LITERATURE GLADLY FORWARDED UPON REQUEST

The manufacturers of
DETTOL submit
 the following facts to your attention

Wide mention in medical literature has made Dettol a textbook antiseptic. Wide clinical use has attested the efficiency of Dettol in literally millions of cases which range from minor accident to major operation.

Efficiency Dettol is an efficient antiseptic which, moreover, retains a high degree of efficiency in the presence of organic matter.

Toleration Dettol is well tolerated on the skin and tissues in high concentrations. Moreover, its non-toxicity offers a high degree of safety to doctor, nurse and patient.

Strength The fact that Dettol is well tolerated by the tissues permits dilutions to be recommended for clinical purposes which provide a margin of safety even when a reasonable amount of organic material is present.

Activity Dettol is active against both

Gram-positive and Gram-negative micro-organisms. Under standard conditions of test a dilution of 1 in 200 kills *Staph. aureus* in 10 minutes; a one in 500 dilution kills *Strept. pyogenes* in 10 minutes.

Dettol is not incompatible with soap, traces of which need not be removed before application. **Compatibility**

Dettol is non-poisonous, safe, pleasant and economical in use. It has an agreeable smell. **Pleasantness**

Bacteriological data and the literature of Dettol are available on request. Dettol is packed in 2 and 5 gallon, Purchase-Tax-free Dispensing containers. **Data**

Rapid disintegration ensures prompt relief from epigastric pain due to hyperacidity and gastro-duodenal ulceration. A prolonged "buffering action" for over three hours is established causing no "acid rebound." The liberation of the amino acid glycine stimulates the granulation of the ulcer bed and the normal enzyme activity is ensured whilst the mucosa is protected by the freely formed colloidal gel.

Alike yet different

Alike, in being both hunting birds, yet so plainly different that not to know hawk from heron became proverbial for stupidity. The heron, or hearnshaw, once the falconer's popular quarry, was corrupted to 'handsaw' in the saying quoted by Hamlet :

'I know a hawk from a handsaw'.

'Iodex' and other non-staining iodine ointments are alike in being iodine ointments. In use they are different. In 'Iodex' there are no irritating and staining particles of dross. That is why 'Iodex' is so bland and penetrating.

NULACIN

NULACIN TABLETS are indicated whenever continuous acid neutralization of the gastric contents is required:— in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

DOSAGE

Beginning half-an-hour after food a NULACIN TABLET should be placed in the mouth between the cheek and the gum and allowed to dissolve.

During the stage of ulcer activity up to three tablets an hour may be required. For follow-up treatment the suggested dosage is one or two tablets between meals.

PoroPlast

TRADE MARK

Research during the past ten years into skin irritation associated with the use of adhesive plaster has resulted in notable improvements over the old type of elastic adhesive bandage.

PoroPlast contains no rubber, and it is entirely free from the irritating solvents and resins usually embodied in elastic adhesive bandages. PoroPlast is porous over its whole surface, giving ventilation *even where two layers overlap*. It offers greatly increased plaster toleration even on the most sensitive skins. Samples on application.

N.H.S.

PoroPlast conforms to the Specification for Flexible Adhesive Bandages Porous of the Drug Tariff (April 1953 Amendment) and is freely prescribable in widths 2½ in. and 3 in. on E.C.10 under the name "PoroPlast."

EMOTIONS

EMOTIONAL DISTURBANCE...

A close association has been shown to exist between certain emotional disturbances and changes in gastric function. Increased acid secretion has been observed to follow emotional reactions of a combative nature and the importance of controlling gastric acidity in the management of peptic ulcer is widely recognised.

'Aludrox' Amphoteric Gel, buffers gastric acid to a pH of 3.5 to 4.0, at the same time providing a protective gel barrier over the surface of the ulcer. Healing is thus able to proceed whilst the risk of alkalosis is avoided and normal digestion is unimpaired.

'ALUDROX'
Trade Mark

'ALUDROX' is available in two forms: as an amphoteric gel (consisting of Aluminium Hydroxide Gel B.P.C. suitably flavoured and preserved) in 6 oz. and 12 oz. bottles and as tablets (each tablet containing dried Aluminium Hydroxide Gel. B.P.C. 13 gr.) in boxes of 60.

A PRACTICAL SERVICE for the Practitioner

—free of charge

In addition to the standard diet cards for common ailments which have been issued by the Energen Dietary Service for nearly 25 years, special diets are planned to suit the needs of individual cases on receipt of appropriate clinical information from the doctor concerned.

FREE TO MEDICAL PRACTITIONERS

"Diet and the General Practitioner," a 40-page book of monographs on specific dietary problems, is available free of charge to medical practitioners. Cut out this advertisement and send it with your professional card, or apply on a postcard to the Energen Dietary Service.

For some patients, however, personal considerations make it difficult to follow a set dietary without detailed explanation. In such cases, where it would help your patients to observe their regimes intelligently and strictly and thus achieve better results, you are invited to arrange an interview for them with the senior dietitian of the Energen Dietary Service. (Dietary advice is not given to the lay public except at the direct request of their doctor.) These services are offered entirely free of charge and you are invited to apply for further details to the Energen Dietary Service.

COMBINED ATTACK on Athlete's foot and other fungal dermatoses

Mycil ointment and dusting powder are non-mercurial and odourless and may be used over long periods, if necessary, in treatment or prophylaxis without adverse reactions. Mycil ointment is formulated to ensure penetration of the active constituent, chlorphenesin, to the site of the infection. Mycil powder used alone prevents reinfection; and is also effective in the treatment of excessive perspiration.

Prevention of Dressing Trauma

Jelonet is a dressing for all wounds—its non-adherent properties protect the delicate epithelium and prevent dressing trauma, enabling healing to continue undisturbed. It is used extensively in the treatment of burns and as a dressing following skin-grafting operations. It is non-toxic and compatible with Penicillin and all other antibiotics, and may be used as a means of drainage, or as a packing for deep granulating wounds. It may also be used as an adjuvant in the treatment of varicose ulcers by compression bandaging, and as a means of protecting the skin from irritating discharges. Jelonet may be prescribed by name under the N.H.S. (Form E.C.10) in the following sizes:— single pieces in envelopes, tins containing

5, 10 or 36 pieces, each piece $3\frac{3}{4}$ " x $3\frac{3}{4}$ ".

The new PENICILLIN COMPOUND

'PENIDURAL' is the new ready-for-use fluid oral penicillin, containing 300,000 units to each large teaspoon (5 c.c.). It will retain its full potency in aqueous suspension *for eighteen months at room temperature*, and is thus ideal for treatment both in hospital and home.

*Extract from
Editorial of the British Medical Journal, dated
11th April, 1953, page 823.*

"A standard dose of 300,000 units (of 'Penidural') was given, and after a single dose a therapeutic blood concentration was invariably found after 3 hours. When the dose was repeated at six-hour intervals a cumulative effect was observed, with continuous maintenance of a therapeutic concentration".

Below is a diagram based upon recent work as reported in the British Medical Journal, April 11th, 1953, pp. 805 and 823.

118 Patients (101 children and 17 adults) were given, irrespective of age and weight, 300,000 units of 'PENIDURAL'. No less than 100% showed therapeutic blood levels after 3 hours.

The introduction of this pleasantly flavoured liquid penicillin banishes the need for any tedious mixing. The patient merely has to pour out the specified dose.

Supplied in bottles of 2 fl. ozs. (12 large teaspoonsful)

The IRON DUKE

Throughout History, Iron has always symbolised strength. Today, in common phraseology, terms like "an iron will" carry on this idea.

These terms were based on the physical strength of the metal, but there is a nutritional sense in which iron provides strength.

During pregnancy, much iron is required for the healthy development of the foetus — this must be supplied by the mother, who must either ingest it from her diet or draw it from her own limited reserves.

PRENATALAC is a special food, containing 50 mgms. of Ferri et Amm Cit per ounce, prepared for expectant and nursing mothers.

HĒMOLAC is an infant food, containing 25 mgms. per ounce of the same iron salt, for cases of microcytic anaemia in infancy.

*New!
for Babies*

Carter's of Coleford, makers of Ribena Blackcurrant Juice, announce a new Vitamin C syrup—ROSENA—which has been especially prepared for children from two weeks to ten years old. Rosena is a balanced blend of pure orange juice and rose hip extract. The soft, pleasant flavour of the rose hip has been used to stabilise the orange juice at an acidity which makes it most pleasant and acceptable to children of all ages. It does not cause stomach or bowel trouble. By reason of its high vitamin content (not less than 56 mgms. of Vitamin C per fluid oz.) Rosena is equal in Vitamin C activity to Ministry of Food Orange Juice and National Rose Hip Syrup. It also contains three natural sugars, which are nutritionally valuable.

These comprise glucose, fruit sugar and cane sugar. In addition, a further ten per cent of pure glucose has been added. It costs only 2/10d. a bottle and lasts baby a whole month. From Chemists only.
