

Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room. Prepared without seasoning, it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

'PERNIVIT' for chilblains

Pernivit has proved to be remarkably effective both in treatment and in the subsequent pre-

vention of chilblains. It utilises the vasodilator properties of nicotinic acid and the effect of vitamin K in maintaining normal blood coagulability and vascular permeability. Irritation and inflammation are quickly relieved.

Dosage is from two to six tablets daily according to the severity of the case. Pernivit is available in bottles of 50 at 2/8. (Price in Great Britain to the Medical Profession.) Literature and specimen packings are available on request.

Prolonged

Local

Anaesthesia

A single injection of Efocaine PRODUCES CONTINUOUS LOCAL ANAESTHESIA AVERAGING 6-12 DAYS IN DURATION but frequently even longer. This important advance in the scientific control of pain is of particular significance in the post-operative period. A long-lasting depot anaesthetic is now available which does not rely on the use of oil, vaso-constrictor agents or gelatin as a retarding vehicle. Efocaine can be injected either deeply subcutaneously or intramuscularly and it does not interfere with wound healing. It is of particular interest in rectal surgery.

soluble aspirin with
codeine phosphate and phenacetin

Codis presents a familiar grouping of analgesic drugs; aspirin, phenacetin, codeine phosphate; with an important advantage. The "aspirin" in Codis is rendered soluble, as in 'Solprin'.

Placed, uncrushed, in water, a Codis tablet disperses in a matter of seconds to form a solution of calcium aspirin and codeine phosphate with finely suspended phenacetin. The chance of irritation of the gastric mucosa by undissolved particles of aspirin is thus minimised.

Codis is recommended for all those conditions for which Tab. Codein. Co. B.P. would be prescribed. It has the added advantages of greater ease of administration and far less likelihood of aspirin intolerance, while the rapid absorption of the soluble aspirin promotes prompt relief.

COMPOSITION

Each Codis tablet contains:—Acid. Acetylsalicyl. B.P. 4 grs., Phenacet. B.P. 4 grs., Codein Phosph. B.P. 0.125 grs., Calc. Carb. B.P. 1.2 grs., Acid. Cit. B.P. (Exsic.) 0.4 grs., Excip. ad. 11.45 grs.

Lederle

ARTANE*, the widely-recognised treatment for Parkinsonism, hitherto available solely in tablet form—is now also presented as a particularly palatable elixir.

ARTANE, a product of Lederle research, is effective in all forms of Parkinsonism—postencephalitic, arteriosclerotic and idiopathic. It is a highly potent antispasmodic which combines a marked degree of clinical effectiveness with unusually low toxicity.

ARTANE response is characterized by improvement in rigidity, and either control or lessening of tremor, drooling and oculogyria.

ARTANE produces a mild cerebral stimulation and increases emotional stability; patients become more cheerful, alert and responsive; reduction of rigidity and tremor leads to increased activity and independence.

ARTANE has benefited even patients with advanced symptoms of 20 years' duration, as evidenced both by their improved physical status and by their ability to assume some care of their persons.

ARTANE has proved almost as beneficial to postencephalitic patients with an illness of more than 10 years' duration as it has to more recent cases.

ARTANE is effective for patients with arteriosclerotic Parkinsonism; hypertension, renal and heart disorders are not contra-indications for its use. The slight mydriatic effect produced, as compared with that produced by the belladonna alkaloids, is not likely to cause glaucoma.

ARTANE has been reported to produce no ill effects on blood pressure, respiration, blood cell count, kidneys, liver, carbohydrate metabolism, growth or reproduction. **ARTANE** is so relatively free from serious toxic reactions that it can be used by the young and the old, the ambulatory and the infirm, the hypertensive, the cardiac and the nephritic.

We improve upon the first Elizabethans...

The virtues of 'sower oranges and lemons' in curing 'the scurvy' were known to seafarers in the days of Elizabeth Tudor, and later on Captain Cook found that fresh vegetables served the same purpose.

The difference today is that we know how much ascorbic acid we get in these foods and we can regulate our intake according to the needs of health and disease.

In VITAVEL SYRUP, concentrated orange juice is used as a base for the inclusion of other equally necessary vitamins, A, B₁, C and D, and the potency of each is designed to satisfy human needs.

One teaspoonful (3.5 c.c.) contains, at time of manufacture, vitamin A. 2,500 i.u., vitamin D 375 i.u., vitamin B₁ 0.5 mg., vitamin C. 10 mg. It can be given in water, soda water or undiluted.

To master malaria...

The satisfactory results already obtained with 'Daraprim' in the suppression and treatment of malaria indicate that it is likely to play a prominent part in the eradication of malarial infection in endemic regions. Notable features are :—

- ▶ High potency — each product contains only 25 mgm. of drug.
- ▶ Small dosage for treatment of acute attacks — $\frac{1}{2}$ to 4 products according to age.
- ▶ Small dosage for suppression— $\frac{1}{2}$ to 1 product according to age.
- ▶ Prolonged suppressive action—one weekly dose.
- ▶ Has been shown to prevent the development of gametocytes in the mosquito, and to be capable of interrupting the malarial cycle.
- ▶ Unpleasant or toxic side effects have not been reported.
- ▶ Quite tasteless — ideal for children.

Further details of this new compound, which is issued as 25 mgm. compressed products in packs of 6, 30 and 1000, will gladly be sent on application to 183-193, Euston Road, London, N.W.1.

New porous Elastoplast

**THIS IMPROVED ELASTOPLAST IS NOW
BEING SUPPLIED TO HOSPITALS**

T. J. Smith & Nephew announce that they have now completed two years of extensive clinical trials of their new Porous Adhesive Elastoplast bandages and extension plasters. Results confirm that this new porous adhesive largely overcomes skin reaction to occlusion, which some patients experience beneath fully spread adhesive bandages, by permitting free evaporation of sweat and minimizing epidermal keratinisation produced by the stimulating effect of the adhesive.

Porous Elastoplast bandages and extension plasters are now being supplied to hospitals and, as production increases, will be available to the medical profession as a whole. Prices are the same as the normal spread Elastoplast bandages.

Points about Porous Elastoplast

- 1 Porous throughout whole surface of the bandage, allowing free evaporation of sweat and minimizing blockage of sweat-duct ostia.
- 2 The ideal compression and grip of Elastoplast is wholly maintained because there is no loss of stretch, regain or adhesive qualities.
- 3 Adhesive not spread to edges of bandage — minimizes rucking and soiling of clothes.
- 4 Fluffy edges eliminate localised 'hard' compression — preventing trauma to devitalized skin.
- 5 The name of the improved Elastoplast is 'Porous Adhesive Elastoplast'.

Urolucosil*

A SULPHONAMIDE

FREE FROM SIDE-EFFECTS

One of the most valuable characteristics of Urolucosil is the remarkable absence of side-effects noted with this sulphonamide. Such conditions as cyanosis, vomiting, acidosis, hypersensitivity, have yet to be reported; it is most uncommon for there to be any upset of the blood picture or disturbance of the intestinal flora with Urolucosil. Because Urolucosil is a compound with the high solubility of 98% at a pH of 7, it is unlikely that any blockage of the urinary passage by crystalline deposits will be caused; no diminishing of urinary output caused by such blockage has in fact been reported since Urolucosil was introduced to the medical profession in Great Britain. Finally, depression, which so often militates against the well-being of a patient, is virtually absent when Urolucosil is prescribed. Urolucosil is especially indicated in uncomplicated infections due to *B. coli* and other organisms of the coliform group: acute cystitis, acute pyelitis, pyelitis of pregnancy: urinary tract infections in children: neurogenic bladder.

THERE'S STRENGTH IN COMBINED ACTION

The answer to many a problem lies in combined action. Witness the higher blood levels and the greater clinical efficacy that have been reported from the oral administration of penicillin and the sulphonamides simultaneously in cases when the oral administration of the antibiotic or chemotherapeutic agent alone has been ineffective. A convenient means of applying this combined antibacterial therapy is Sulpenin. Containing penicillin, sulphadiazine and sulphamerazine in balanced dosage, it provides a valuable treatment for many infections due to susceptible micro-organisms. By utilising the synergistic action between penicillin and the sulphonamides the antibacterial range is increased, the likelihood of kidney damage is lessened and the tendency for the bacteria to develop mutant strains resistant to one or other of the component drugs is reduced.

What is all this about spray-drying?

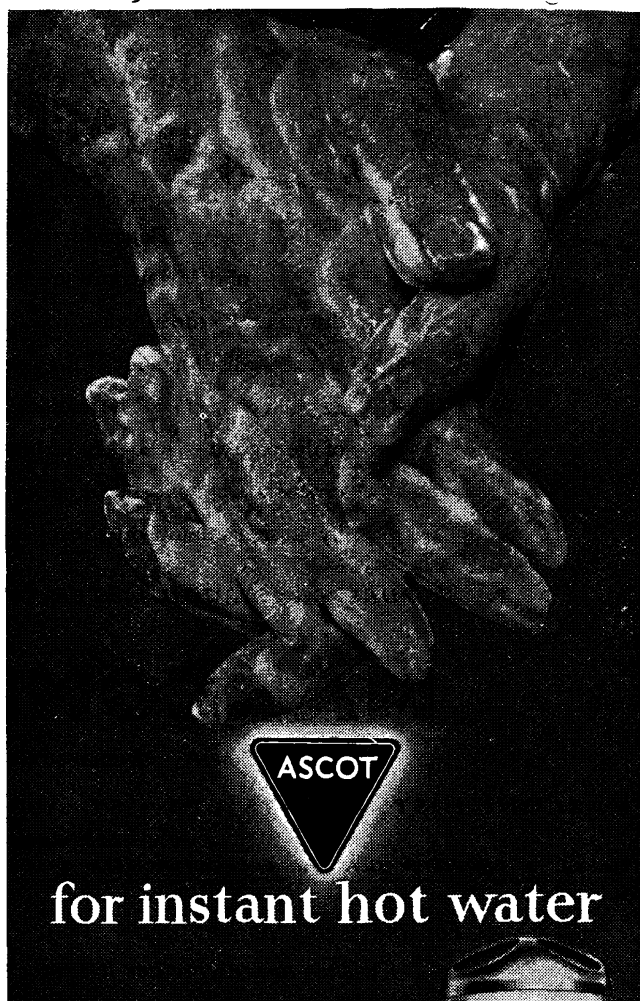

This modern low temperature process of drying milk foods preserves the colloidal condition of the protein on reconstitution and ensures that the fat is in the form of a finely diffused emulsion. Humanised Trufood is spray-dried. When Trufood is reconstituted, the resultant fluid, with the fat in the form of cream, has all the physical characteristics of *true* milk. This is one of the factors distinguishing Trufood from ordinary milk foods—another reason why Trufood is the most satisfactory alternative to breast milk.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

Deferment of recruitment for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to a Third House Officer post (£450 per annum).

Under present arrangements in England and Wales the C.M.R.C. normally allows an "R" practitioner to proceed directly from a Second House Officer post to a Senior House Officer post (£670 per annum) for one year, but this practice will be discontinued on January 1, 1953. An "R" practitioner who completes six months in a Second House Officer post on or after January 1, 1953, will require the special written permission of the C.M.R.C. or Scottish C.M.R.C. to proceed to any further post.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

HER MAJESTY'S COLONIAL SERVICE, Malaya
Doctors having medical qualifications registrable by the General Medical Council in the United Kingdom, with one or more years of experience after qualification, are required for the following posts:

MEDICAL OFFICERS AND MEDICAL OFFICERS OF HEALTH
for general medical and health duties including training of hospital assistants and nurses and to assist if necessary in teaching clinical work to students.

MEDICAL OFFICERS (Anaesthetists)
to administer anaesthetics in larger hospitals and to instruct junior medical officers. Candidates must have a Diploma in Anaesthetics.

MEDICAL OFFICERS (Alienists)
to take charge of beds in a mental hospital, under the supervision of the Medical Superintendent and, if required, to give evidence in medico-legal cases. Candidates must possess a Diploma in Psychological Medicine and have had experience in mental hospitals.

RADIOLOGISTS
for general medical duties and as hospital radiologists. Candidates should have either a Diploma in Medical Radiology or considerable experience in radiological work.

Appointments are available (a) on probation for permanent and pensionable establishment, (b) on employment from the National Health Service, and (c) on short term contract with gratuity. (a) Permanent terms.—Subject to three years' probation appointment is permanent with pension (non-contributory) at age of 55. Basic salary is paid in the scale £890 by £50 to £1,192, to £1,276 by £50 to £1,680 per annum. In addition, pen-

sionable expatriation pay is payable to all officers at the rate of £266 to £364 per annum. A non-pensionable expatriation allowance is paid to married officers without children at the rate of £91 to £133 per annum, and to married officers with children at the rate of £182 to £259 per annum. There are many posts, specialist and administrative, available on promotion carrying higher salaries (up to about £3,080 for the highest post). Promotion is often made before reaching the top (£1,680) of the medical officer's salary scale. A temporary, variable non-pensionable cost-of-living allowance is payable, according to salary and to family circumstances. This ranges from £56 to £497 a year. Note.—Doctors with more than one year's approved experience after age 25 (including service in Her Majesty's Forces) enter the salary scale at points above the minimum according to their experience, and four increments of salary are also given to holders of approved higher qualifications (e.g. F.R.C.S., M.R.C.P., D.P.H., D.P.M., D.A., etc.). (b) National Health Service.—Doctors may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Malayan salary on leaving Malaya at the end of their engagements. Emoluments as under (a) including incremental credit for experience and higher qualifications as in note under (a). Doctors so appointed may be considered for permanent terms at any time during their employment in Malaya provided they surrender their rights to the resettlement grant. Payment by Malayan Government of National Health Service superannuation contributions ceases from date of permanent service. (c) Contract terms.—The contract will be for three years' resident service renewable for a further tour of three years by mutual agreement. Salary and allowances as under (a), including incremental credit for experience and higher qualifications as in note under (a). In addition a gratuity earned at the rate of £300 to £450 per annum according to salary is paid on expiry of contract. Doctors on contract may be considered for appointment to the permanent establishment at any time on their agreeing to surrender their gratuity earning rights. In all three types of appointment the rates of salary and gratuity refer to doctors eligible for "expatriate terms" under Malayan Regulations (i.e. those whose permanent homes are in the United Kingdom, Irish Republic, Australia, Canada, etc.). The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates, which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife, and children under the age of ten (not exceeding four persons besides himself) on appointment and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. CSE60/53/06). (7230)

**When Vitamins of
the B₂ Complex
are Indicated**

In cases where dietary supplements of the vitamin B₂ complex are indicated Marmite yeast extract is often recommended, as it provides the whole group in a naturally occurring form. Besides riboflavin (1.5 mg. per oz.) and nicotinic acid (16.5 mg. per oz.) it supplies folic acid, pyridoxin, pantothenic acid, biotin, choline, inositol and p-aminobenzoic acid.

Routine administration of Marmite has been suggested concurrently with certain antibiotics and after gastrectomy, when B₂ deficiencies have been found to occur. Its inclusion in the ante-natal diet and in infant feeding is also recommended by many authorities.
