OXFORD UNIVERSITY PRESS

CONTROLLED

Prompt measures to counter the distress of persistent coughing are well-merited. Taoryl - a recently introduced, powerful antispasmodic in tablet form - combines peripheral sedation with a selective inhibitory action on the cough centre. Safe to use for long periods without addiction, it provides highly effective therapy in all cases of irritant and spasmodic cough. It is comparatively non-toxic, free from side effects in normal dosage, and readily administered to children.

Literature and clinical sample on request Bottles of 20 and 200 tablets. Prescribable on N.H.S. Form E.C.10

Bis [1-(carbo-β-diethylaminoethoxy)-1-phenylcyclopentanel-ethane disulphonate.

New porous

MADE BY T. J. SMITH AND NEPHEW LIMITED . NEPTUNE STREET . HULL

Elastoplast

THIS IMPROVED ELASTOPLAST IS NOW BEING SUPPLIED TO HOSPITALS

T. J. Smith & Nephew announce that they have now completed two years of extensive clinical trials of their new Porous Adhesive Elastoplast bandages and extension plasters. Results confirm that this new porous adhesive largely overcomes skin reaction to occlusion, which some patients experience beneath fully spread adhesive bandages, by permitting free evaporation of sweat and minimizing epidermal keratinisation produced by the stimulating effect of the adhesive.

Porous Elastoplast bandages and extension plasters are now being supplied to hospitals and, as production increases, will be available to the medical profession as a whole. Prices are the same as the normal spread Elastoplast bandages.

Points about Porous Elastoplast

- I Porous throughout whole surface of the bandage, allowing free evaporation of sweat and minimizing blockage of sweat-duct ostia.
- **2** The ideal compression and grip of Elastoplast is wholly maintained because there is no loss of stretch, regain or adhesive qualities.
- **3** Adhesive not spread to edges of bandage to minimize rucking and soiling of clothes.
- **4** Fluffy edges eliminate localised 'hard' compression preventing trauma to devitalised skin.
- **5** The name of the improved Elastoplast is 'Porous Adhesive Elastoplast'.

For further details write to the Medical Division of T. J. Smith & Nephew Ltd., Hull.

Elastoplast POROUS ADHESIVE BANDAGES

THE SYRINGING OF EARS UNDER PRESSURE CAN NOW BE AVOIDED

CERUMOL

ear drops break up and dissolve impacted wax in the external auditory meatus.

THE STORY OF ANTI-BIOTICS

by

SIR HOWARD FLOREY

Professor of Pathology in the University of Oxford

Joint Nobel Prize-Winner (with Sir Alexander Fleming & Dr. E. B. Chain) for work on Penicillin

Sir Howard Florey has written for *The Sunday Times* the most authoritative account, in a brief compass, of the early discoveries of anti-biotics, the isolation and proving of penicillin, and the continuing work on new systemic chemo-therapeutical agents.

Sir Howard, one of the world's acknowledged experts in this field, considers such problems as secondary reactions in clinical use, the emergence of resistant strains, and the potentialities of anti-biotics in tuberculosis and virus and fungal diseases.

The first article will appear next Sunday in the

HYPON TABLETS

Rapid Disintegration

Tablet manufacture is the art of compounding to produce a ready means of administering an accurate dosage in the most convenient form. In the case of an analgesic tablet it is important that this should disintegrate rapidly to provide quick relief from pain.

To comply with the British Pharmacopæia tablets must disintegrate within fifteen minutes under standard tests.

Prescribe HYPON TABLETS by name

* HYPON TABLETS, when submitted to these tests, disintegrate in less than twenty seconds.

Containing the well-known triad acetylsalicylic acid, phenacetin and codeine with the addition of phenolphthalein and caffeine to counteract side effects of depression and constipation, HYPON TABLETS provide a most effective analgesic for the relief of pain associated with rheumatic conditions, spastic dysmenorrhœa and neuralgia.

FORMULA: Acid. Acetylsalicyl. 40,22%; Phenacet. 48.00%; Caffein. 2.00%; Codein. Phosph. B.P. 0.99%; Phenolphthal. 1.04%; Excip. 7.75%. (Each tablet 8 grains.)

PACKS: 10, 50, 125, 250, 600 and 1,000.

'Thiomerin'

SODIUM

(MERCAPTOMERIN SODIUM)

THE NEW MERCURIAL DIURETIC FOR SUBCUTANEOUS INJECTION

'Thiomerin' differs from other mercurial diuretics in that the mercury is in combination with an organic group plus another compound—sodium thioglycollate, which has a marked detoxicating action on the mercury. The volume of urine excreted is mainly determined by the size and frequency of the injections. Intravenous injections merely speed up the process by a few hours but have no effect on the final weight loss. 'Thiomerin' diuresis induced by subcutaneous injection (0.5 to 2 cc) is

gentle, slower in onset but equal in output to that of any other mercurial, however administered. The patient benefits, both from a painless injection and because less frequent bladder emptying, especially at night, permits muchneeded rest and imposes less strain.

Thiomerin' is indicated in
Cardiac Oedema (peripheral or pulmonary)
Nephritic Oedema Ascites of Liver Disease
Carefully selected cases of Subacute and Chronic Nephritis
PACKING—'Thiomerin' is supplied in vials of 1.4 G, to which the addition of 10 cc. Water for Injection, B.P. will provide a solution containing the equivalent of 40 mg. Mercury per cc.

'THIOMERIN' SODIUM

JOHN WYETH & BROTHER LIMITED, CLIFTON HOUSE, EUSTON ROAD, LONDON, N.W.1

Soothing the cough that causes insomnia

IN TRACHEITIS and bronchitis the sleeplessness caused by a persistent, unproductive cough can be very exhausting. Tusana Cocillana Cough Linctus is very valuable in such cases. It provides a blend of expectorants to loosen the tenacious mucus in the upper air passages and the central sedative, codeine, to depress the cough reflex.

By breaking the vicious circle of coughing

and irritation, Tusana allows the patient to sleep and gather strength for recovery. The tendency of codeine to cause constipation is offset by the inclusion of a little extract of senna in the formula.

> Supplied in bottles of 4 fl. oz. - 2/10½d. and 20 fl. oz. - 10/7½d. Net prices in Gt. Britain to the Medical Profession.

'VASYLOX'

A New Nasal Decongestant

In the common cold and most forms of rhinitis, 'Vasylox' brand Solution of Methoxamine Hydrochloride* relieves congestion rapidly and for long periods. Even in allergic patients, unresponsive to other nasal therapy, its firm but gentle action frequently restores free breathing. It does not interfere with normal ciliary activity, nor cause stimulation of the central nervous system. Non-stinging and non-irritant, pleasant to use and of agreeable aroma, it can be recommended equally for infants, children and adults.

'Vasylox', which contains 0.25 per cent of methoxamine hydrochloride, is a stabilised isotonic solution. It is supplied in bottles of $\frac{1}{2}$ fl. oz., each with an individual dropper.

*β-hydroxy-β-(2:5-dimethoxyphenyl)-isopropylamine hydrochloride

A carefully-manufactured and dependable bitter tonic which will improve muscular tone and nutrition, and provide

limited respiratory and vasomotor stimulation. A reliable compound prescribed in many countries for upwards of 60 years.

Manufactured in England by

FASSETT AND JOHNSON LTD.

86, Clerkenwell Road, London, E.C.I for: Fellows Medical Mfg. Company, Ltd.

In the treatment of the common cold

'SULFEX' provides

- ... relief from nasal congestion
- ... prophylaxis against secondary bacterial infection . . .

The common cold is frequently the precursor of bacterial infections of the upper respiratory tract, and the primary virus often deprives its victims of the power to withstand secondary bacterial invasion.

'Sulfex' is a valuable ally in controlling or averting secondary infection. It promptly and effectively relieves nasal congestion, without giving rise to secondary reactions, and ensures adequate ventilation and drainage. The bacteriostatic action of the 'Mickraform' crystals of free sulphathiazole often aborts secondary bacterial infection and thus tends to avert the onset of dangerous complications.

Issued in 1-oz. bottles with dropper

'SULFEX'

Vasoconstriction in minutesbacteriostasis for hours

An aqueous suspension of micro-crystalline ('Mickraform') sulphathiazole, 5%, in an isotonic solution of Paredrinex' 1% (ph 5-5 to 6-5).

FIGHTS PEAK 'RISK' PERIODS WITH PEAK LEVELS

As we enter the peak season for suppurating lung troubles, how important to remember that ESTOPEN enters the lung in peak levels. No other form of penicillin can match its capacity for focusing penicillin in the lungs . . . none will so consistently produce at this site the high concentrations needed to combat bronchitis, bronchiectasis, pneumonia, pleurisy, pulmonary abscess and other acute or chronic respiratory conditions.

Today's most powerful weapon against lung infections **ESTOP**

LTD., GREENFORD,

In addition to the established use of Myanesin Elixir in the treatment of neurological conditions associated with muscular rigidity and tremor it has now been successfully employed in the relief of psychological states characterised by anxiety and tension.

Amer. J. Med. Sci., 1950, 220, 23 describes a group of patients in which anxiety states and obsessional conditions were present and which following the administration of mephenesin, the active constituent of Myanesin Elixir, obtained complete relaxation.

Best results occurred in anxiety states, however chronic, and 47 out of 50 patients treated for this condition improved.

Dosage of from 1 to 1 tablespoonful, one to six times daily, is suggested.

Containing 1 gramme mephenesin in each tablespoonful. Bottles of 8 fl. oz. 6s. 4d.; 40 fl. oz. 26/1d. Also available 'Myanesin' Tablets each containing 0.5 gramme mephenesin. Bottles of 50 at 9/8d. Prices in Great Britain to the Medical Profession.

Influenza Peak

The Influenza deaths graph follows a consistent pattern; maintaining a low but steady level for nearly nine months of the

year. Between December and February the graph rises sharply . . . in an epidemic year into hundreds of deaths a week.

The busy doctor, whether he is overburdened with the demands of an epidemic or is simply faced with a seasonal increase in 'flu cases, naturally looks for an analgesic and sedative with proved antipyretic effect.

Veganin*, containing 1/6th of a grain of codeine phosphate together with acetylsalicylic acid and phenacetin, has long been accepted as the analgesic, sedative and antipyretic of choice. Its disintegration rate of 10 seconds ensures rapid action.

Each tablet contains w/w Acid Acetylsalicyl 32.68%, Phenacet. 32.68%, Codeine 0.99%, Excipient ad.100.00%.

packages of 100 and 500 for dispensing only. Not subject to Purchase Tax when used on prescription either private or N.H.S.

VEGANIN HAS NEVER BEEN ADVERTISED TO THE PUBLIC

William R. WARNER and Co., Ltd. Power Road, London W.4.

Treatment at depth . . . in vaginal infections

With the recent introduction of a Vaginal Cream to the Penotrane range of products—the merit of this powerful antiseptic compound in vaginal therapy becomes even more significant. Bactericidal and

mycoticidal in effect, also deeply penetrative, Penotrane can now be applied generally, by pessaries, and to the actual site of infection by use of the cream. Penotrane is not inactivated in the presence of blood, pus or serum and its value in the treatment of vaginitis, particularly of trichomonal or monilial origin, is well-established. Resistance of the infecting organisms to Penotrane is not built up, as so often happens with some antibiotics and sulpha drugs.

PENOTRANE VAGINAL CREAM

Non-greasy and pleasant in use, contains Penotrane 0.075% with a carbohydrate—pH adjusted to 4.5. Special disposable applicators ensure satisfactory spread and correct dosage.

PENOTRANE PESSARIES

Contain 0.02% Penotrane. Ideal for convenient systematic therapy, their continued, periodic use has proved invaluable in preventing relapses.

Penotrane Vaginal Cream is supplied in 2-oz. tubes; the Disposable Applicators in cartons of 14 and Penotrane Pessaries in boxes of 15 and 100.

Makers of Ekammon for Safer Salicylate Therapy

An Effective Antacid of established value

Immediate neutralization of gastric acid, yet unaccompanied by the

disadvantages arising from carbonate medication, clearly indicates the clinical superiority of 'Milk of Magnesia'* as a therapeutic antacid.

Non-systemic in action, 'Milk of Magnesia' may confidently be prescribed in

a wide variety of conditions associated with gastric acid disturbance — from the mild case of dyspepsia to the acute ulcer stage — where intensive alkaline treatment is essential.

'Milk of Magnesia' reacts with the acids of the stomach to form a neutral laxative salt which promotes gentle but effective elimination.

Milk of Magnesia? ANTACID LAXATIVE

Introducing

DORMUPAX

AN IMPROVED BARBITURIC HYPNOTIC OF GOOD COMPATIBILITY AND WIDE THERAPEUTIC MARGIN

The House of Hommel have now made available for general distribution in this country 'DORMUPAX', a strong hypnotic agent whose high efficacy derives primarily from its inclusion of the calcium salt of n-butyl-allyl-barbiturate, presented for the first time in the new product.

FORMULA Each Tablet of 'Dormupax' contains Carbromalum B.P.C.

Sach Tablet of Calcium n-butyl-allyl-barbiturate Carbromalum B.P.C.

3.75 grains 1.5 grains

PHARMACOLOGY Comparative experimental studies show that the therapeutic index of *n-butyl-allyl-barbituric acid* is superior to that of the majority of commonly used barbituric acid derivatives, i.e. of butyl, ethyl, isopropyl and phenyl structure. In animal studies the therapeutic index (DE/DL) is as low as 0.27. It has also been shown that the quotient DE/DL is even more favourable for the calcium salt than for the acid.

The molecule of *n-butyl-allyl-barbituric acid* reaches the sleep centre unchanged. After an average sleep duration of 8 hours, it is completely degraded to an indifferent form. The efficacy of 'Dormupax' is reinforced by carbromalum. The latter is a prompt, safe, medium strength hypnotic which is free from after-effects.

CLINICAL DATA 'Dormupax' has been thoroughly investigated in several mental asylums. Because the dosages are often much above the normal standard in these institutions, which comprise senile, disturbed or schizophrenic persons, the two most important factors for a hypnotic — efficacy and compatibility — could be examined in detail. The results were highly satisfactory. In cases of senile, motor-restless patients the efficacy was very good on dosage of half a tablet in the afternoon and one tablet in the evening. Disagreeable after-effects could not be observed.

Excited insane patients tolerate 4 tablets daily in a course of 2 to 4 days without any deleterious after-effects. For hypertonics the concurrent administration of 'Hyperysin'-Hommel proved to be very effective.

INDICATIONS Insomnia due to psychic causes or pain — Insomnia in cases of various diseases, especially circulatory diseases or arteriosclerosis — Spastic vascular states. In these cases the combination of 'Dormupax' and 'Hyperysin'-Hommel is indicated.

DOSAGE Maximum daily single dose: 2 Tablets; maximum daily dose: 5 Tablets. Further information on dosage supplied in literature on request. PACKS: Standard Tube of 12 Tablets; bottles of 250 (Dispensing). Samples of 'Dormupax' available on personally signed request of physicians only [Sch. IV] from the Medical Dept.

HOMMEL'S HÆMATOGEN & DRUG CO., 121 NORWOOD ROAD, LONDON S.E.24. No Other Hypotensive
Combines these...

Veriloid, a product of Riker Laboratories research, is an alkaloidal extract of hypotensive principles obtained by fractionation from Veratrum viride. It is biologically assayed in mammals using reduction of arterial pressure as the criterion of potency.

TERILOID * IN HYPERTENSION

- 1 Uniformly potent. Its constancy of pharmacological action permits calculation of exact dosage in milligrams . . .
- 2 A unique process of manufacture produces a tablet which dissolves slowly, assuring absorption and action over a considerable period . . .
- 3 Moderates blood pressure by vasorelaxant action independent of vagomotor effect . . .
- **4** No ganglionic or adrenergic blocking...
- 5 Lability of blood pressure, so important in meeting the demands of an active life, is not interfered with; no danger of postural hypotension . . .

- 6 Cardiac output is not reduced ...
- 7 No compromise of renal function . . .
- 8 Cerebral blood flow is not decreased ...
- **9** Tolerance or idiosyncrasy rarely develops . . .
- 10 Hence can be given over long periods with the aim of arresting or lessening progression of hypertension . . .
- 11 Side-effects can be avoided if the dose is properly adjusted . . .
- 12 Produces a prompt and sustained reduction of blood pressure in most forms of hypertension . . .

Veriloid is available as: Veriloid (plain) in tablets of 1 mg. and 2 mg., Veriloid-VP (Veriloid 2 mg. and Phenobarbitone 15 mg.) and Veriloid Intravenous Solution for the treatment of hypertensive crises in encephalopathy and similar conditions. (Tablets are packed in bottles of 100 and 500.)

Why MIXOGEN is prescribed for menopausal symptoms

Because it is now established that:-

- combined male and female hormone treatment is the most effective in this condition.
- the correct balance of the two hormones is essential both for efficacy and economy—determined by extensive clinical trial in the U.K. and unique to Mixogen.
- both the hormones in Mixogen are completely effective when swallowed—thus maximum, immediate relief is given in the simplest and most convenient way.

Dosage: Initially 1-2 tablets daily, reducing when possible.

Packs: Perspex tubes of 25 tablets and bottles of 100, 250 and 500.

Research

The House of Wander continues to maintain its advanced position in pharmaceuticals and quality food products because the standardization of active ingredients during manufacture is backed by careful control and investigation in its extensive Research Laboratories.

In Quality

The Wander Research Laboratories have made useful contributions in the fields of dietetics, nutrition and vitamins. Their wide experience and up-to-date laboratory facilities help to maintain the high quality of Malt Extract and Cod Liver Oil (Wander), the vitamin content of which exceeds that of the analogous B.P. preparations.

The special consideration of physicians when prescribing a malt and oil preparation is that of vitamin values. Comparative studies prove that to prescribe "Wander Brand" is to specify malt extract and cod liver oil of the finest possible

In the Service of Medicine

Careful control and investigation help to maintain "Wander Brand" in the forefront of its class. Moreover, with all its special advantages, "Wander Brand" costs no more than some malt and oil preparations with a lower vitamin content. And since its vitamin content exceeds B.P. standards it may be prescribed without restriction for therapeutic purposes on N.H.S. scripts, thus:

CAR'S INSIDE STORY

Ever actually driven a Javelin yourself?

Maybe you've never been in a 1½ litre saloon that will cruise all day in the 60's and touch 80 when you want. Maybe you never knew what all-round torsion bar suspension could do to bumps, or used a gear change that's so quick and light. Maybe you'd better try the Javelin yourself.

And there's something else—this car's got room behind for men with lanky legs. It's got room for all the family and all the luggage too. You don't feel cramped in a Javelin.

There's a lot built into the Javelin that doesn't really show until you have one in your hands—real family comfort—30 m.p.g. economy—and performance.

The 1953 Javelin has the new Series III engine.

The Javelin Saloon with leather upholstery costs £1,082. 12. 3 (including purchase tax).

1½ litre JOWETT JAVELIN

one day - it has to be YOURS!

The facts about Glucose

Glucose, a term used to include a substance resulting from the partial hydrolysis of starch, is in practice a general description rather than a precise one. It is applied to medical preparations which contain additives that may not always be wanted and to commercial products of varying degrees of refinement. To identify Glucose in its purest form, and only in this form, the term Dextrose is used.

Dextrose, as found in the blood and tissues, is the sugar into which the body converts all carbohydrates. Requiring neither digestion nor chemical alteration, Dextrose is used by the body as a source of immediate energy.

The Dextrose (pure medicinal Glucose) produced by the Pharmaceutical Division of Corn Products Company Limited is prepared in two convenient forms:-

Dextrosol Powdered Glucose

This contains no additives of any kind. It can be taken in large quantities without causing nausea, and should be prescribed in all cases where a patient needs a source of heat and energy with the least demand on the digestion. Packed in 1 lb. & 1 lb. packets.

Dextrosol Karo Glucose Syrup

for Infants and Children

An appetising blend of pure Glucose and selected carbohydrates, carefully balanced to provide the ideal sugar addition to the milk diet of artificially-fed infants. Of special value in cases of nutritional disorder. Spread on rusks, bread, etc., it offers an excellent supplementary source of energy for growing children. Packed in 1 lb. tins and jars which carry recommended feeding tables.

Professional samples of both Dextrosol products will be gladly provided. For further information, doctors are invited to write to the Dextrosol Information Bureau, Wellington House, 125/130 Strand, London, W.C.2.

when nourishment

is the main problem ...

Brand's Essence is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weightreducing diets is especially appreciated by the patient.

Brand's Essence-

PORTABLE INCUBATOR for ambulance work

This achievement makes it possible to move a small or premature baby to hospital in controlled, stable conditions of temperature and oxygen-an undertaking hitherto fraught with difficulty, if not danger. The incubator is easy to handle and operate. It can be rapidly heated from the mains supply and the temperature thermostatically controlled from the batteries (12 v.) of the car or ambulance.

The cylinder carrier shown is detachable from the body of the incubator and can be supplied as an extra.

SECOND VOLUME

QUESTIONS?"

FOR TEN YEARS a number of experts have each week constituted a Brains Trust for answering questions sent to the

BRITISH MEDICAL JOURNAL from all over the world.

The second volume of "Any Questions?" complements the 1st volume, of which 10,000 copies have been sold. Subjects covered lightly in the 1st volume, such as "Marital Problems" and "Immunization," receive more detailed treatment in the new volume.

Please reserve your copy now as the edition is limited. The book is bound in cloth, fully indexed, small enough to fit the pocket, and quite indispensable to the general practitioner in his daily work.

It depends what you mean by 'Banking'

OF COURSE we safeguard money and cash cheques. But we go further. We maintain specialist departments whose functions, although not 'banking' in the usual sense, can nevertheless be used to very good purpose. These departments will, for example, act as an Executor, help with a customer's Income Tax problems, obtain currency for foreign travel. They will do many more things besides. But the moral of this multiplicity of functions is simply this: if you have any problem of finance or business, the chances are that we can help you deal with it. And that is what we mean by 'banking'

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent * testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

* SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of recruitment for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour as a whole-time medical student; and a Scoond House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to a Third House Officer post (£450 per annum).

Under present arrangements in England and Wales the C.M.R.C. normally allows an "R" practitioner to proceed directly from a Second House Officer post to a Senior House Officer post (£670 per annum) for one year, but this practice will be discontinued on January 1, 1953. An "R" practitioner who completes six months in a Second House Officer post on or after January 1, 1953, will require the special written permission of the C.M.R.C. or Scottish C.M.R.C. to proceed to any further post.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

Registrar Grades, Whole-time
(a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.
(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

Other Grades, Whole-time

(a) HOUSE OFFICER: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and 'odging and other services provided. Fach post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) SENIOR HOUSE OFFICER: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

SERVICES

ROYAL ARMY MEDICAL CORPS Short Service and Regular Commissions

Short Service and Regular Commissions

The War Office invites applications from registered medical practitioners, men and women, for Short Service Commissions in the Royal Army Medical Corps, for a period of eight years, of which from two to eight years is on the active list and the balance on the reserve. Civilian applicants liable for service under the National Service Acts are not accepted for less than four years on the active list. Extensions up to a maximum of eight years on the active list are admissible. Appointment is in the rank of licutenant, with promotion to captain after one year's service. An unmarried applicant with no previous service. An unmarried applicant with no previous service receives initially total emoluments of approximately £750 a year, rising to £860 a year on promotion to captain. This rises to £914 after two years as a captain, to £960 a year later, to £1.015 after a further year, and to £1.070 after six years in captain's rank. Married male officers aged 25 years of age receive about £137 a year more. Antedates of up to two years for civil experience in the hospital field may be given. Applicants appointed for four or more years on the active list are eligible after six months' total service for specialist training. Those appointed within twelve months of leaving superannuable employment as medical practitioners on the staff of an employing authority under the National Health Service may continue contributions during the active list period of their short service for service service service received the service of the service of the service of the short service of the The War Office invites applications from regis authority under the National Health Service may continue contributions during the active list period of their short service commission and preserve their superannuation position. On satisfactory termination of active list service, officers not appointed to a regular commission are eligible for ratuities ranging from £450 for three years up to £1.200 for eight years' active list service. Male officers may apply for Regular Commissions on completion of six months as a short service medical officer. Previous full pay service as an R.A.M.C. medical officer counts towards seniority, increments of pay, promotion, and pension. Regular commissions are not available for women. Regular officers retire at ages varying from 53 to 60 years, the majority at 57 years of age. Rates of retired pay vary from £500 to £1.200 a year, the majority getting £875 a year. Officers eligible for full retired pay qualify for a terminal grant up to £1.000. Further details may be obtained on application to the War Office (AMD 1), Lansdowne House, Berkeley Square, London, W.1. Visits to the above address (Room 130) will be welcomed. Telephone GROsvenor 8040. Extension 548. (5738)

A Major Advance in Cholecystography

The introduction of 'Telepaque'*, a new oral cholecystographic medium, brings with it greater ease of diagnosis of gall-bladder disease and greater comfort for the patient. 'Telepaque' has greater radio-opacity than pheniodol, due to its higher iodine content; fewer re-takes are necessary; the incidence of side-effects is minimal.

'Telepaque' is available in tablets of 0.5 g. in envelopes containing six tablets (adult dose) in boxes of six envelopes

Literature will gladly be sent upon request.

'TELEPAQUE'
