It's not the first cost that matters.....

When buying syringes, quality and the cost of replacements must be taken into account. Though 'Plim' syringes cost more at first than the ordinary kind, they are far more economical in the long run. For these reasons:

1, The strong protective metal casing of the glass barrel reduces breakage to a minimum.

2. If breakage does occur, you need replace only the barrel and piston, instead of buying a complete syringe. This means a saving of about 50 per cent. compared with ordinary syringes.

Apart from the economy of 'Plim' syringes, they possess other important features:

Perfect fit of piston to barrel Accurate calibration · Precision manufacture Individually-fitted pistons · No solder or cement Sterilisation up to 250C.

SIZES: 1, 2, 5, 10 and 20 c.c. INTERCHANGEABLE NEEDLE FITTINGS Record, Luer and all other types. Side and central.

'HYALASE'....

a preparation of the enzyme hyaluronidase extensively employed as an aid to subcutaneous rehydration therapy is of particular value in infants.

Benger Laboratories

'Hyalase' is also widely used to facilitate local anaesthesia in obstetric and orthopaedic practice and has recently been found of value in plastic surgery.

Details of these and other applications are obtainable on request.

is available in bottles of 20 and 100 capsules. Original prescriptions should specify no more than 20 capsules since this quantity is usually sufficient for complete control. Dosage: one capsule 30 to 45 minutes before meals in the usual case; may be increased to 2 to 3 capsules in exceptionally severe

For the 50% of pregnant women who suffer gastric distress, NIDOXITAL provides rapid relief. In almost all patients treated with NIDOXITAL, symptoms disappear within one to three days.*

Nidoxital

is rational therapy

Since the problem is complex, NIDOXITAL provides five effective agents for a full range of therapeutic and prophylactic action:

Benzocaine — to diminish gastric excitability

Nicotinamide — to reduce excessive peristalsis

Pentobarbital sodium — to depress central excitability

dl-Methionine — to support normal liver function

Pyridoxine — for fatty acid and protein metabolism,

maintenance of nerve function and erythropoiesis. Pyridoxine is reported by many clinicians to have a favourable effect in nausea and vomiting of pregnancy and is a firmly established agent in treatment of this condition.

FENOX

A major advance in the local treatment of the common cold and other catarrhal conditions of the nasal passages and accessory sinuses

The nasal vasoconstrictor of choice with all these advantages:

- 1 Two-stage vasoconstriction immediate and prolonged without secondary vasodilatation.
- 2 Water miscible and non-oily no interference with ciliary action and no danger of lipoid pneumonia.
- 3 Remains at the site of action—same viscosity as mucus.
- 4 Non-irritant pH adjusted and isotonic with nasal secretion.

- 5 Readily absorbed by the mucosa low surface tension.
- 6 Suitable for both adults and children.

Fenox Compound Isotonic Nasal Drops of Phenylephrine and Naphazoline. Supplied in ½ fl. oz. dropper bottles. Net price in Gt. Britain to the Medical Profession 2/1½d.

Descriptive literature and patients' direction pads available from The Medical Dept., Boots Pure Drug Co. Ltd., Nottingham, England.

Cold Front

THE BELIEF that there is a close relationship between a change in the weather and the onset of colds was recorded by Hippocrates more than 2,500 years ago. Today, such beliefs have been confirmed by large scale observations which have shown that colds, sore throats, and acute tonsillitis almost always occur in the wake of a "cold front."

Normal nasal function is easily upset by chilling, with consequent loss in local defence, so that the precept "keep warm" is not without foundation.

The use of 'ENDRINE' in conjunction with general measures is also rational as it not only brings great relief to the patient but also allows free drainage of purulent secretions—of great importance in the avoidance of complications.

'ENDRINE' is available in three varieties: Ordinary (0.75% Ephedrine), Mild (0.5% Ephedrine) and Isotonic (0.5% Ephedrine Hydrochloride).

'ENDRINE' Nasal Compound

Prevention of Dressing Trauma

Jelonet is a dressing for all wounds—its non-adherent properties protect the delicate epithelium and prevent dressing trauma, enabling healing to continue undisturbed. It is used extensively in the treatment of burns and as a dressing following skin-grafting operations. It is non-toxic and compatible with Penicillin and all other antibiotics, and may be used as a means of drainage, or as a packing for deep granulating wounds. It may also be used as an adjuvant in the treatment of varicose ulcers by compression bandaging, and as a means of protecting the skin from irritating discharges. Jelonet may be prescribed by name under the N.H.S.

(Form E.C.10) in the following sizes:— single pieces in envelopes, tins containing

Humanised Trufood is different. It is not an ordinary dried cow's milk. Cow's milk is certainly the raw material used but the finished product is much more than dried cow's milk: it is a special food, specifically designed to meet the nutritional needs of the growing infant. Moreover Trufood is dried by the spray process, keeping the fat as a fine, well diffused emulsion and ensuring greater solubility.

If you would like to know more about Trufood how it is made, and why we think that it is the most satisfactory substitute for breast milkwrite to Trufood Ltd., Professional Information Service, Green Bank, London, E.1.

reduction in estrogen dosage to be made; thus undesirable side effects such as breast turgidity and pelvic congestion are avoided and the risk of withdrawal bleeding is reduced.

An increased feeling of confidence and well-being is produced which is both mental and physical.

Dosage: Menopause—2 to 6 tablets daily. Pre-menstrual tension and dysmenorrhæa—2 tablets daily from 10th to 22nd day of menstrual cycle.

Dietary Essentials

A good diet must obviously provide all the necessary nutrients and it is also important that these should be presented in a palatable form. The vitamins, which are essential for good health, may sometimes be neglected.

As a source of the B vitamins, Marmite is particularly useful, since it contains most of the factors of this group and also because it supplies them in a form that is appetizing. It is popular with children, whose special need for these vitamins has been emphasized.

AN IMPROVED FORM OF GLUCOSE THERAPY

New Peptic Ulcer Treatment Comparable to Drip Therapy

Whole milk and alkaline constituents combine to produce increased buffering action

Nulacin tablets have been evolved to meet a very real need in the treatment of gastric and duodenal ulcers.

All the literature on the treatment of peptic ulcers emphasizes the proven value of diminishing the acidity of the gastric juice. Many large and otherwise intractable ulcers can be healed by a continuous, intragastric drip of milk or alkali.

Drip therapy is, however, not always available, nor is it practicable to use it in many instances. Nulacin offers a satisfactory alternative.

Continuous Neutralization

A NULACIN TABLET allowed to dissolve slowly in the mouth has been shown clinically to provide a continuous neutralization comparable with that of drip therapy.

NULACIN TABLETS contain nutrient in a most acceptable form to the peptic ulcer patient. Nulacin tablets obviate the necessity of taking frequent feeds, and so lessen the tendency to obesity which must inevitably occur in those who are following a dietary regime of food at frequent intervals.

During ulcer activity the suggested dosage is 3 tablets to be sucked each hour, and for follow-up treatment 2 tablets should be sucked between meals, beginning half an hour after a meal.

The tablet is of a suitable size, and of a consistency and hardness, so that, when it is sucked, the result is a constant and prolonged neutralization of the gastric juice.

NULACIN TABLETS are extremely palatable, and during extensive clinical tests their taste has proved to be particularly acceptable to patients.

The patient should be instructed to place the tablet between the gum of the upper jaw and the cheek. Here it will be comfortable, and slowly dissolve. The efficacy of the tablet is greatly diminished if it is chewed and swallowed.

NULACIN TABLETS are not advertised to the public. There is no B.P. equivalent to this tablet.

NULACIN TABLETS are prepared from whole milk combined with dextrins and maltose.

NULACIN TABLETS are at present packed in bottles of 100 and tubes of 12.

From November 1st. a dispensing unit of 25 tablets will also be available, free of purchase tax.

NULACIN

GASTRIC ANALYSIS

The same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

HORLICKS LIMITED, PHARMACEUTICAL DIVISION, SLOUGH, BUCKS.

Development in Diathermy

Improvements suggested by diathermy experience in scores of hospitals make the new Marconi Surgical Diathermy an instrument of great efficiency and safety. Individual electronic circuits are pre-selected by footswitch for cutting or coagulation, with independent continuously-variable controls giving maximum cutting intensities up to 300 watts.

The Cautery-Light unit, with three quite separate output circuits, gives adequate power for cautery and provides a controlled-voltage supply for surgeons' and other lamps. In the Endoscope circuit, of the 'intrinsically safe' type, limiting resistors minimise risk due to faults in endoscopes or leads. All three circuits are screened and earth-free, ensuring safety and reliability.

In a cream enamelled cabinet on rubber-tyred castors, the new TF 972 Surgical Diathermy is especially compact, versatile and simple to operate.

Prescribing a Laxative

When the Physician is called upon to prescribe a laxative for prolonged or occasional use, Andrews merits special consideration. Andrews is pleasant tasting. Its effervescence has a refreshing quality that makes it an acceptable draught. Andrews causes no griping or discomfort. Its laxative action is due to the presence of magnesium sulphate and other salts in balanced proportion, which, acting by osmosis, induce easy, painless evacuation. Andrews is particularly suitable for patients liable to digestive upsets. It allays gastric discomfort and nausea. It also improves the flow of bile, and helps to check biliousness and sick headaches. No costive reaction results when Andrews is discontinued.

Active constituents:

Tartaric Acid . . 24,600% 25,142% 25,142% 19,000% Sodium Bicarbonate Magnesium Sulphate (B.P.C. Exsicc.)

UAEGER

Jaeger body-belts are made of pure wool, for these reasons. Wool keeps its wearer cool in summer, warm in winter. Wool disposes quickly of perspiration, retaining body warmth. Wool, being porous, allows both the escape of exhalations from the skin, and the access of pure air to the skin. Jaeger body-belts sit well, stay in position, and give support without pressure. They are available in all sizes.

JAEGER HOUSE, 204-206 REGENT STREET, W.I

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given. Canvassing in any form will disqualify.

*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of recruitment for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee and in Scotland) the Scottish Central Medical Recruitment Committee and a Second House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to a Third House Officer post (£450 per annum).

Under present arrangements in Eng'and and Wales the C.M.R.C. normally allows an "R" practitioner to proceed directly from a Second House Officer post to a Senior House Officer post (£670 per annum) for one year, but this practice will be discontinued on January 1, 1953.

An "R" practitioner who completes six months in a Second House Officer post on or after January 1, 1953, will require the special written permission of the C.M.R.C. or Scottish C.M.R.C. to proceed to any further post.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF Registrar Grades, Whole-time

(a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year: £890 per annum in the second and any subsequent years.

(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year: £1,100 per annum in the second year: £1,200 per annum in the third year: £1,300 per annum in any subsequent years.

Other Grades, Whole-time

Other Grades, Whole-time

(a) HOUSE OFFICER: £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the tate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) SENIOR HOUSE OFFICER: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

SERVICES

CIVILIAN SPECIALISTS FOR THE ARMY OVERSEAS

CIVILIAN SPECIALISTS FOR THE ARMY OVERSEAS

Immediate applications are invited from men and women for appointment as CIVILIAN SPECIALISTS

in Anaesthetics, Obstetrics, Ophthalmology, Otolaryngology, Pathology, Radiology, and Surgery, for service with the R.A.M.C. overseas. Full particulars and application forms can be obtained from the Under Secretary of State, The War Office (AMD 1), Lansdowne House, Berkely Square, London, W.1 (tel.: GRO 8040, Ext. 548). Salary is at the rate of £1,800 or £2,200 per annum. To qualify for £2,200 per annum an applicant must be experienced in the practice of his specialty and must hold the higher qualification in the specialist subject. In addition, except in Germany and Austria, where different arrangements apply, a tax free Foreign Service allowance is paid to meet the extra cost of living, at the duty station. Foreign service allowance varies, according to the duty station and the status of the applicant, between £25 and £191 for single men and women and £90 and £365 for married men. An initial outfit allowance of up to £30 is paid, except for stations in Western Europe. Leave of 36 days a year may be granted. Engagements will be for eighteen months, all to be spent overseas, with possible extension of a further six months. Superannuation payments under the National Health Service can be continued if desired with the War Department paying employer's contribution, and pension rights under that service are thus retained. Service with the War Department counts for incremental purposes on re-employment under the N.H.S. Free accommodation, and in some areas free rations, is provided for single individuals, but official accommodation and payment of passages for families are the responsibility of the employee. of the employee
