assists in the promotion of healing.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

Deferment of recruitment for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour as a who-e-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to a Third House Officer post (£450 per annum).

Under present arrangements in England and Wales the C.M.R.C. normally allows an "R" practitioner to proceed directly from a Second House Officer post to a Senior House Officer post (£670 per annum) for one year, but this practice will be discontinued on January 1, 1953. An "R" practitioner who completes six months in a Second House Officer post on or after January 1, 1953, will require the special written permission of the C.M.R.C. or Scottish C.M.R.C. to proceed to any further post.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

#### Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consulant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

## MIDDLE EAST

## Arab Refugee Work

## GENERAL SURGEONS (Men or women)

Wanted urgently for work at C.M.S. Hospital, Gaza, for minimum period of one year. The hospital is well-equipped: 100 beds, practically all surgical. It is responsible for all the major surgery for a population of approximately 300,000—250,000 of whom are Arab refugees. These posts offer a unique opportunity for concentrated surgical experience, ranging over the whole field of general surgery, including orthopaedics. A good deal of gynaecological work is also done, and there is scope among the specialties, chiefly ophthalmology and ear, nose, and throat surgery. The hospital runs a P.T.S. and is a training hospital for nurses: there are four British Sisters. The posts require people in sympathy with this kind of work as a piece of practical Christian service. Salary at mission rates: single £306, married £630 per annum, free housing and fare to and from Gaza.—Medical Superintendent, Church Missionary Society, 6, Salisbury Square, London, E.C.4. (4588)

HER MAJESTY'S COLONIAL SERVICE, Trinidad  
MEDICAL OFFICER (Health Department)

Required primarily for duty in the Mental Hospital. Appointment on permanent basis with pension (non-contributory) at the age of 55, or on short-term agreement. Candidates in the National Health Service may resign from the National Health Service but retain their superannuation rights during their time in Trinidad (up to six years) and receive resettlement grants of 20 per cent of the aggregate of their Trinidad salaries on leaving Trinidad at the end of the engagement. Salary scale from B.W.I. \$5,280 to B.W.I. \$5,760 (£1,100 to £1,200) per annum. (One B.W.I. dollar equals 4s. 2d.). Starting salary according to age, qualifications and experience. Pension is earned at the rate of 1/600th of the final pensionable emoluments for each completed month of service. Medical officers in the Colonial Service are eligible for promotion to pensionable posts with salaries above this scale, both within Trinidad and in other Colonial territories. Quarters not provided but house allowance may be given in some circumstances. Free passages on first appointment provided for officer and family not exceeding five persons in all, also free passages on leave subject to a maximum of three adult fares. Income tax at local rates. Local leave permissible and generous home leave granted after each three year tour. Educational facilities available. Candidates must possess qualifications registrable in the United Kingdom. They should also possess the Diploma in Psychological Medicine and have had at least three years postgraduate experience in the practice of psychological medicine, two of which should have been spent working in a mental hospital. Application forms from Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/93). (4609)

For Nervous and Mental Disorders

**President:** The Earl Spencer. **Medical Supt.:** Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided. **WANTAGE HOUSE.**—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

**MOULTON PARK.**—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

**BRYN-Y-NEUADD HALL.**—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

**DOUBLE CENTURY**

"Double Century" is the sherry of all sherries. Some are too dry; some too sweet. "Double Century" is a sherry to suit all tastes, selected specially to celebrate the 200th birthday of the famous house of Pedro Domecq.

Try a bottle or a glass today and see if you ever tasted such a lovely wine.
