*It depends what
you mean by 'Banking'*

OF COURSE we safeguard money and cash cheques. But we go further. We maintain specialist departments whose functions, although not 'banking' in the usual sense, can nevertheless be used to very good purpose. These departments will, for example, act as an Executor, help with a customer's Income Tax problems, obtain currency for foreign travel. They will do many more things besides. But the moral of this multiplicity of functions is simply this: if you have *any* problem of finance or business, the chances are that we can help you deal with it. And that is what *we* mean by 'banking'

THE EXTRA PHARMACOPŒIA (MARTINDALE)

Volume 1, 23rd Edition

In this new edition will be found information on the composition and character of practically every substance used in medicine, together with a concise summary of its use, its method of administration and its contraindications, with abstracts of the world literature. The book gives details, with references, of the most recent innovations in medical practice.

Details are provided on the toxicity of chemicals and drugs, on reports of cases of poisoning, and on treatment of overdosage. It is unlikely that any medicinal agent of established value has been omitted from the Therapeutic Index, which is about half as long again as that of the last edition and contains approximately 750 headings.

FOR MILD FORMS OF PAIN

"Aspirin and phenacetin are effective and useful, and a sedative effect is obtainable if a barbiturate is combined with them . . . The reputation of codeine as a pharmacologically useful drug is at present waning, for the analgesic effect of the compound tablet of codeine B.P. is probably due more to its content of aspirin and phenacetin than to the $\frac{1}{2}$ gr. (8 mg.) of codeine present. It is a weak analgesic even when given in full doses." (Brit. Med. J. 1952 (Oct. 25th) ii, p. 928)

Tercin combines aspirin and phenacetin with a barbiturate. It is intended for the relief of all those mild forms of pain for which tablets of Aspirin, Phenacetin and Codeine have hitherto been prescribed.

Its cost to the National Health Service is no greater than that of Tab. Codein. Co. B.P.

Tercin is available in tablets containing aspirin 5 gr., phenacetin 3 gr. and butobarbitone $\frac{1}{2}$ gr.

For dispensing only, 200 at 4/10, and 1000 at 24/- (Prices to pharmacists in Great Britain).

TRADE MARK

A most potent antihistamine

Laboratory and clinical trials show that 'Actidil' brand *trans*-1-(4-methylphenyl)-1-(2-pyridyl)-3-pyrrolidinoprop-1-ene Hydrochloride is one of the most potent antihistamines yet found.

The average adult dose of 2.5 to 5 mgm. acts quickly, the effect being maintained for about twelve hours. The incidence of side-effects is low. 'Actidil' is not expected to replace 'Histantin' brand Chlorcyclizine Hydrochloride, which has a slower onset of effect but a more prolonged action, but to be complementary to it.

'Actidil', which was discovered in the laboratories of The Wellcome Foundation, was originally described as 295C51. It is available as scored compressed products of 2.5 mgm., in bottles of 25 and 500.

The Problem

Insect bites and stings

With the summer months comes an increased demand for a suitable preparation to relieve the painful and often alarming effects of insect bites and stings. The answer — 'Phenergan' Cream — a rapidly-acting agent for topical application to the affected areas.

'Phenergan' Cream is now manufactured to a modified formula. It combines the potent long-acting antihistaminic and local analgesic properties of promethazine with the antiseptic activity of its new constituent, dibromopropamide. This latter property makes 'Phenergan' Cream particularly valuable for the prevention of infection.

Photograph taken on 20th December, before treatment with "F99". Diagnosis, leg ulcer unhealed since 1916.

Photograph taken on 28th March, 1951, after 14 weeks' treatment with "F99". One capsule and one application of ointment daily.

"F99"—available in capsule, liquid and ointment forms—is a concentrate of the active isomers of linoleic and linolenic acids, of the highest achievable purity and standardized biological activity.

It is indicated in skin disorders due to essential fatty acid deficiency of dietetic or "absorption" origin, i.e., chronic furunculosis, eczemas of various types including infantile eczema and in some cases of acne. It is also excellent in the healing of all wounds free from serious infection—particularly leg ulcers. Sufficient success has also been reported to warrant its use—as an unsaturated substance—in the treatment of psoriasis.

"F99" has no N.F. equivalent, is not advertised to the public and may be prescribed on E.C.10. The average net weekly cost to the chemist, with full dosage, can be as little as 3/6.

Nulacin for continuous, maintained gastric anacidity

IT has long been recognized that the most rapid relief of the pain and discomfort of peptic ulcer and most rapid healing of the lesion are achieved when a continuous state of gastric anacidity is maintained.

Heretofore, such a state has only been possible with hospitalization and severe discomfort to the patient. Now, NULACIN offers all the advantages of continuous drip therapy without the attendant inconveniences.

NULACIN accomplishes this desirable aim simply and effectively. A NULACIN tablet placed between the cheek and the gum dissolves slowly and releases its contained medications at a rate which achieves the effect of intragastric milk-alkali drip therapy. By maintaining a prolonged influence NULACIN accomplishes its acid-neutralizing effect with considerably less antacid than would be required by any other method employing oral administration.

INDICATIONS: NULACIN tablets are indicated whenever acid neutralization of the gastric contents is required; in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Dosage

Beginning half-an-hour after food a NULACIN tablet should be placed in the mouth between the cheek and the gum and allowed to dissolve.

During the stage of ulcer activity
up to three tablets an hour may be

required. During quiescent periods, for prophylaxis in peptic ulcer and for the relief of discomfort due to gastric hyperacidity, the dose of NULACIN is one or two tablets between meals.

NULACIN tablets are not advertised to the public and have no B.P. equivalent. May be prescribed on E.C.10. The dispensing unit of 25 tablets is free of purchase tax. (Price to pharmacists . . . 2/-.) Also available in tubes of 12.

Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

Same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.
