

Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room. Prepared without seasoning, it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

'VIULES'

Single-dose injections in disposable cartridges

A new and improved injection technique has been made possible by 'Viules', medical cartridges which have been introduced after considerable research and experiment by BOOTS PURE DRUG CO. LTD.

'Viules' are single-dose containers of stable sterile preparations and consist of a cylinder of special glass sealed at both ends by rubber diaphragms; when inserted in a special all-metal syringe, one diaphragm acts as a plunger and the solution is expelled by means of a piercer needle through the other diaphragm. The cartridge is, therefore, essentially a disposable syringe barrel containing the sterile solution ready for injection, and offers the following advantages over conventional injection technique and at no greater expense:—

1. Ready for immediate use.
2. No syringe breakage.
3. Sterilization procedures reduced to a minimum.
4. Ease of injection.
5. Ideal in emergency.

The introduction of 'Viules' is a significant advance in the administration of injection solutions. The risk of syringe-transmitted infection is reduced and the cleaning, sterilization and lubrication of glass syringes are obviated.

The drugs available in 'Viules' are as follows:—

Atropine Sulphate; Ergometrine Maleate; Methylamphetamine; Morphine Sulphate; Nicotinamide; Nikethamide; Papaveretum; Papaveretum with Scopolamine; Pethidine Hydrochloride; Pituitary (Posterior Lobe) Extract; Procaine Penicillin (Oily Injection).

CUTS AND GRAZES

Delay in the healing of cuts and grazes is often due to superimposed infection and a dressing which adheres to the wound and causes disturbances of delicate healing tissues.

The OPTULLE dressing consists of a wide mesh gauze impregnated with a petroleum-jelly compound containing Balsam of Peru. After the injured area has been cleansed it should be covered with OPTULLE which is soothing and has been heat sterilised in its container.

OPTULLE is a smooth tulle gras dressing which does not adhere to raw areas. Drainage is effected through the wide mesh gauze and the dressing may be left in situ without frequent changes. When redressing is necessary OPTULLE can be removed without pain or damage to healing tissues or causation of haemorrhage through rupture of fine vessels.

OPTULLE is of especial value in treating cuts and grazes in children.

A SPENCER SUPPORT for Intervertebral Disc

In both conservative and surgical treatment of intervertebral disc, application of a back support is usually indicated.* We invite the surgeons' investigation of Spencer as an adjunct to treatment. Each Spencer is *individually designed, cut and made* for each patient—after a description of the patient's body and posture has been recorded and detailed measurements taken. Thus, individual support requirements are accurately met. The Spencer Spinal Supports shown incorporating rigid Spinal Braces were individually designed for both man and woman patients. Note exterior pelvic binder for added pelvic stability.

**PROTEOLYSED
LIVER
THERAPY**

DURING RECENT YEARS, the outstanding value of Hepamino (Proteolysed Liver) in all macrocytic anæmias caused by a deficiency of the anti-anæmia factors of liver, has been confirmed and accepted. Proteolysed liver is the only form of liver at present known for the effective control of macrocytic anæmia of the refractory type. It contains in a readily assimilable form some hæmatopoietic factor additional to the anti-anæmia factor present

in fractionated liver extracts. There are present in Hepamino at least two unknown growth substances for certain bacteria which are distinct from Folic Acid, Vitamin B₁₂ and Streptogenin.

Oral 'PYRIDIUM'

'Pyridium', taken by mouth, produces local analgesia of the urogenital mucous membrane, often within twenty minutes of the first dose.

This is due to direct action on the mucosa, and there is no sedation or narcosis.

'Pyridium' is indicated for the relief of such symptoms as painful or scalding micturition, frequency, urgency, and strangury.

In therapeutic dosage, two tablets t.i.d. for an adult, 'Pyridium' is non-toxic and offers gratifying relief in most cases of irritation or infection of the urogenital tract.

Fundamentals

PEPSIN AND ACID, although not the ultimate cause of peptic ulcer, create the corrosive medium which prevents the healing of the ulcer and jointly make possible its continuance and recurrence. The fundamental factor is, therefore, to control the action of pepsin in a highly acid medium and create an environment which permits the ulcer to heal.

Gastric corrosion can be stopped instantly by 'ALUDROX' therapy, which neutralises excess acid and partially inactivates pepsin but leaves the stomach in a sufficiently acid condition to allow normal protein digestion. 'ALUDROX' promptly relieves pain and in conjunction with a bland diet and rest ensures rapid healing of the ulcer.

'ALUDROX' is available in two forms: as an amphoteric gel (consisting of Aluminium Hydroxide Gel B.P.C. suitably flavoured and preserved) in 6 oz. and 12 oz. bottles and as tablets (each tablet containing dried Aluminium Hydroxide Gel B.P.C. 13 gr.) in boxes of 60.

For suppression of severe cough

'Physeptone' depresses the cough reflex in a manner comparable with that of diamorphine. It may therefore be prescribed with advantage for those cases of persistent cough which would normally be given diamorphine.

For this purpose, 'Physeptone' Linctus is issued containing 2 mgm. of Amidone Hydrochloride in each fluid drachm. The average adult dose is one teaspoonful (2 mgm.) every three or four hours, and this will control nearly every cough.

For children 'Physeptone' Linctus should be diluted with simple syrup in the proportion of one part linctus and seven parts syrup. One to two teaspoonfuls (0.25 - 0.5 mgm.) of this *diluted* linctus to be given according to the age of the child.

TERRA FIRMA

The treatment of hæmorrhoids rests on solid therapeutic grounds when it achieves relief without resort to narcotic or anæsthetic agents; these may mask the symptoms of more serious pathological conditions. Anusol* Suppositories give relief that is completely safe through decongestion, lubrication and protection. They remove inflam-

matory pressure on the nerve endings, soothe irritation and guard against the complications of bleeding and infection.

Another notable feature of Anusol Suppositories is the economy of the treatment. It is an impressive fact that Anusol Suppositories, dispensed from bulk by a chemist, are less expensive than their National Formulary equivalent. Anusol Suppositories may be confidently prescribed in the knowledge that they represent a most reliable and economical treatment for all uncomplicated hæmorrhoidal conditions.

soluble aspirin with
codeine phosphate and phenacetin

Codis presents a familiar grouping of analgesic drugs; aspirin, phenacetin, codeine phosphate; with an important advantage. The "aspirin" in Codis is rendered soluble, as in 'Solprin'.

Placed, uncrushed, in water, a Codis tablet disperses in a matter of seconds to form a solution of calcium aspirin and codeine phosphate with finely suspended phenacetin. The chance of irritation of the gastric mucosa by undissolved particles of aspirin is thus minimised.

Codis is recommended for all those conditions for which Tab. Codein. Co. B.P. would be prescribed. It has the added advantages of greater ease of administration and far less likelihood of aspirin intolerance, while the rapid absorption of the soluble aspirin promotes prompt relief.

COMPOSITION

Each Codis tablet contains:—Acid Acetylsalicyl. B.P. 4 grs., Phenacet. B.P. 4 grs., Codeine Phosph. B.P. 0.125 grs., Calc. Carb. B.P. 1.2 grs., Acid. Cit. B.P. (Exsic) 0.4 grs., Excip ad. 11.45 grs.

GLAXO PERTUSSIS VACCINES

Against the common cold . . .

Mounting evidence confirms that Cold Dissolved Vaccine *Glaxo* can confer a useful degree of protection against the common cold. For immunisation, three injections at weekly intervals are normally sufficient. For treatment, the course can be condensed into 2 or 3 days without risk of undue reaction. **COLD (Anti-catarrhal) DISSOLVED VACCINE *Glaxo*** 5 cc. vials

Results of the M.R.C. whooping cough trials confirm that a pertussis vaccine prepared strictly in accordance with present-day knowledge will secure a high immunity response.

Glaxo Laboratories have devoted more than 10 years' research to perfecting the techniques used in the manufacture of pertussis vaccines.

Today, the plain suspended vaccine (now so widely preferred) is available from Glaxo, alone and combined with diphtheria toxoid. Both preparations can be given subcutaneously or intramuscularly.

Notes on High-Protein Diets

(4)

TREATMENT OF BURNS

Anorexia after Shock

With burned patients, loss of appetite after the shock stage is common experience, and it is often difficult to get the patient to take food. If enough protein can be given at this stage, appetite can be restored and the patient will begin to take ordinary meals once again. To balance the gross wasting associated with burns the amount of protein given must be high. For instance, a severely burned patient may need up to five times as much daily protein as a healthy man or woman. The difficulty of providing these large amounts of protein within the limitations of today's diet is well known. How then can such a high-protein diet best be maintained today?

The Value of the Sanatogen Method

One of the best and simplest solutions for the practitioner is to use Sanatogen concentrated protein supplement to provide the required high-protein diet. Sanatogen contains 95% casein combined with 5% sodium glycerophosphate. The normal dosage provides the patient with at least 24 grams a

day of first-class protein of high biological value. By increasing this dosage the physician can adjust the daily protein intake to whatever level he thinks advisable, to combat gross wasting in the burned patient. In addition, the glycerophosphate content of Sanatogen has a helpful tonic effect on the appetite.

Simple to Administer — Easily Digested

Sanatogen is simple to administer, bland, easily digested and readily absorbed by patients whose digestive faculties have been impaired by shock. It may be mixed as a hot or cold drink, sprinkled on food or mixed in cooked dishes.

Practitioners who wish to carry out their own clinical tests with Sanatogen will be given every help. Please write to the Medical Department, Genatosan Ltd., Loughborough, Leicestershire, for further information and medical samples.

The Lily—the symbol of Purity

The definition of "Purity" is:—

"Complete freedom from mixture of any kind". This faithfully describes "Simple" Soap which is of natural colour, and guaranteed to contain no Aniline Dyes, Perfumes, or Fillings such as Titanium—not even animal fat—as these, Dermatologists and scientists have established, are often the causes of bad skins, setting up or aggravating Dermatitis. Many Dermatologists and doctors are recommending "Simple" Soap to patients whose skins are allergic to ordinary soaps, and as a non-medicated cleansing agent for troublesome skin conditions.

"Simple" Soap makes no claims to medication—its purity is its only claim to distinction.

EPHAZONE tablets

Rational, symptomatic treatment in Asthma & Bronchitis

Each tablet contains Ephedrine, the important antispasmodic for bronchial spasm, Theobromine, for its relaxing effect on the bronchial muscle and for stimulation of the coronary circulation, Phenazone, for its soothing effect on the higher centres, and Calcium gluconate, a readily absorbable calcium salt, for diminishing capillary permeability and checking the secretion of mucus.

These active ingredients with complementary effects in bronchial asthma are presented in the following proportions in the 'EPHAZONE' Tablet:

Ephedrine hydrochloride	- - -	$\frac{1}{2}$ grain
Theobromine	- - -	$\frac{1}{2}$ grain
Phenazone	- - -	1 grain
Calcium gluconate	- - -	$\frac{1}{2}$ grain

This preparation is sanctioned for prescription under N.H.S. Please write for samples and descriptive leaflet.

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

A New Approach to the Treatment of Coughs:

How CETAMIUM in New Vick Cough Syrup increases the effectiveness of known and tried medicaments

Nature and Action of Cetamium

Cetamium is a quaternary ammonium salt known chemically as cetylpyridinium chloride. It is best known as a compound with high bactericidal activity, but its other important property of lowering surface tension is of special interest in a cough syrup.

Reduced Surface Tension Aids Penetration of Oral Mucosa

The surface tension of Vick Cough Syrup is approximately 43 dynes per square centimetre as compared with that of distilled water, which is 72. This enables the syrup to penetrate into the crypts and crevices of the oral mucosa which water alone, or a normal syrup, will simply bridge over.

More Effective Action of Accepted Medicaments

The inclusion of Cetamium with time-tested, clinically proven expectorants—ammonium chloride, sodium citrate and glycerine—produces a syrup which brings these medicaments into contact with a more extensive area of the throat membranes than they normally reach, thus bringing more relief to irritated tissues where inflammation or infection may exist.

Active Ingredients

Cetamium	0.025%
Ammon. Chlorid.	1.00%
Sod. Cit.	4.00%
Acid Cit.	0.25%
Glycer.	3.75%

Suitable for Children: No Narcotic

Vick Cetamium Cough Syrup contains no narcotics or habit forming drugs. This fact, plus its delicious flavour, makes it particularly suitable for children.

No Nausea

There is evidence to suggest that Cetamium slightly accelerates stomach emptying action. It will be found that the tendency of syrupy expectorant mixtures to induce nausea, particularly in children, is virtually absent. Nor are there any other side effects.

ROYAL AUSTRALIAN AIR FORCE

Conditions of Service for MEDICAL OFFICERS

1. Royal Australian Air Force is offering commissioned rank to suitably qualified male medical practitioners who were eligible and have fulfilled their United Kingdom National Service. Successful applicants will serve as Medical Officers.

2. The duties are at Service Hospitals or R.A.A.F. Stations within Australia and/or overseas and include active clinical work.

3. Hospital experience and facilities for post-graduate work exist in R.A.A.F. Hospitals. Senior consultants and specialists visit these hospitals regularly, and post-graduate experience can be obtained with them and studies continued for high degrees and diplomas.

4. Applicants must be British subjects of substantially European descent. They must be legally qualified medical practitioners entitled to be registered in the Commonwealth of Australia.

5. A candidate with former commissioned service in any of Her Majesty's Forces will be considered for

appointment in either his former rank or such other rank as may be commensurate with his qualifications, experience, and other attributes. For candidates lacking former commissioned service, the minimum rank on appointment will be Flight Lieutenant, though a higher rank may be determined, depending upon his qualifications, experience, age, and other attributes for service in the R.A.A.F.

6. Duration of a short service commission is four years. On completion of the initial engagement an extension of three years may be granted and promotion subject to Service requirements.

7. An officer serving on an extended short service appointment is eligible for appointment to a permanent commission.

8. Medical Officers appointed to permanent commissions may be granted up to 12 months' leave on full pay after six years' service. The purpose of this leave is to enable them to pursue special

medical training, including study for post-graduate diplomas.

9. A pension scheme is available which provides a generous retiring allowance and also covers invalidity or death during Service.

Officers who reach retiring age for rank held will receive benefits as follows:

20 years' service completed—Full pension.

15 " " " —Pro rata pension according to years completed.

10 " " " —Gratuity of 150% of contributions.

10. Rates of retirement ages and allowances are supplied on application.

11. PAY AND ALLOWANCES.

The following is the table of annual rates of pay and allowances for Medical Officers of the Royal Australian Air Force. All these rates are in Australian currency.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

Deferment of recruitment for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to a Third House Officer post (£450 per annum).

Under present arrangements in England and Wales the C.M.R.C. normally allows an "R" practitioner to proceed directly from a Second House Officer post to a Senior House Officer post (£670 per annum) for one year, but this practice will be discontinued on January 1, 1953. An "R" practitioner who completes six months in a Second House Officer post on or after January 1, 1953, will require the special written permission of the C.M.R.C. or Scottish C.M.R.C. to proceed to any further post.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

Pleasurable relaxation

In addition to the established use of Myanesin Elixir in the treatment of neurological conditions associated with muscular rigidity and tremor it has now been successfully employed in the relief of psychological states characterised by anxiety and tension.

Amer. J. Med. Sci., 1950, 220, 23 describes a group of patients in which anxiety states and obsessional conditions were

present and which following the administration of mephenesin, the active constituent of Myanesin Elixir, obtained complete relaxation.

Best results occurred in anxiety states, however chronic, and 47 out of 50 patients treated for this condition improved.

Dosage of from $\frac{1}{4}$ to 1 tablespoonful, one to six times daily, is suggested.

'MYANESIN' ELIXIR

Containing 1 gramme mephenesin in each tablespoonful. Bottles of 8 fl. oz. 6s. 4d.; 40 fl. oz. 26/1d.

Also available 'Myanesin' Tablets each containing 0.5 gramme mephenesin. Bottles of 50 at 9/8d.
